吉井解学出品

前言（使用指南）

关于研究生入学英语分级考试：

详情可到吉井解学公众号查看相关推文。

研究生入学英语分级考试，和本科生入学英语分级考试用来区分教学班不同，仅仅是一个通过性考试，只要考过60分即为通过并计入成绩，就不用选英语课了，符合条件申请免修的按90分计入成绩不用参加考试。如果没通过，则需要修读英语课，期末继续考试，考过后即可不再修读了。

关于这套全真模拟卷：

网上流传的所谓研究生题库真题，都是很古老的了，经确证，压根儿不是这些年考的，而且就只是杂乱无章扫描的，看起来没有想写的欲望。为此，我们根据去年考过的研究生同学反馈的题型题量以及话题，结合今年发生过的相关热门事件等，命制了五套话题类全真模拟卷和一套综合话题全真模拟卷，共计六套，可供大家考前练习作为参考。

听力音频请扫页眉右上角二维码点进新生攻略文件夹里的研究生入学英语分级考试文件夹里听。

目录

吉大研究生入学英语分级考试 全真模拟卷（一）：科技与航天	1
吉大研究生英语分级考试 全真模拟卷（二）：消费与社会	8
吉大研究生英语分级考试 全真模拟卷（三）：环境与气候	16
吉大研究生英语分级考试 全真模拟卷（四）：健康与心理	24
吉大研究生入学英语分级考试 全真模拟卷（五）：文体与国际	32
吉大研究生入学英语分级考试 全真模拟卷（六）：综合卷	40
吉大研究生入学英语分级考试 全真模拟卷（一）详解	44
吉大研究生入学英语分级考试 全真模拟卷（二）详解	50
吉大研究生入学英语分级考试 全真模拟卷（三）详解	57

吉大研究生入学英语分级考试 全真模拟卷（一）：科技与航天

(Time Allowed: 120 minutes)

Part I Listening Comprehension (25 points)

Section A (16 points)

Directions: In this section, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A., B., C. and D., and decide which is the best answer.

1. A. His passport and visa
C. His registration form and fee receipt
- B. His student ID and admission notice
D. His transcript and recommendation letter
2. A. All areas close at 10 p.m.
B. The self-study area now stays open until midnight on weekdays
C. Only the reading rooms are open until midnight
D. The library is closed on weekends
3. A. The man hasn't completed the prerequisites
C. The man chose the wrong course
- B. The course may already be full
D. The form needs additional signatures
4. A. It was moved to an earlier date with no other changes
B. The date was postponed and an oral section was added
C. It was moved to the afternoon with a written section added
D. The exam was cancelled due to the conference
5. A. To avoid switching majors entirely
B. To switch only if she is passionate and ready for more work
C. To change to mechanical engineering instead
D. To wait until next year to make the decision
6. A. Search the database more carefully
C. Use the inter-library loan service
- B. Visit another university's library in person
D. Purchase the journal issues online
7. A. The application deadline has been extended
C. Most applicants will receive the fellowship
- B. The selection process has been delayed
D. Only a small fraction of applicants will be awarded
8. A. Updating the software on her laptop
C. Waiting for the Wi-Fi to stabilize
- B. Using the computers in Building C's lab
D. Downloading the videos at home

Section B (9 marks)

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage One

Questions 9 to 11 are based on the passage you have just heard.

9. A. Artificial Intelligence and Global Economy
C. AI Ethics and Sustainable Development
- B. Intelligent Connectivity, Infinite Possibilities
D. The Future of Robotics

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

10. A. Heart disease and diabetes
C. Cancer and tumors
11. A. Complete elimination of traffic accidents
C. Full automation of public transportation
- B. Depression and anxiety disorders
D. Vision and hearing problems
B. A 23% reduction in peak-hour congestion
D. A 50% decrease in carbon emissions

Passage Two

Questions 12 to 14 are based on the passage you have just heard.

12. A. To provide global satellite television coverage
B. To build a space-based computing network for real-time services
C. To monitor space debris and asteroids
D. To replace all ground-based data centers
13. A. On a land-based platform in the Gobi Desert
B. On an unmanned recovery vessel in the South China Sea
C. On a floating platform in the East China Sea
D. On a designated landing pad in Hainan
14. A. The construction of a new space station module
C. A joint lunar base project with Russia
- B. The Tianwen-3 Mars sample return mission
D. The deployment of a solar power satellite

Passage Three

Questions 15 to 17 are based on the passage you have just heard.

15. A. Three
C. Five
- B. Four
D. Six
16. A. About 1,000 kilometers
C. About 10,000 kilometers
- B. About 5,000 kilometers
D. About 50,000 kilometers
17. A. The communication system failed completely
B. The solar panels experienced a brief power fluctuation
C. The life support system overheated
D. The navigation system lost signal for two hours

Part II Cloze (10 points)

Directions: There are a number of blanks in the following passage. For each blank there are four choices marked A., B., C. and D.. You should choose ONE that best fits into the passage, Then mark the corresponding letter on the Answer Sheet with a single line through the center.

Artificial Intelligence and Human Creativity: Collaboration or Competition?

The rapid advancement of artificial intelligence has __18__ a fundamental debate about the nature of creativity. As AI systems become increasingly __19__ at generating text, images, and music that closely __20__ human works, many have begun to question whether machine intelligence will eventually __21__ human creativity altogether.

Proponents of AI argue that these systems are merely tools that __22__ human creative potential rather than replace it. They point to examples where AI has assisted artists in exploring new styles, helped writers __23__ writer's block, and enabled musicians to compose in genres they had never __24__ before. In this view, AI serves as a collaborative partner that __25__ human capabilities rather than diminishes them.

Critics, however, contend that true creativity requires consciousness, emotional depth, and lived experience—qualities that no AI system currently __26__. They argue that AI-generated works, however polished, lack the

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

authentic human touch that makes art meaningful. The debate is far from settled, but one thing is certain: the __27__ between human and machine creativity will continue to reshape our understanding of both.

- | | | | |
|------------------|-----------------|-----------------|----------------|
| 18. A. ignited | B. extinguished | C. neglected | D. suppressed |
| 19. A. clumsy | B. proficient | C. reluctant | D. indifferent |
| 20. A. distort | B. resemble | C. contradict | D. surpass |
| 21. A. enhance | B. preserve | C. displace | D. celebrate |
| 22. A. amplify | B. constrain | C. monitor | D. dismiss |
| 23. A. aggravate | B. overcome | C. provoke | D. sustain |
| 24. A. attempted | B. abandoned | C. rejected | D. perfected |
| 25. A. restricts | B. undermines | C. augments | D. duplicates |
| 26. A. possesses | B. acquires | C. manufactures | D. simulates |
| 27. A. harmony | B. tension | C. indifference | D. submission |

Part III Reading Comprehension(45 points)

Directions: There are three passages in this part, Each passage is followed by some questions or unfinished statements, For each of them there are four choices marked A., B., C. and D.. You should decide on the best choice.

Passage One

The 2026 World AI Conference and the Rise of "Baiyuzhi"

The 2026 World Artificial Intelligence Conference (WAIC 2026), held in Shanghai from July 6 to 8, drew over 200,000 attendees and featured more than 1,500 exhibitors from 62 countries. Under the theme "Intelligent Connectivity, Infinite Possibilities," the conference showcased breakthroughs that are rapidly moving AI from laboratories into everyday life.

The undisputed highlight of WAIC 2026 was the official launch of "Baiyuzhi" (百域智), China's most ambitious general-purpose AI platform to date. Developed by a consortium led by the Shanghai AI Laboratory in collaboration with 18 universities and 12 tech companies, Baiyuzhi integrates natural language processing, computer vision, and reasoning capabilities into a single unified architecture. Unlike previous AI models that excelled in only one domain, Baiyuzhi demonstrated competence across 147 different task categories during its live demonstration, including medical image analysis, legal document drafting, and real-time multilingual interpretation.

What sets Baiyuzhi apart is its "domain-aware" design. The platform can automatically detect the professional context of a user's query and adjust its reasoning framework accordingly. For instance, when asked the same medical question, Baiyuzhi provides a general explanation to a layperson but offers detailed diagnostic reasoning when it identifies the user as a healthcare professional. This adaptive capability earned Baiyuzhi the conference's top innovation award.

In the healthcare sector, several AI applications drew significant attention. A system called "HealthPal," developed by researchers at Tsinghua University, demonstrated the ability to detect early signs of depression and anxiety by analyzing subtle patterns in users' speech and facial micro-expressions. Clinical trials involving 12,000 participants reported an accuracy rate of 89%, surpassing most traditional screening methods. The developers emphasized that HealthPal is intended as a preliminary screening tool to assist—not replace—mental health professionals.

The conference also addressed pressing ethical concerns. China's Ministry of Science and Technology released the "White Paper on AI Ethics Governance (2026)," which established guidelines for algorithmic transparency, data

更多学习资源，关注吉井解学公众号

privacy protection, and accountability in AI decision-making. The white paper introduced a mandatory "AI impact assessment" for any AI system deployed in critical sectors such as healthcare, criminal justice, and education. Conference chair Professor Zhang Wei noted, "We are entering an era where governing AI wisely is just as important as developing it rapidly."

28. What distinguished Baiyuzhi from previous AI models?
 - A. It was developed entirely by a single company
 - B. It required no training data to function
 - C. It demonstrated competence across 147 different task categories
 - D. It could only process text-based queries
29. What is the key feature of Baiyuzhi's "domain-aware" design?
 - A. It restricts access to certain professional domains
 - B. It adjusts its reasoning based on the user's professional context
 - C. It only operates in medical and legal fields
 - D. It requires users to specify their profession before each query
30. According to the passage, HealthPal can help detect mental health conditions by analyzing:
 - A. Blood test results and genetic markers
 - B. Users' speech patterns and facial micro-expressions
 - C. Social media activity and online behavior
 - D. Brain scans and neurological tests
31. What does the passage say about HealthPal's clinical trial results?
 - A. They were inconclusive and required further study
 - B. They achieved an accuracy rate lower than traditional methods
 - C. They involved fewer than 1,000 participants
 - D. They reported an 89% accuracy rate, surpassing most traditional methods
32. Which of the following is NOT mentioned as part of the White Paper on AI Ethics Governance (2026)?
 - A. Algorithmic transparency guidelines
 - B. Data privacy protection measures
 - C. Mandatory AI impact assessments for critical sectors
 - D. A complete ban on AI use in criminal justice

Passage Two

China's Aerospace Breakthroughs: Rocket Recovery and the Space Computing Constellation

The year 2026 has proven to be a watershed moment for China's aerospace ambitions, marked by two landmark achievements that signal the country's growing capabilities in space technology: the successful sea-based recovery of a reusable rocket and the inauguration of the "Space Computing Constellation."

On May 24, 2026, China Aerospace Science and Technology Corporation (CASC) achieved a historic milestone when the Long March 10 rocket's first-stage booster successfully executed a controlled descent and precision landing onto an unmanned recovery vessel stationed in the South China Sea. The booster, having delivered its payload into low Earth orbit, re-entered the atmosphere and used grid fins and engine re-ignition to guide itself to the designated landing zone—a rectangular platform measuring just 52 by 38 meters on the drone ship "Haijian-02." This achievement makes China only the second nation, after the United States, to master the complex technology of large-

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

scale rocket recovery at sea.

The significance of this breakthrough extends far beyond national pride. Reusable rocket technology has the potential to reduce launch costs by an estimated 60 to 70 percent, dramatically lowering the economic barrier to space access. CASC officials announced plans to conduct at least six additional recovery tests through 2027, with the goal of achieving full reusability for the Long March 10 by 2028. The technology is expected to play a crucial role in China's upcoming lunar missions, including the Chang'e-7 south pole exploration mission and the construction of the International Lunar Research Station.

Equally ambitious is the "Space Computing Constellation" (太空计算星座), whose first experimental satellite, Tiansuan-1 (天算一号), was launched into orbit on March 12, 2026, aboard a Long March 8 rocket from the Wenchang Space Launch Center. The constellation, a collaborative project between the China Academy of Space Technology and leading universities including Tsinghua, Peking University, and Jilin University, envisions a network of over 100 low-Earth-orbit satellites that collectively form a space-based computing grid.

Unlike traditional communication satellites that merely relay data, Tiansuan-1 carries onboard high-performance processors capable of performing complex computations in orbit. The satellite is designed to provide real-time data processing services for applications ranging from disaster monitoring to autonomous shipping navigation. Dr. Li Hongfeng, chief scientist of the project, explained: "Ground-based data centers face limitations in latency, coverage, and energy consumption. A space-based computing network can process data at the edge—closer to where it is generated—enabling services that ground infrastructure alone cannot deliver."

The constellation will be deployed in three phases: Phase 1 (2026–2027) will establish a 30-satellite demonstration network; Phase 2 (2027–2029) will expand coverage to 72 satellites; and Phase 3 (2029–2031) will complete the full 108-satellite constellation. When fully operational, the system is expected to provide computing coverage to over 95 percent of the Earth's surface, including remote areas currently underserved by ground-based infrastructure. International observers have noted that the Space Computing Constellation represents a new paradigm in space utilization, potentially reshaping the competitive landscape of global cloud computing.

33. What was the key achievement of the Long March 10 rocket test in May 2026?
- A. It launched the heaviest payload in Chinese history
 - B. Its first-stage booster landed precisely on a sea-based recovery vessel
 - C. It successfully docked with the International Space Station
 - D. It completed a round trip to the Moon and back
34. According to the passage, what cost reduction can reusable rocket technology potentially achieve?
- A. 20 to 30 percent
 - B. 40 to 50 percent
 - C. 60 to 70 percent
 - D. 80 to 90 percent
35. Which university is mentioned as a collaborator in the Space Computing Constellation project?
- A. Fudan University
 - B. Zhejiang University
 - C. Jilin University
 - D. Nanjing University
36. According to Dr. Li Hongfeng, what is a key advantage of space-based computing over ground-based data centers?
- A. Lower construction costs
 - B. Ability to process data closer to where it is generated
 - C. Easier maintenance and repair
 - D. Independence from solar power
37. What will Phase 3 of the Space Computing Constellation deployment achieve?

更多学习资源，关注吉井解学公众号

吉大各专业电子教材与学习资源
消息推送(持续更新中)

A. Launch of the first experimental satellite

B. A 30-satellite demonstration network

C. Expansion to 72 satellites

D. Completion of the full 108-satellite constellation

Passage Three

Artemis II: Humanity Returns to the Moon's Vicinity After Half a Century

On April 18, 2026, at 8:37 a.m. EDT, the Space Launch System (SLS)—the most powerful rocket ever built—roared to life at Kennedy Space Center's Launch Complex 39B, carrying the Orion spacecraft and its four-person crew on a journey that would mark humanity's first return to the Moon's vicinity in 54 years. The Artemis II mission, a pivotal milestone in NASA's lunar exploration program, was more than a technological demonstration; it was a statement of renewed human ambition in deep space exploration.

The crew—Commander Reid Wiseman, Pilot Victor Glover, Mission Specialist Christina Koch, and Mission Specialist Jeremy Hansen of the Canadian Space Agency—represented a carefully curated cross-section of experience and symbolism. Glover became the first person of color to travel beyond low Earth orbit, while Koch and Hansen were respectively the first woman and the first Canadian to do so. The crew's composition was widely seen as embodying the program's ethos: that the next era of space exploration belongs to all of humanity.

The mission profile called for a roughly 10-day journey. After a flawless orbital insertion, the Orion spacecraft executed a trans-lunar injection burn that set it on a trajectory toward the Moon. On Day 4, the spacecraft passed behind the Moon, reaching a maximum distance of approximately 10,000 kilometers beyond the lunar far side—farther than any human-rated spacecraft had traveled since Apollo 17. During this period, the crew experienced a complete loss of direct communication with Earth, a planned blackout lasting 34 minutes as the Moon's bulk blocked radio signals. This moment, reminiscent of the Apollo era, served as a stark reminder of the isolation inherent in deep space travel.

The mission, however, was not without its challenges. On Day 3, ground controllers at the Johnson Space Center detected intermittent power fluctuations in the Orion spacecraft's four solar array wings. The anomaly, described by NASA engineers as "minor but concerning," caused voltage dips lasting between 2 and 7 seconds. After 14 hours of intensive diagnostics, the team determined that a software algorithm responsible for managing power distribution was misinterpreting sensor data under specific illumination conditions. A recalibration patch was uploaded and the issue was fully resolved, but the incident underscored the fragility of complex systems operating far from Earth.

Among the mission's most memorable achievements was the first-ever live video broadcast from deep space. On Day 5, as Orion cruised approximately 380,000 kilometers from Earth, the crew transmitted a 22-minute high-definition broadcast that was viewed by an estimated 520 million people worldwide. Commander Wiseman, floating beside the spacecraft's window with the lunar surface visible in the background, remarked: "What you're seeing is not just the Moon. It's a mirror reflecting back what humanity can accomplish when we choose to explore together." The broadcast included a brief conversation between the crew and students from schools in eight countries, amplifying its inspirational reach.

The spacecraft splashed down safely in the Pacific Ocean off the coast of California on April 28, concluding a mission that had traveled 2.3 million kilometers. The success of Artemis II has set the stage for Artemis III, currently targeted for mid-2027, which aims to land the first woman and the next man on the lunar surface near the south pole. Beyond that, NASA envisions the Artemis program as a proving ground for the technologies and operational protocols that will one day carry humans to Mars. In the words of NASA Administrator Bill Nelson at the post-splashdown press conference: "Artemis II did not just revisit the Moon; it built the bridge to our future in the cosmos."

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

38. According to the passage, what historical distinction did the Artemis II crew hold?
- A. Glover was the first astronaut to orbit the Moon
 - B. Koch was the first woman to travel beyond low Earth orbit
 - C. Wiseman was the oldest astronaut to command a lunar mission
 - D. Hansen was the first European to participate in a NASA mission
39. What occurred during the planned communication blackout on Day 4?
- A. The crew temporarily lost life support systems
 - B. The Moon blocked direct radio signals between Orion and Earth for 34 minutes
 - C. The spacecraft entered safe mode due to a software error
 - D. A solar flare disrupted all electronic communications
40. The power fluctuation anomaly on Day 3 was ultimately attributed to:
- A. Physical damage to the solar array wings
 - B. A meteoroid impact on the spacecraft hull
 - C. A software algorithm misinterpreting sensor data under specific illumination conditions
 - D. Insufficient battery capacity for the mission duration
41. Which of the following best describes the significance of the Day 5 live broadcast, according to the passage?
- A. It primarily served to test the spacecraft's communication equipment
 - B. It demonstrated the technical superiority of NASA over other space agencies
 - C. It was viewed by over 500 million people and included a conversation with students from multiple countries
 - D. It revealed classified details about the Artemis program to the public
42. What does NASA Administrator Bill Nelson's statement at the press conference suggest about Artemis II?
- A. The mission was primarily a symbolic gesture with limited practical value
 - B. The mission completed all objectives and achieved nothing beyond expectations
 - C. The mission was a stepping stone toward more ambitious goals, including eventual Mars exploration
 - D. The mission's results made further lunar exploration unnecessary

Part IV Writing(20 points)

Directions: For this part, you are required to write a composition on the topic given below. You should write at least 150 words, and base your composition on the outline below. Write your composition on the Answer Sheet.

Topic: Some people believe that artificial intelligence will eventually replace human creativity. Others argue that AI can only assist but never truly create. Discuss your view on this issue.

Outline:

1. Briefly describe the two opposing views on AI and creativity.
2. State your own position and support it with reasons and/or examples.
3. Conclude your discussion.

You should write at least 150 words.

活政策信息(持续更新中)

吉大研究生英语分级考试 全真模拟卷（二）：消费与社会

(Time Allowed: 120 minutes)

Part I Listening Comprehension (25 points)

Section A (16 points)

Directions: In this section, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A), B), C) and D), and decide which is the best answer.

1. A. The jacket cannot be returned because the color difference is acceptable.
B. The man should return the jacket to the online store by mail.
C. The man qualifies for a return if he meets the stated conditions.
D. The 7-day return policy does not apply to clothing items.
2. A. She finds their marketing tactics manipulative.
B. She admires their innovative promotional strategies.
C. She believes they offer genuine value to consumers.
D. She is indifferent to how they operate.
3. A. The man purchased the face cream and is now regretting it.
B. Livestream hosts are no longer allowed to promote skincare products.
C. New regulations have tightened restrictions on misleading advertising.
D. The woman works as a regulator for the consumer protection agency.
4. A. The phone is worth much more than 800 yuan.
B. Second-hand platforms charge excessive transaction fees.
C. A fraudulent scheme targeting online sellers.
D. The buyer may return a counterfeit phone after purchase.
5. A. The rising cost of cooking oil in supermarkets.
B. A television program that uncovered food safety violations.
C. The health benefits of home-cooked meals.
D. New regulations on processed meat labeling.
6. A. It only applies to electric vehicles.
B. It has contributed to the growth of environmentally friendly consumption.
C. The subsidy rate is uniform across all product categories.
D. Manufacturers are opposed to the policy due to reduced profits.
7. A. Delivery delays during peak shopping seasons.
B. Unauthorized collection of consumer personal information.
C. The rising cost of express delivery services.
D. Disputes between delivery companies and e-commerce platforms.
8. A. They are a safe and responsible way to manage personal finances.
B. Their popularity is declining among young consumers.

- C. They pose significant financial risks despite their apparent convenience.
- D. The central bank has banned them entirely.

Section B (9 marks)

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage One

Questions 9 to 11 are based on the passage you have just heard.

- 9. A. 1.1 billion yuan B. 1.1 trillion yuan
C. 150 billion yuan D. 8 trillion yuan
- 10. A. 200 to 1,000 yuan B. 10% of the purchase price
C. 30,000 yuan D. 8 million yuan
- 11. A. It has eliminated all electronic waste in China.
B. It has reduced air pollution by 38%.
C. It has prevented about 8 million tons of e-waste from landfills.
D. It has completely replaced fossil fuel vehicles.

Passage Two

Questions 12 to 14 are based on the passage you have just heard.

- 12. A. Discount supermarkets were selling products above market price.
B. Expired frozen meat was being chemically treated and resold.
C. Food delivery platforms had raised their commission fees.
D. Blockchain technology was being used to falsify food labels.
- 13. A. 8 B. 12
C. 23 D. 47
- 14. A. A complete ban on all frozen meat products.
B. The permanent cancellation of the 3·15 Gala program.
C. A mandatory blockchain-based food traceability system.
D. The privatization of all food safety inspections.

Passage Three

Questions 15 to 17 are based on the passage you have just heard.

- 15. A. 41% B. 67%
C. 89% D. 214%
- 16. A. 41% B. 64%
C. 89% D. 10%–25%
- 17. A. Consumers are losing interest in sustainable products.
B. The government is reducing support for carbon goals.
C. Companies may engage in misleading environmental claims.
D. Refurbished electronics are inferior in quality to new products.

Part II Cloze (10 points)

Directions: There are a number of blanks in the following passage. For each blank there are four choices marked

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
消息推送(持续更新中)

A), B), C) and D). You should choose ONE that best fits into the passage, Then mark the corresponding letter on the Answer Sheet with a single line through the center.

Rational Consumption in an Age of Consumerism

In an era defined by instant access to goods and carefully engineered marketing strategies, the concept of rational consumption has become both more crucial and more (18)_____ to practice than ever before. Consumerism, the ideology that equates personal happiness with the acquisition of material possessions, has so thoroughly (19)_____ modern culture that resisting its pull requires deliberate, conscious effort.

The psychological mechanisms (20)_____ consumerist behavior are remarkably sophisticated. Companies invest billions in research designed to (21)_____ our deepest insecurities—linking products to social status, romantic success, and self-worth. The dopamine-driven reward cycle triggered by making a purchase is (22)_____ similar to that involved in other behavioral addictions, which explains why so many people report feeling an initial rush followed by emptiness after an unplanned shopping spree.

However, a growing (23)_____ of consumers is actively rejecting this paradigm. The rise of "de-influencing" content on social media, where creators urge followers not to buy certain products, (24)_____ a broader cultural pushback against mindless consumption. Similarly, the minimalist movement, which advocates for owning fewer but better-quality possessions, has (25)_____ significant traction, particularly among urban professionals who have experienced the diminishing returns of material accumulation firsthand.

From an economic (26)_____, rational consumption does not mean abstinence; rather, it entails making purchasing decisions based on genuine need, long-term value, and personal financial health. This approach stands in stark (27)_____ to the consumerist model, which prioritizes volume, novelty, and the perpetual creation of artificial demand.

Part III Reading Comprehension(45 points)

Directions: There are three passages in this part, Each passage is followed by some questions or unfinished statements, For each of them there are four choices marked A), B), C) and D). You should decide on the best choice.

Passage One

China's Trade-In Policy: Stimulus with a Green Twist

In the first half of 2026, China's consumer goods trade-in program demonstrated that economic stimulus and environmental sustainability can indeed go hand in hand. The policy, which offers government subsidies to consumers who replace old products with new, energy-efficient alternatives, generated 1.1 trillion yuan in retail sales—accounting for roughly 4.6% of total retail sales of consumer goods during the period.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

The mechanics are straightforward: consumers bring in used items—be it a ten-year-old refrigerator, a gasoline-powered scooter, or an outdated smartphone—and receive a discount on a qualifying replacement. For major home appliances, the subsidy typically covers 15% of the new product's price, capped at 2,000 yuan per item. The automobile sector sees even more generous terms, with new energy vehicle trade-ins eligible for up to 30,000 yuan in combined central and local subsidies.

The policy's success owes much to its streamlined implementation. Unlike earlier subsidy programs that required consumers to navigate complex paperwork across multiple government departments, the 2026 version integrates the entire process into major e-commerce platforms. Consumers can verify their eligibility, schedule pickup of old items, and claim their subsidy all within a single app. This reduction in "hassle cost," economists note, has dramatically improved participation rates.

Perhaps the most significant, if less immediately visible, achievement lies in the program's environmental dimension. The Ministry of Ecology and Environment estimates that the trade-in program diverted approximately 8 million tons of electronic and household waste from landfills in the first six months of 2026. Traded-in products are routed to over 300 government-certified recycling facilities, where valuable materials—rare earth metals from electronics, steel from appliances, batteries from vehicles—are extracted and returned to the manufacturing supply chain.

Critics, however, point to the program's long-term sustainability. "What happens when the subsidies end?" asks Professor Zhang Wei of Renmin University. "If consumers have been trained to expect 15–20% discounts as the norm, the market may struggle to maintain momentum once government support is withdrawn." Policymakers are reportedly exploring a phased approach to subsidy reduction that would extend through 2028, allowing the market time to adjust.

28. What proportion of total retail sales did the trade-in program account for in the first half of 2026?

- A. 1.1% B. 4.6%
- C. 15% D. 38%

29. According to the passage, what is one key reason for the program's high participation rates?

- A. The subsidies are larger than any previous program.
- B. The application process has been simplified through digital platforms.
- C. Participation is mandatory for all consumers.
- D. The program covers only luxury goods.

30. How many government-certified recycling facilities handle traded-in products?

- A. 8 million B. 2,000
- C. Over 300 D. 1.1 trillion

31. What concern does Professor Zhang Wei raise about the program?

- A. The subsidies are too small to influence consumer behavior.
- B. The environmental benefits have been exaggerated.
- C. The market may become dependent on subsidies.
- D. E-commerce platforms are profiting unfairly from the policy.

32. Which of the following best describes the author's overall assessment of the trade-in program?

- A. Entirely negative, dismissing it as a waste of public funds.
- B. Cautiously positive, acknowledging both achievements and challenges.

更多学习资源，关注吉井解学公众号

持续更新中(持续更新中)

- C. Neutral, presenting only factual data without any evaluation.
- D. Overwhelmingly enthusiastic, ignoring all potential drawbacks.

Passage Two

2026 Spring Festival Consumer Rights Report: When Holiday Demand Meets Market Failure

The 2026 Spring Festival travel and consumption season, which saw a record 2.9 billion passenger trips across China's transportation networks, also produced a troubling surge in consumer complaints that has prompted calls for stronger regulatory intervention in the holiday economy.

According to data released by the China Consumers Association in March 2026, the number of consumer complaints filed during the 40-day Spring Festival period rose 34% compared to the previous year, reaching 1.87 million cases nationwide. Three categories dominated the grievance landscape: transportation services, accommodation, and online event ticketing.

Transportation complaints, accounting for 38% of the total, centered on what many consumers described as a "technological arms race" for tickets. Despite the expansion of railway capacity—an additional 1,200 trains were deployed during peak days—demand vastly outstripped supply on popular routes such as Beijing–Harbin, Shanghai–Chengdu, and Guangzhou–Wuhan. The situation was compounded by the proliferation of third-party "ticket-grabbing" software, which allowed users who paid premium fees to automate the booking process, effectively disadvantaging those attempting to purchase tickets through official channels. The China Railway Corporation acknowledged the issue and announced a technical upgrade to its booking platform, including more sophisticated bot-detection systems, to be completed before the 2027 Spring Festival season.

Accommodation generated the second-largest share of complaints at 29%, with a particularly sharp rise in disputes involving short-term rentals and homestays booked through online platforms. The most common grievance involved "contract cancellation"—hosts unilaterally canceling confirmed bookings weeks or even days before check-in, only to relist the property at rates three to five times the original price. In one well-documented case that circulated widely on social media, a family of six that had booked a courtyard homestay in Dali, Yunnan Province, for 800 yuan per night received a cancellation notice 48 hours before arrival; the same property reappeared on the platform the next day at 3,600 yuan per night. The incident sparked a nationwide debate about platform accountability, with consumer advocates arguing that platforms should bear joint liability for hosts' contractual breaches.

Online event ticketing complaints rose by an extraordinary 156% year-on-year, driven largely by the resurgent concert and performance market. The primary issues included systematic scalping through automated purchasing programs, mysterious "service fees" that could add 30%–50% to the face value of a ticket, and non-transparent allocation of seats despite premium pricing.

33. How many consumer complaints were filed during the 2026 Spring Festival period?
- A. 1.87 billion
 - B. 1.87 million
 - C. 2.9 billion
 - D. 34%
34. What measure did the China Railway Corporation promise to implement?
- A. Reducing the number of trains on popular routes.
 - B. Banning all third-party ticket purchasing software.
 - C. Installing more advanced bot-detection systems on its booking platform.
 - D. Offering free tickets to disadvantaged passengers.
35. The incident involving the Dali homestay is cited in the passage primarily to illustrate:

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

- A. the popularity of Yunnan as a tourist destination.
 - B. the practice of hosts canceling bookings to relist at much higher prices.
 - C. the superior quality of short-term rentals compared to hotels.
 - D. the effectiveness of consumer protection laws in China.
36. What does the passage indicate about third-party ticket-grabbing software?
- A. It has been officially endorsed by the China Railway Corporation.
 - B. It gives an unfair advantage to those who can afford premium fees.
 - C. It has been completely eliminated from the market.
 - D. It is primarily used for purchasing event tickets rather than train tickets.
37. The author's tone throughout the passage can best be described as:
- A. celebratory and optimistic.
 - B. humorous and light-hearted.
 - C. analytical and concerned.
 - D. dismissive and indifferent.

Passage Three

The Green Consumption Revolution:

How Sustainability Is Reshaping Modern Lifestyles—and the Economy That Drives Them

The summer of 2026 may well be remembered as the season when green consumption in China crossed a critical threshold—from a niche preference of the environmentally conscious few to a mainstream force reshaping industries, supply chains, and everyday habits. The numbers tell a compelling story: sales of "China Green Product" certified goods surged 67% year-on-year between June and August; searches for sustainability-related terms on major e-commerce platforms jumped 214%; and the refurbished electronics market expanded by 89% as a new generation of consumers embraced circular economy principles.

Beneath these headline figures lies a more complex and, in many ways, more interesting transformation. What distinguishes the 2026 green consumption wave from earlier, more tentative shifts is not merely its scale but its depth—the degree to which sustainable choices are being integrated into the fabric of daily decision-making rather than treated as occasional, performative gestures.

Consider the changing profile of the green consumer. A 2024 survey by the China Consumers Association found that the typical environmentally conscious shopper was likely to be female, urban, aged 28–40, and relatively affluent. By August 2026, that profile had expanded dramatically. The association's most recent survey of 12,000 respondents across 30 cities found significant growth in green consumption among male consumers (up 23 percentage points), residents of third- and fourth-tier cities (up 31 points), and consumers aged 45–60 (up 18 points). In other words, green consumption was democratizing.

The motivations behind this shift are equally revealing. While environmental concern remains the most cited driver—62% of respondents identified "protecting the planet" as a primary motivation—pragmatic considerations are gaining ground. Forty-seven percent said they chose green products because of perceived health benefits (chemical-free materials, better air quality from energy-efficient appliances), while 41% cited long-term cost savings (lower electricity bills, more durable goods). This convergence of ethical and practical motivations suggests that green consumption is not a temporary trend dependent on moral sentiment but a rational response to tangible benefits.

The economic ripple effects are substantial. China's green product certification system, which covered approximately 8,000 product categories in 2024, expanded to over 14,000 categories by mid-2026. Manufacturers that had initially resisted the costs of certification are now competing aggressively for green credentials, recognizing

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

that the "green premium"—the additional amount consumers will pay for certified sustainable products—can reach 25% in categories such as baby products, cosmetics, and premium home appliances.

Yet the path forward is not without obstacles. The most significant of these is greenwashing: the practice of making unsubstantiated or misleading claims about a product's environmental benefits. In the first eight months of 2026, the State Administration for Market Regulation investigated 2,847 cases of suspected greenwashing, a 76% increase from the same period in 2025. Common tactics included vague claims like "eco-friendly" or "natural" without supporting certification, the use of green-colored packaging to imply environmental benefits where none existed, and selective disclosure—for example, highlighting a single sustainable ingredient while obscuring environmentally harmful manufacturing processes.

Addressing greenwashing will require a multi-pronged approach. Regulators are developing stricter definitions of what constitutes a legitimate green claim, with mandatory third-party verification expected to be phased in by 2028. Consumer education campaigns are teaching shoppers to look beyond marketing language and check for government certification labels. And a growing number of independent watchdog organizations are using artificial intelligence tools to scan product listings at scale, flagging suspicious claims for regulatory review. The green consumption revolution, it seems, is entering its more mature—and more demanding—phase.

38. What does the author mean by saying green consumption "crossed a critical threshold" in summer 2026?
- A. Green products became cheaper than conventional alternatives.
 - B. The government mandated green consumption for all citizens.
 - C. It transitioned from a niche preference to a mainstream phenomenon.
 - D. International organizations recognized China's environmental efforts.
39. Which of the following groups showed significant growth in green consumption between 2024 and 2026, according to the passage?
- A. Female consumers aged 28–40 in first-tier cities.
 - B. Male consumers, residents of smaller cities, and older age groups.
 - C. Only consumers with graduate degrees.
 - D. Exclusively residents of coastal provinces.
40. According to the survey cited in the passage, which of the following is NOT mentioned as a motivation for green consumption?
- A. Protecting the environment.
 - B. Perceived health benefits.
 - C. Long-term cost savings.
 - D. Social pressure from peers and colleagues.
41. The term "greenwashing" as used in the passage refers to:
- A. the physical process of washing products with environmentally safe detergents.
 - B. government subsidies provided to green product manufacturers.
 - C. misleading claims about a product's environmental benefits.
 - D. the practice of recycling packaging materials for reuse.
42. What can be inferred from the passage about the future of green consumption in China?
- A. It will likely decline once government subsidies are withdrawn.
 - B. It is evolving toward a more regulated and mature phase, though challenges like greenwashing persist.

活政策信息(持续更新中)

C. It has already peaked and will plateau at current levels.

D. Consumers will abandon green products due to persistent greenwashing.

Part IV Writing(20 points)

Directions: *For this part, you are required to write an argumentative essay of at least 150 words on the following topic. You should state your position clearly, support your argument with specific reasons and examples, and organize your ideas coherently.*

Topic: Live-streaming shopping has become increasingly popular in China, with billions of yuan in sales generated through platforms like Douyin, Kuaishou, and Taobao Live. However, this new form of commerce has also given rise to widespread problems, including false advertising, exaggerated product claims, and misleading marketing tactics that exploit consumer trust.

Discuss the measures that should be taken—by government regulators, e-commerce platforms, and consumers themselves—to protect consumers in the context of live-streaming shopping.

Your essay should:

1. Identify the key problems associated with live-streaming shopping.
2. Propose specific measures that different stakeholders should take.
3. Conclude with your assessment of how these measures can create a healthier live-streaming commerce environment.

Write at least 150 words.

吉大研究生英语分级考试 全真模拟卷（三）：环境与气候

(Time Allowed: 120 minutes)

Part I Listening Comprehension (25 points)

Section A (16 points)

Directions: In this section, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A), B), C) and D), and decide which is the best answer.

1. A. Wait until the temperature drops before going to the lab.
B. Use public transportation instead of cycling.
C. Check a different weather app for more accurate information.
D. Postpone his lab work to a cooler day.
2. A. The red alert was a false alarm.
B. The speakers will go to the mountains as planned.
C. The mountain trip is likely to be canceled due to safety concerns.
D. Only certain mountain areas remain open to visitors.
3. A. It is milder than previous years due to cooler weather.
B. The high pollen count is linked to warmer winter temperatures.
C. The situation is unique to the man and not a widespread issue.
D. Beijing's pollen count has actually decreased this year.
4. A. Turn off the air conditioner entirely at night.
B. Replace the old air conditioner with a new model.
C. Set the air conditioner to a moderately higher temperature.
D. Use electric fans exclusively instead of air conditioning.
5. A. The aircraft requires mechanical maintenance.
B. There is a thunderstorm along the flight route.
C. Air traffic control is short-staffed.
D. The destination airport is temporarily closed.
6. A. The rising popularity of indoor ice skating facilities.
B. The decline of traditional winter activities due to warming temperatures.
C. Safety regulations for ice skating on natural lakes.
D. The growing cost of organizing winter festivals.
7. A. All business travel has been completely banned.
B. Employees must use high-speed rail for shorter domestic trips.
C. Employees are required to purchase carbon offsets for every flight.
D. The company subsidizes electric vehicle purchases for all staff.
8. A. The type of plastic the container is made of.
B. Whether the container has a recycling symbol printed on it.

更多学习资源，关注吉井解学公众号

吉大各专电教材与学习生
活政策信息(持续更新中)

C. Whether the container is clean and free of food residue.

D. The brand of the takeout restaurant.

Section B (9 marks)

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage One

Questions 9 to 11 are based on the passage you have just heard.

9. A. The highest number of consecutive rainy days in May.
B. The highest May temperature ever recorded in British history.
C. The coldest May since meteorological records began.
D. The largest number of heat-related hospital admissions in a single year.
10. A. 5 days
B. 16 days
C. 19 days
D. 42 days
11. A. A catastrophic flood that submerged agricultural land.
B. A "flash drought" with severe rainfall deficits.
C. A tornado outbreak that destroyed shipping infrastructure.
D. An early frost that damaged the autumn harvest.

Passage Two

Questions 12 to 14 are based on the passage you have just heard.

12. A. A permanent shift in global wind patterns caused by human activity.
B. A climate pattern involving unusual warming of eastern equatorial Pacific waters.
C. A seasonal monsoon system affecting Southeast Asia exclusively.
D. A recently discovered phenomenon with no known causes.
13. A. 0.85°C above average
B. 1.45°C above average
C. 1.9°C above average
D. 3.4°C above average
14. A. It could permanently reverse the global warming trend.
B. It might temporarily push global temperatures past the 1.5°C threshold.
C. It would eliminate all agricultural production in Southeast Asia.
D. It has already caused the collapse of global grain markets.

Passage Three

Questions 15 to 17 are based on the passage you have just heard.

15. A. 1.2%
B. 5.2%
C. 10.5%
D. 67%
16. A. "Low Carbon, High Growth"
B. "Save Energy, Save China"
C. "Green Transition, Shared Future"
D. "Carbon Neutrality by 2030"
17. A. The carbon market was shut down pending regulatory review.
B. Carbon allowance prices dropped below 50 yuan per ton.
C. The building materials and non-ferrous metals sectors were added.
D. Foreign investors were banned from participating in carbon trading.

Part II Cloze (10 points)

Directions: *There are a number of blanks in the following passage. For each blank there are four choices marked A), B), C) and D). You should choose ONE that best fits into the passage, Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

Climate Change and Personal Action: Bridging the Gap Between Awareness and Behavior

Climate change presents one of the greatest (18) _____ that humanity has ever faced. While international negotiations and government policies capture headlines, the role of ordinary individuals in (19) _____ greenhouse gas emissions has become an increasingly prominent topic in environmental discourse.

Research consistently shows a paradox: public awareness of climate change has never been higher — a 2026 Pew Research Center survey found that 78% of people across 19 countries view climate change as a major (20) _____ — yet individual behavior has been slow to change. This gap between environmental attitudes and actual behavior, which psychologists (21) _____ to as the "value-action gap," represents both a challenge and an opportunity for climate advocates.

Several psychological (22) _____ help explain this discrepancy. First, climate change is perceived as a distant threat — temporally, geographically, and psychologically remote — which reduces the (23) _____ of immediate behavioral change. Second, individuals often believe that their personal actions are too (24) _____ to make a meaningful difference, a cognitive distortion known as "eco-paralysis." Third, social norms — the unwritten rules about what constitutes acceptable behavior — can either facilitate or (25) _____ sustainable choices. For instance, if energy conservation is seen as unusual in a community, individuals are less likely to adopt it regardless of their private beliefs.

Addressing these barriers requires a multi-level approach. At the individual level, providing (26) _____ feedback — such as showing households how their energy consumption compares to that of their neighbors — has proven remarkably effective in promoting conservation. At the community level, establishing sustainable behaviors as visible social norms can create positive peer (27) _____. And at the policy level, making sustainable choices the default option — for example, automatically enrolling households in renewable energy plans with an opt-out — can dramatically increase participation rates without requiring sustained motivation.

Passage One

2026: The Year Extreme Weather Became the New Normal

The first eight months of 2026 have delivered a relentless barrage of extreme weather events across six continents, lending urgent weight to climate scientists' warnings that the planetary climate system is entering uncharted territory.

In Europe, the United Kingdom experienced its hottest May day on record when the village of Coningsby in Lincolnshire recorded 35.1°C on May 19 — a temperature more typical of mid-summer in southern Spain than late spring in England. The UK Met Office confirmed that the previous May record of 32.8°C, which had stood since 1922, was exceeded at 14 weather stations across central and eastern England on the same day. The National Health Service reported a 42% increase in heat-related emergency department visits, and rail operators imposed speed restrictions across the network as track temperatures approached 50°C.

The situation in South Asia was far graver. Northern India and Pakistan endured one of the most prolonged and intense heatwaves in recorded history, with the town of Phalodi in Rajasthan reaching 48.2°C on June 3. Delhi recorded 16 consecutive days above 44°C — an unprecedented streak that overwhelmed the city's power grid as demand for air conditioning soared 35% above baseline. Official figures attributed over 1,400 excess deaths to heat-related causes across the region. In Pakistan's Sindh province, the combination of extreme heat and monsoon flooding — a phenomenon scientists term "compound extreme events" — displaced an estimated 800,000 people.

The Americas were not spared. A persistent heat dome over the southwestern United States produced five consecutive days above 47.8°C in Phoenix, Arizona, while the Mississippi River basin suffered a "flash drought" — rainfall deficits exceeding 60% over a six-week period that dried up tributaries, disrupted barge traffic carrying agricultural products, and raised fears of a poor autumn harvest. In South America, Brazil's Amazon region experienced its worst drought in 120 years of record-keeping, with major tributaries including the Rio Negro falling to their lowest levels since measurements began in 1902.

The World Weather Attribution initiative, a collaboration of climate scientists that analyzes the links between extreme weather and climate change, concluded in August 2026 that many of these events would have been "virtually impossible" without human-induced warming.

28. Which of the following best summarizes the main idea of the passage?
- A. Extreme weather events in 2026 were limited to a few specific regions.
 - B. The year 2026 has witnessed widespread and severe extreme weather across multiple continents, with climate change identified as a key contributing factor.
 - C. Governments around the world have successfully contained the impact of extreme weather.
 - D. Extreme weather primarily affected the agricultural sector in Europe.
29. According to the passage, what happened to rail services in the UK during the May heatwave?
- A. All rail services were suspended nationwide.
 - B. Speed restrictions were imposed due to high track temperatures.
 - C. Rail operators offered free travel to cooling centers.
 - D. Train schedules were increased to accommodate more passengers.
30. The passage mentions that 800,000 people were displaced in Pakistan's Sindh province as a result of:
- A. a single catastrophic earthquake.
 - B. political conflict over water resources.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

- C. the combination of extreme heat and monsoon flooding.
D. government-ordered evacuations due to industrial pollution.
31. The passage describes the Mississippi River basin drought as a "flash drought" because:
- A. it was accompanied by frequent lightning storms.
B. it developed very rapidly, with severe rainfall deficits over just six weeks.
C. it ended as suddenly as it began.
D. it was the first drought ever recorded in that region.
32. What conclusion did the World Weather Attribution initiative reach in August 2026?
- A. The extreme weather events were entirely natural and unrelated to climate change.
B. It was impossible to determine any link between the events and climate change.
C. Many of the extreme events would have been "virtually impossible" without human-induced warming.
D. The 2026 events were less severe than those in previous decades.

Passage Two

El Niño 2026: A Climate System in Overdrive — Understanding the Risks and Strengthening Responses

In August 2026, the World Meteorological Organization (WMO) formally confirmed that El Niño conditions had developed in the tropical Pacific, setting the stage for what climate models project as one of the most potent El Niño events in a generation. For a world already grappling with the consequences of 1.45°C of warming above pre-industrial levels, the arrival of a strong El Niño represents not merely an additional weather perturbation but a stress test of the global capacity to anticipate, prepare for, and respond to climate-driven crises.

El Niño — Spanish for "the boy," a reference to the Christ child because the phenomenon was historically observed around Christmas by Peruvian fishermen — is the warm phase of the El Niño–Southern Oscillation (ENSO) cycle. It occurs when trade winds that normally push warm surface waters westward across the Pacific weaken or reverse, allowing a pool of anomalously warm water to accumulate along the equatorial Pacific, particularly off the coast of Peru and Ecuador. This redistribution of ocean heat disrupts atmospheric circulation patterns worldwide, producing what the WMO describes as "a reorganization of global weather."

The 2026 event has developed with alarming speed. By late July, sea surface temperature anomalies in the Niño-3.4 monitoring region — a rectangular area in the central equatorial Pacific considered the canonical ENSO index region — reached 1.9°C above the long-term mean. This reading is significant not only for its magnitude but for its timing: such a strong anomaly has not been recorded at this stage of the development cycle since the 1997–1998 event, which remains the benchmark for extreme El Niño episodes.

The cascading consequences are already being felt. In Southeast Asia, including major rice-producing regions of Thailand and Vietnam, rainfall during the 2026 monsoon season has been 30–40% below average, threatening yields at a time when global food prices are already elevated. Australia's Bureau of Meteorology has warned of heightened bushfire risk for the upcoming Southern Hemisphere summer, drawing uncomfortable parallels to the catastrophic "Black Summer" fires of 2019–2020. In the Horn of Africa — Ethiopia, Somalia, and Kenya — where communities are still recovering from the devastating 2020–2023 drought, the expected shift to above-normal rainfall brings the paradoxical threat of floods and landslides.

Perhaps most concerning is the potential for El Niño 2026 to temporarily push global average temperatures beyond the 1.5°C threshold that the Paris Agreement identified as a critical guardrail. The WMO's August update estimated a 66% likelihood that at least one year between 2026 and 2028 would exceed 1.5°C of warming. Dr. Petteri

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

Taalas, the WMO Secretary-General, cautioned: "This is not to say that the Paris target will be permanently breached — that requires sustained warming over a multi-decade average — but it will provide a glimpse of the world we are trying to avoid."

The El Niño of 2026 thus serves as both a warning and an imperative: a warning that the margin for error in the global climate system is narrowing, and an imperative to accelerate investments in adaptation, early warning systems, and the transition away from fossil fuels before the "glimpse" becomes a permanent reality.

33. What is the primary purpose of the passage?
- A. To provide a historical overview of all recorded El Niño events since the 19th century.
 - B. To argue that the 2026 El Niño is a natural phenomenon with no connection to climate change.
 - C. To explain the nature of El Niño, describe the severity of the 2026 event, and discuss its potential consequences.
 - D. To promote tourism in regions affected by El Niño.
34. According to the passage, what causes El Niño to develop?
- A. An increase in volcanic activity in the Pacific Ocean.
 - B. The weakening or reversal of trade winds that normally push warm water westward across the Pacific.
 - C. The melting of Arctic sea ice during summer months.
 - D. Industrial pollution accumulating in the equatorial atmosphere.
35. The passage compares the 2026 El Niño development to which previous event?
- A. The 1982–1983 El Niño.
 - B. The 1997–1998 El Niño.
 - C. The 2015–2016 El Niño.
 - D. The 2019–2020 Black Summer fires.
36. In the Horn of Africa, the expected impact of El Niño is described as "paradoxical" because:
- A. the region will experience both extreme heat and extreme cold simultaneously.
 - B. after recovering from drought, communities now face the threat of floods and landslides.
 - C. El Niño will benefit agriculture in some parts of the region while harming it in others.
 - D. the region has no historical experience with El Niño-related effects.
37. What did the WMO Secretary-General caution about global temperatures exceeding the 1.5°C threshold?
- A. The threshold has been permanently and irreversibly breached.
 - B. A temporary exceedance would provide a preview of conditions the Paris Agreement seeks to prevent.
 - C. The 1.5°C threshold is scientifically meaningless and should be abandoned.
 - D. Only developing countries will be affected by warming beyond 1.5°C.

Passage Three

Governing Heat in the Anthropocene:

Toward a Global Framework for Coping with Normalized Extremes

If the summer of 2026 has taught the international community anything, it is that the governance structures through which humanity confronts extreme heat are not remotely commensurate with the scale and complexity of the challenge. As temperature records tumbled across six continents — 35.1°C in a British spring, 48.2°C on the Indian plains, 47.8°C in an American desert city — the accumulated evidence made one thing unmistakably clear: what was once "extreme" is rapidly becoming routine, and the policy architecture designed for a cooler, more stable climate is

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

buckling under the strain.

The governance gap reveals itself at multiple levels. At the local level, the most immediate manifestation is inadequate infrastructure. Most of the world's cities were designed and built for the climate of the 20th century, not the climate of the 21st. Urban heat island effects — whereby dense concentrations of concrete, asphalt, and waste heat from buildings and vehicles raise city temperatures 3–8°C above surrounding rural areas — compound the problem. In Delhi, where 16 consecutive days above 44°C overwhelmed emergency services in June 2026, satellite measurements showed that surface temperatures in densely built neighborhoods reached 56°C on the hottest afternoons — conditions under which outdoor labor becomes physiologically impossible and even indoor spaces without active cooling become hazardous. The city had fewer than 200 public cooling centers for a metropolitan population of 33 million.

At the national level, the challenge is one of institutional fragmentation. Heat governance — to the extent that it exists at all — is typically dispersed across health ministries, meteorological agencies, urban planning departments, labor regulators, and emergency management bodies, with little coordination among them. A 2026 review published in the journal *Climate Policy* examined the heat preparedness frameworks of 40 countries and found that only 11 had formally designated "heat officers" with cross-departmental authority, and only seven had established legally enforceable workplace heat standards. In the United States, despite heat being the leading cause of weather-related mortality — exceeding hurricanes, floods, and tornadoes combined — the Occupational Safety and Health Administration had still not promulgated a federal heat standard as of mid-2026, leaving workers in agriculture, construction, and warehousing dependent on the uneven protections offered by a patchwork of state-level rules.

At the international level, the governance vacuum is even more pronounced. Unlike greenhouse gas emissions, which are the subject of a comprehensive (albeit imperfect) multilateral treaty framework in the form of the UN Framework Convention on Climate Change and the Paris Agreement, there exists no equivalent international mechanism dedicated to heat adaptation and resilience. The Sendai Framework for Disaster Risk Reduction offers some guidance, but its treatment of extreme heat is cursory at best. The UN Secretary-General's July 2026 call for a "Global Heat Action Agenda" — including universal access to early warning systems, standardized heat-health protocols, and dedicated financing for urban cooling infrastructure in developing countries — represents one of the first serious efforts to address this institutional deficit, but whether member states will translate rhetoric into binding commitments remains uncertain.

The path forward demands a fundamental reconceptualization. Extreme heat can no longer be treated as an exceptional circumstance to be managed with ad hoc measures — opening cooling centers when temperatures spike, issuing warnings when danger has already arrived. Instead, it must be embedded into the permanent fabric of governance: building codes that mandate passive cooling design, urban planning that prioritizes green spaces and reflective surfaces, labor laws that recognize heat as an occupational hazard, and international financing mechanisms that recognize heat resilience as a global public good. The summer of 2026 will not be the last of its kind. Whether it serves as a catalyst for systemic reform or merely another data point in a worsening trajectory depends on the choices governments make in its aftermath.

38. The author's central argument in this passage is that:

A. extreme heat is an unavoidable natural phenomenon requiring no policy response.

B. existing governance structures are inadequate to address the growing challenge of extreme heat, and systemic reform is urgently needed.

吉大各专业电子教材与学习资源
海量信息(持续更新中)

- C. technological solutions alone can solve the heat crisis without any policy changes.
D. developing countries are solely responsible for addressing heat-related challenges.
39. According to the passage, the urban heat island effect can raise city temperatures above surrounding rural areas by:
- A. 1–2°C
B. 3–8°C
C. 16–20°C
D. 44–48°C
40. The review of 40 countries' heat preparedness frameworks, published in *Climate Policy*, found that:
- A. all 40 countries had comprehensive heat governance systems in place.
B. only 11 countries had formally designated "heat officers" with cross-departmental authority.
C. heat-related mortality had been eliminated in all surveyed countries.
D. developing countries had stronger heat protections than developed ones.
41. The passage notes that as of mid-2026, the United States had:
- A. implemented the world's most stringent federal heat standard.
B. established heat as the least significant weather-related cause of death.
C. not yet issued a federal workplace heat standard, despite heat being the leading cause of weather-related mortality.
D. transferred all heat governance responsibilities to individual workers.
42. The author's tone in the final paragraph can best be characterized as:
- A. complacent and dismissive, suggesting that the heat problem will resolve itself naturally.
B. cautiously hopeful but urgent, emphasizing that systemic reform is necessary and that the window for action is open but narrowing.
C. purely celebratory, praising all governments for their excellent heat governance records.
D. sarcastic and mocking, ridiculing all attempts at international cooperation on climate issues.

Part IV Writing(20 points)

Directions: For this part, you are required to write an argumentative essay of at least 150 words on the following topic. You should state your position clearly, support your argument with specific reasons and examples, and organize your ideas coherently.

Topic: Climate change is often discussed at the global level — international summits, government pledges, and corporate commitments dominate the headlines. However, individual actions also matter. What can ordinary people do in their daily lives to help combat climate change?

Your essay should:

1. Explain why individual actions are important in addressing climate change, even though the problem is global in scale.
2. Describe at least three specific actions that ordinary people can take in their daily lives to reduce their carbon footprint.
3. Conclude with your assessment of the collective impact these individual actions can have.

Write at least 150 words.

吉大研究生英语分级考试 全真模拟卷（四）：健康与心理

(Time Allowed: 120 minutes)

Part I Listening Comprehension (25 points)

Section A (16 points)

Directions: In this section, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A), B), C) and D), and decide which is the best answer.

1. A. Call Dr. Wang's office directly to request a special appointment.
B. Log into the booking system at 7:00 a.m. when new slots are released.
C. Switch to a different hospital in a neighboring city.
D. Give up on seeing a cardiologist and consult a general practitioner.
2. A. Start taking antihypertensive medication immediately.
B. Undergo emergency surgery to prevent further complications.
C. Adopt lifestyle modifications and monitor his blood pressure at home.
D. Ignore the results since he is still young and healthy.
3. A. It is an outright marketing scam with no real benefits.
B. It reflects a national initiative and has some scientific backing.
C. The study from Shanghai Jiao Tong University found no improvement in anxiety.
D. The price of 299 yuan is significantly higher than the national average.
4. A. It is the most scientifically supported diet for mental health.
B. Long-term evidence favors the Mediterranean and traditional Chinese dietary patterns.
C. The BMJ review found keto to be dangerous and recommended banning it.
D. The traditional Chinese diet is primarily based on dairy products.
5. A. Use a blue-light filter app on his phone while scrolling.
B. Keep the phone out of the bedroom and read a physical book before sleep.
C. Take melatonin supplements every night before bed.
D. Stay up later so that he falls asleep more quickly.
6. A. Free vaccination is available for women up to age 26, and some cities now include young men.
B. The vaccine is only recommended for teenage girls aged 13–15.
C. The program has been suspended due to safety concerns.
D. Only private hospitals offer the HPV vaccine at full cost.
7. A. Take a leave of absence from his research program.
B. Visit the campus counseling center for at least one session.
C. Discuss his problems with his academic supervisor first.
D. Wait a few more weeks to see if his mood improves naturally.
8. A. It is a privately-run weight loss program that charges high fees.
B. It is part of the 2026 national health services package and offers free counseling and exercise programs.

- C. It focuses exclusively on underweight individuals who need to gain weight.
- D. It requires all participants to undergo bariatric surgery.

Section B (9 marks)

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage One

Questions 9 to 11 are based on the passage you have just heard.

- 9. A. One psychologist for every 10,000 people B. One psychologist for every 15,000 people
C. One psychologist for every 35,000 people D. One psychologist for every 50,000 people
- 10. A. 67% B. 77%
C. 87% D. 97%
- 11. A. Competitive replacement B. Collaborative intelligence
C. Automated psychotherapy D. Digital substitution

Passage Two

Questions 12 to 14 are based on the passage you have just heard.

- 12. A. Approximately 200,000 yuan B. Approximately 48,000 yuan
C. Approximately 4,800 yuan D. Approximately 480 yuan
- 13. A. Approximately 67% B. Approximately 78%
C. Approximately 80% D. Approximately 87%
- 14. A. As a replacement for all psychiatric diagnosis
B. As a "blood pressure cuff for mental health" — a screening tool
C. As a treatment device that directly cures depression
D. As a research instrument unsuitable for clinical use

Passage Three

Questions 15 to 17 are based on the passage you have just heard.

- 15. A. One station for every 10,000 residents B. One station for every 50,000 residents
C. One station for every 100,000 residents D. One station in every residential compound
- 16. A. 5,000 B. 18,000
C. 30,000 D. 47,000
- 17. A. Approximately 20% B. Approximately 35%
C. More than 50% D. Nearly 75%

Part II Cloze (10 points)

Directions: There are a number of blanks in the following passage. For each blank there are four choices marked A), B), C) and D). You should choose ONE that best fits into the passage. Then mark the corresponding letter on the Answer Sheet with a single line through the center.

Exercise and Mental Health:

The Science Behind the Mind-Body Connection

For decades, the medical establishment treated physical health and mental health as if they occupied entirely separate domains — a (18)_____ that contemporary neuroscience has shown to be not only artificial but deeply

更多学习资源，关注吉井解学公众号

活政策信息(持续更新中)

counterproductive. A (19)_____ body of evidence now demonstrates that regular physical activity is among the most effective interventions available for both preventing and (20)_____ symptoms of depression, anxiety, and stress-related disorders.

At the biological level, exercise exerts its effects through multiple pathways. Physical activity stimulates the release of endorphins, serotonin, and dopamine — neurotransmitters that (21)_____ mood, pleasure, and motivation. Equally important, regular exercise (22)_____ the body's cortisol response to stress, meaning that physically active individuals show a significantly smaller stress-hormone spike when faced with psychological challenges compared to their (23)_____ counterparts. Over time, chronic stress — when left unchecked — can (24)_____ depressive symptoms, potentially pushing someone from a state of mild (25)_____ into a full-blown major depressive episode.

The psychological benefits of exercise are equally profound. Physical activity provides a sense of mastery and self-efficacy that can counteract the feelings of helplessness and (26)_____ that characterize depression. Group exercise, in particular, combines the biochemical benefits of physical activity with social connection, directly addressing the social withdrawal and isolation that frequently accompany mood disorders. For some patients, this dual effect is powerful enough to (27)_____ the need for medication — not by masking symptoms but by addressing their underlying biochemical and psychosocial roots.

Despite this evidence, fewer than 15% of mental health practitioners routinely incorporate exercise into their treatment plans. Bridging this gap between research and clinical practice represents one of the most promising frontiers in contemporary mental health care.

| 26. A. oppression | B. repression | C. expression | D. aggression |
| 27. A. elevate | B. relegate | C. deliberate | D. alleviate |

Part III Reading Comprehension(45 points)

Directions: *There are three passages in this part, Each passage is followed by some questions or unfinished statements, For each of them there are four choices marked A), B), C) and D). You should decide on the best choice.*

Passage One

AI-Powered Digital Technologies Become a New Engine for Mental Health Services in China

In March 2026, the Third National Social Psychological Service Innovation and Development Conference convened in Beijing, drawing over 2,000 experts under the banner "AI + Internet + Psychological Services." The conference marked a pivotal moment in China's response to what the WHO has labeled a "global mental health crisis" — one that the pandemic both deepened and thrust into public consciousness.

The statistics are stark. The China Mental Health Survey found that approximately 18.5% of Chinese adults — nearly 200 million people — experienced a diagnosable mental health condition in the preceding year, yet fewer than

更多学习资源，关注吉井解学公众号

吉大各专业电子教材与学习生
活政策信息(持续更新中)

15% received professional care. The bottleneck is structural: China has roughly 40,000 licensed clinical psychologists, yielding a ratio of one per 35,000 citizens. At this capacity, most people who need help simply cannot access it through conventional channels.

AI-based solutions are emerging to fill this gap. Several platforms demonstrated at the conference showed that large language models, trained on clinical datasets and supervised by experienced therapists, can conduct initial screening interviews with accuracy approaching that of junior clinicians. A system developed at Tsinghua University — already deployed in 12 provinces — had processed 2.3 million consultations by March 2026, identifying 87% of cases requiring professional intervention while providing evidence-based self-help resources to those with milder symptoms.

Crucially, developers and clinicians alike emphasize that AI is not positioned as a replacement for human therapists. "The therapeutic alliance — the trust-based relationship between therapist and client — remains the single strongest predictor of treatment outcomes across all modalities of psychotherapy," noted Dr. Li Xiaoming, the conference chair. "AI can manage the front door — screening, triage, and psychoeducation — but the deepest healing still requires genuine human presence."

The conference also addressed ethical guardrails. Participants called for mandatory transparency when users interact with AI systems, explicit informed consent for data collection, and a national accreditation framework for AI-based mental health tools. By the conclusion, 14 provinces had announced plans to integrate AI mental health screening into primary care systems by 2027 — a development that, if realized, would represent one of the world's largest deployments of AI in public mental health.

28. According to the passage, approximately what percentage of Chinese adults with mental health conditions receive professional care?

- A. 18.5%
- B. 87%
- C. Fewer than 15%
- D. More than 30%

29. The Tsinghua University AI system is primarily designed to:

- A. Replace human therapists in long-term psychotherapy.
- B. Prescribe psychiatric medication to patients with severe disorders.
- C. Conduct initial screening and provide self-help resources for mild cases while triaging serious ones to professionals.
- D. Train new clinical psychologists through automated online coursework.

30. According to Dr. Li Xiaoming, what is the single strongest predictor of successful psychotherapy outcomes?

- A. The sophistication and accuracy of the AI technology employed.
- B. The duration and frequency of each therapy session.
- C. The trust-based therapeutic relationship between therapist and client.
- D. The cost of treatment and extent of insurance coverage.

31. Which of the following ethical safeguards was NOT mentioned as being discussed at the conference?

- A. Mandatory transparency about AI interaction.
- B. Explicit informed consent for data collection.
- C. A national accreditation framework for AI mental health tools.
- D. Mandatory government subsidies for all AI therapy users.

32. What commitment did 14 provinces make by the end of the conference?

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

- A. To ban AI from all mental health settings within five years.
- B. To integrate AI mental health screening into primary care by 2027.
- C. To double the number of clinical psychologists within one year.
- D. To fully privatize mental health services across their jurisdictions.

Passage Two

Non-Pharmacological Interventions Become New Frontiers in Mental Illness Treatment: From Eye-Tracking Glasses to Digital Therapeutics

In June 2026, Science and Technology Daily published a comprehensive feature on the rapidly evolving landscape of non-pharmacological interventions for mental illness — a field that, until recently, was relegated to the margins of mainstream psychiatric practice. The report detailed several homegrown innovations that are reshaping how mental health conditions are detected, monitored, and treated in China.

The most eye-catching of these is a domestically produced eye-tracking system developed through a collaboration between the Chinese Academy of Sciences' Institute of Psychology and a Hangzhou-based medical technology firm. The device takes the form of lightweight glasses embedded with infrared cameras that capture three categories of ocular data in real time: fixation duration (how long the eyes dwell on emotionally charged images), saccade velocity (the speed at which the eyes move between focal points), and pupil dilation in response to affective stimuli. Machine learning algorithms compare these biometric signatures against a clinical database of over 8,000 diagnosed cases to compute a risk profile.

What distinguishes this iteration from earlier research-grade systems is its radical affordability. Whereas laboratory eye-tracking equipment historically cost upwards of 200,000 yuan per unit — confining it to well-funded academic institutions — the domestically manufactured glasses have driven the price down to approximately 4,800 yuan, roughly the cost of a mid-range smartphone. In clinical trials spanning five hospitals and 1,200 participants, the system achieved a screening accuracy of approximately 80% for major depressive disorder and 78% for generalized anxiety disorder. While these figures fall short of the diagnostic precision achievable through comprehensive psychiatric assessment, they are sufficient for large-scale population screening — the mental health equivalent of a blood pressure check at a community clinic.

The article also profiled the burgeoning field of digital therapeutics — software-based interventions that deliver clinically validated treatment protocols through smartphones. A platform developed by Peking University researchers, which delivers cognitive behavioral therapy through structured interactive modules, demonstrated a 34% reduction in depression scores among users who completed a 12-week program in a randomized controlled trial of 3,600 participants. The National Medical Products Administration granted the platform a digital therapeutics registration certificate in February 2026 — one of the first such approvals in China — signaling a regulatory pathway for software as medicine.

Experts interviewed for the report were careful to temper enthusiasm with caution. The 80% accuracy of the eye-tracking glasses, while impressive for a screening tool, still produces both false positives (pathologizing normal emotional variation) and false negatives (missing genuine cases). And digital therapeutics, however well-designed, cannot replicate the motivating presence of a skilled therapist who can adapt treatment in real time to a patient's shifting needs. The consensus: these technologies are powerful adjuncts to, not substitutes for, human-delivered care.

33. According to the passage, what is the approximate price of the domestically produced eye-tracking glasses?

- A. Approximately 200,000 yuan
- B. Approximately 20,000 yuan

- ### Passage Three

The 2026 sessions of the National People's Congress (NPC) and the Chinese People's Political Consultative Conference (CPPCC) — the so-called "Two Sessions" that constitute the nation's most consequential annual political gathering — devoted unprecedented deliberative attention to health policy. Yet what distinguished the 2026 discussions from those of previous years was not merely the quantum of attention but its conceptual breadth: health was debated not as a circumscribed medical-technical matter but as a multidimensional phenomenon encompassing mental well-being, geriatric care, preventive medicine, and the socioeconomic determinants that predicate who languishes in illness and who thrives. Of the 487 NPC proposals submitted on health-related subjects, 156 specifically addressed mental health — more than double the tally from the 2024 sessions and a testament to the issue's precipitous ascent on the public agenda.

The mental health predicament among youth constituted the most recurrent and emotionally charged sub-theme. Data from the Chinese Academy of Sciences' 2025 National Mental Health Survey, cited extensively in NPC deliberations, indicated that 26.4% of university students reported symptoms consonant with moderate to severe anxiety, while 21.8% screened positive for clinical depression — figures that have risen by 5 to 7 percentage points since 2019. The etiology, as delineated by delegates and expert witnesses, is multifactorial and synergistic: ferocious academic and employment competition in a labor market where the youth unemployment rate, though receding from its 2023 peak, remained at 14.2% in early 2026; the pernicious ubiquity of algorithmically curated social media, which a burgeoning corpus of research implicates in heightened social comparison, body-image dysphoria, and circadian rhythm disruption; and a demographic architecture in which many young people, raised as singletons under the now-superseded one-child policy, absorb the undiluted weight of parental aspirations without the emotional

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

ballast that siblings can provide.

The policy rejoinders articulated during the Two Sessions evinced a growing cognizance that incremental, siloed interventions are constitutionally inadequate. A cross-committee consortium of NPC deputies from the education, health, and labor portfolios jointly tabled the "Youth Mental Health Systemic Intervention Framework," an omnibus proposal mandating: universal mental health screening at three educational inflection points (matriculation to middle school, high school, and university); the appointment of full-time licensed psychologists in every school enrolling more than 500 students; the curricular integration of social-emotional learning; and — in a particularly salient acknowledgment of the structural dimensions of distress — labor market reforms to curtail the "996" work culture (9 a.m. to 9 p.m., six days a week) that perpetuates chronic stress among young professionals.

Population aging constituted the second major thematic axis, with the nexus between geriatric care and mental health articulated with a specificity unprecedented in previous sessions. China's sexagenarian-and-above demographic swelled to 310 million in 2025 — 22% of the population — and is projected to surpass 400 million by 2035. NPC delegates noted that depression afflicts an estimated 23% of older adults living in solitary households, and that social isolation has been identified as a risk factor for cognitive decline comparable in magnitude to physical inactivity and tobacco consumption. The "Silver Hair Mental Health Initiative," promulgated during the sessions, allocated 8.5 billion yuan to community-based programs integrating physical activity, cognitive training, and social engagement — a tacit acknowledgment that psychological well-being in senescence is inextricable from social connection and existential purpose.

A third, cross-cutting leitmotif was health equity. CPPCC members from predominantly rural provinces adduced data demonstrating that access to mental health services in rural counties was less than one-tenth the level prevailing in metropolitan centers. The psychiatrist-to-population ratio in Gansu and Guizhou provinces languished at approximately 1 per 200,000 — a twenty-fold disparity compared with Shanghai or Beijing. The "Rural Mental Health Talent Pipeline," a collaborative undertaking of the Ministries of Health and Education, proposed fully subsidized medical education for students from rural backgrounds who commit to returning to practice in their natal counties, with the objective of stationing at least one mental health professional in each rural township health center by 2030.

The enduring significance of the 2026 Two Sessions' health deliberations resides not in any discrete policy pronouncement but in the paradigmatic reorientation they portended: from health conceptualized as the absence of pathology to health as a state of holistic physical, psychological, and social flourishing; from health care as a series of episodic, reactive interventions to health as an emergent property of systemic social and economic conditions; and from health policy as a technocratic backwater to health as a cardinal metric of developmental legitimacy. Whether this conceptual metamorphosis will translate into sustained fiscal commitment and durable institutional reform remains an open question — but the 2026 Two Sessions rendered it incontrovertible that the question is now ineluctably on the table.

38. According to the passage, how many NPC proposals on health-related topics specifically addressed mental health?

- | | |
|--------|--------|
| A. 26 | B. 156 |
| C. 487 | D. 310 |

39. The passage cites data indicating what percentage of university students screened positive for clinical depression?

- | | |
|----------|----------|
| A. 14.2% | B. 21.8% |
|----------|----------|

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

C. 23.0%

D. 26.4%

40. Which of the following is NOT identified as a contributing factor to mental health problems among young people?

- A. Intense academic and employment pressure in a competitive labor market.
- B. The pervasive influence of algorithmically curated social media.
- C. The emotional burden of being an only child bearing full parental expectations.
- D. A genetic predisposition that has intensified in recent generations.

41. The term "996" work culture, as referenced in the passage, refers to:

- A. A government-mandated productivity standard for state-owned enterprises.
- B. Working from 9 a.m. to 9 p.m., six days a week, which contributes to chronic stress.
- C. A public health campaign encouraging 9 hours of sleep, 9 hours of work, and 6 hours of leisure.
- D. A psychological intervention protocol involving 9 sessions over 6 weeks.

42. The psychiatrist-to-population ratio in Gansu and Guizhou provinces is described as approximately:

- A. 1 per 10,000
- B. 1 per 35,000
- C. 1 per 100,000
- D. 1 per 200,000

Part IV Writing(20 points)

Directions: For this part, you are required to write an argumentative essay of at least 150 words on the following topic. You should state your position clearly, support your argument with specific reasons and examples, and organize your ideas coherently.

Topic: In recent years, mental health issues among young people have become increasingly prominent. Anxiety, depression, and burnout affect a growing number of adolescents and young adults across the globe, and China is no exception. What do you think are the main causes of this phenomenon, and what can be done — by individuals, families, schools, and society — to address this problem?

Your essay should:

1. Identify and explain at least two major causes of mental health problems among young people today.
2. Propose specific measures that different stakeholders can take to address these causes.
3. Conclude with your assessment of what is most urgently needed to improve youth mental health.

Write at least 150 words.

吉大研究生入学英语分级考试 全真模拟卷（五）：文体与国际

(Time Allowed: 120 minutes)

Part I Listening Comprehension (25 points)

Section A (16 points)

Directions: In this section, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A), B), C) and D), and decide which is the best answer.

1. A. Give up on attending the World Cup entirely.
B. Book his flights through a travel agency instead of online.
C. Fly to an alternative city and connect domestically to save money.
D. Postpone his trip until after the World Cup ends.
2. A. The difficulty of balancing work and entertainment.
B. A spectacular goal scored in a football match.
C. The goalkeeper's poor performance throughout the season.
D. The increasing influence of social media on sports broadcasting.
3. A. The technical difficulty of the triple axel.
B. The Italian skater's personal best score.
C. The display of sportsmanship between competitors.
D. The fact that the competition lasted for decades.
4. A. Its use of advanced special effects.
B. The director's reputation and star-studded cast.
C. Its genuine and heartfelt storytelling.
D. An aggressive marketing campaign by the studio.
5. A. It is permanently closed to the public after the Games.
B. Tourist visits are available but require advance reservation.
C. Only professional athletes are allowed on the bobsled track.
D. The venue will be demolished before summer begins.
6. A. All 20 million applicants received at least one ticket.
B. Canada is hosting more matches than the United States.
C. Demand far exceeds supply, and FIFA has implemented resale price controls.
D. Tickets are only available to residents of the host countries.
7. A. They are limited to the opening ceremony in Mexico City.
B. Only local artists from host nations will perform.
C. Cultural performances are planned across all 16 host cities.
D. The K-pop performance has been cancelled due to scheduling conflicts.
8. A. The village is not as beautiful as it appears in the film.
B. The local government has banned tourists from entering.

吉大各专业课教材与学习生
活政策信息(持续更新中)

- C. Overwhelming tourist numbers have strained the village's capacity.
- D. The ancient banyan tree has been removed for safety reasons.

Section B (9 marks)

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage One

Questions 9 to 11 are based on the passage you have just heard.

- 9. How many teams will participate in the 2026 FIFA World Cup?
 - A. 16
 - B. 32
 - C. 48
 - D. 104
- 10. Which stadium will host the opening match of the tournament?
 - A. MetLife Stadium in New Jersey
 - B. Estadio Azteca in Mexico City
 - C. BMO Field in Toronto
 - D. SoFi Stadium in Los Angeles
- 11. According to the passage, what is special about Estadio Azteca?
 - A. It is the largest stadium in North America.
 - B. It will host the final match of the 2026 World Cup.
 - C. It will become the first stadium to host World Cup matches in three different tournaments.
 - D. It was built specifically for the 2026 World Cup.

Passage Two

Questions 12 to 14 are based on the passage you have just heard.

- 12. What was a distinctive organizational feature of Milano-Cortina 2026?
 - A. All events were held within a single city.
 - B. The Games were spread across multiple venue clusters in northern Italy.
 - C. Only summer sports were included in the program.
 - D. Spectators were not allowed at any competition venues.
- 13. According to the passage, what was achieved in terms of gender equality at these Games?
 - A. Equal numbers of male and female athletes for the first time.
 - B. Female athletes outnumbered male athletes.
 - C. Women accounted for 47% of participants — the highest in Winter Olympics history.
 - D. Women were allowed to compete in all events for the first time.
- 14. How did the organizers address sustainability concerns?
 - A. By relocating all events to a single environmentally certified venue.
 - B. By using 93% existing or temporary venues to reduce environmental impact.
 - C. By banning all spectator travel to the Games.
 - D. By eliminating all winter sports that required artificial snow.

Passage Three

Questions 15 to 17 are based on the passage you have just heard.

- 15. What is the film "A Love Letter to Grandma" about?
 - A. A grandmother's journey to find love in her old age.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

- B. A young professional reconnecting with his grandmother and rural roots.
C. A documentary about traditional Chinese cooking techniques.
D. A historical epic set in Ming-dynasty Fujian Province.
16. How did the film affect tourism at its filming location?
A. Daily visitors increased from about 300 to over 8,000.
B. The village was closed to the public to preserve its heritage.
C. Tourism revenue decreased because the village became too crowded.
D. Only film industry professionals were allowed to visit.
17. According to the passage, what distinguishes this "film + cultural tourism" model from short-lived social media tourism trends?
A. The involvement of the central government in promotion.
B. The use of advanced digital marketing techniques.
C. The deep emotional connection the film created between audiences and the location.
D. The substantially higher ticket prices charged at the filming location.

Part II Cloze (10 points)

Directions: *There are a number of blanks in the following passage. For each blank there are four choices marked A), B), C) and D). You should choose ONE that best fits into the passage, Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

Cross-Cultural Communication and Understanding in an Interconnected World

In an era of unprecedented global connectivity, the ability to communicate effectively across cultural boundaries has become not merely an advantage but a (18)_____. As businesses expand across continents, universities attract international students in record numbers, and digital platforms erase geographical (19), individuals who possess intercultural competence find themselves uniquely positioned to thrive.

Yet cross-cultural communication remains (20)_____ with challenges. Language barriers represent only the most visible obstacle. Far more (21)_____ are the invisible dimensions of culture: the unspoken assumptions about hierarchy and authority, the differing conceptions of time and punctuality, the (22)_____ norms governing emotional expression and physical proximity. What constitutes a respectful gesture in one culture may be (23)_____ as rude or aggressive in another, and such misunderstandings can derail negotiations, damage relationships, and (24)_____ opportunities that might otherwise have flourished.

Scholars in the field distinguish between cultural awareness — the superficial recognition that cultural differences exist — and cultural intelligence, or "CQ," which (25)_____ the capacity to adapt one's behavior appropriately across diverse cultural contexts. Developing CQ requires more than memorizing a checklist of cultural dos and don'ts; it demands genuine curiosity about other ways of thinking and living, a willingness to (26)_____ one's own cultural assumptions, and the humility to learn from inevitable missteps.

International sporting events, global academic conferences, and cross-border artistic collaborations all serve as powerful (27)_____ for intercultural exchange. They create shared experiences that transcend linguistic and cultural divides, reminding participants of their common humanity while celebrating their diversity. In a world often fractured by misunderstanding and mistrust, these moments of genuine cross-cultural connection are not luxuries — they are necessities.

18. A. necessity B. necessity's C. necessarily D. necessitate

- | | | | | |
|-----|----------------|-----------------|-----------------|------------------|
| 19. | A. distances | B. distinctions | C. distractions | D. distributions |
| 20. | A. fraught | B. freight | C. fought | D. fracture |
| 21. | A. subtle | B. subtlety | C. subsequent | D. subsidiary |
| 22. | A. nuanced | B. numerous | C. notorious | D. nutritional |
| 23. | A. interpreted | B. interrupted | C. interrogated | D. integrated |
| 24. | A. squander | B. surrender | C. surround | D. surpass |
| 25. | A. denotes | B. detonates | C. detaches | D. deteriorates |
| 26. | A. interrogate | B. integrate | C. interject | D. intercept |
| 27. | A. catalysts | B. catastrophes | C. catalogues | D. categories |

Directions: *There are three passages in this part. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice.*

2026: The Year the World Watched — A Super Sports Season

The year began with the Milano-Cortina Winter Olympics in February, which drew a cumulative global television audience of 2.8 billion viewers across 16 days of competition. Italy leveraged the Games to showcase its northern regions, with the Lombardy and Veneto tourism boards reporting a 34% increase in international arrivals during the first quarter compared to 2025.

Only four months later, attention shifted across the Atlantic. The 2026 FIFA World Cup kicked off on June 11, spanning 16 cities across the United States, Canada, and Mexico. With 48 teams — up from the traditional 32 — and 104 matches, it was the largest World Cup ever staged. FIFA projected a combined in-stadium attendance of 5.8 million and a global broadcast audience exceeding 5 billion. The host nations poured an estimated \$6.2 billion into infrastructure upgrades, including stadium renovations, airport expansions, and public transit improvements.

Sandwiched between these two giants was an event of immense regional significance: the 2026 Asian Games in Aichi-Nagoya, Japan, scheduled for September 19 to October 4. While smaller in global profile than the Olympics or World Cup, the Asian Games represented a critical milestone for Japan, marking the country's first time hosting the event since Hiroshima in 1994. With 42 nations participating across 40 sports, including the debut of esports as a full medal event, the Aichi-Nagoya Games were projected to generate ¥540 billion (\$3.6 billion) in economic activity for the Chubu region.

The convergence of these three mega-events in a single calendar year has no precedent. Analysts at Deloitte's Sports Business Group estimated that the combined economic impact of the 2026 Winter Olympics, World Cup, and Asian Games would reach \$18.5 billion across host nations — a figure that dwarfs any previous sports year. However, the clustering of events also raised questions about bidding competition for future cycles, athlete welfare amid compressed qualification schedules, and the environmental sustainability of a model that demands ever-larger investments from host cities and nations.

28. According to the passage, what was the cumulative global TV audience for the Milano-Cortina Winter Olympics?
- A. 2.8 million
B. 2.8 billion

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

- C. 5.0 billion
D. 5.8 million
29. How many teams participated in the 2026 FIFA World Cup?
A. 16
B. 32
C. 42
D. 48
30. According to the passage, what was notable about the Aichi-Nagoya Asian Games?
A. They were the first Asian Games to be held in summer.
B. They marked Japan's first time hosting the event since 1994.
C. They featured more sports than the Winter Olympics.
D. They generated more economic activity than the World Cup.
31. What did Deloitte's Sports Business Group estimate as the combined economic impact of the three mega-events?
A. \$3.6 billion
B. \$6.2 billion
C. \$18.5 billion
D. ¥540 billion
32. What concern does the passage raise about the clustering of major sporting events in 2026?
A. That the events will attract too few international visitors.
B. That Japan will withdraw from hosting future competitions.
C. That the model raises questions about sustainability and athlete welfare.
D. That FIFA and the IOC will merge into a single organization.

Passage Two

From Screen to Street: How "A Love Letter to Grandma" Rewrote the Rules of Film-Driven Cultural Tourism in China

When director Chen Yuning wrapped filming on "A Love Letter to Grandma" in late 2025, the production's total budget stood at 48 million yuan — a modest figure by contemporary Chinese cinema standards, where blockbusters routinely exceed 300 million yuan in production costs alone. No one involved in the project anticipated what would unfold in the summer of 2026.

The film was released on June 12, 2026, and by its sixth weekend, it had accumulated 1.52 billion yuan in box office receipts, making it the highest-grossing non-franchise, non-animated Chinese film of the year. But the numbers that truly astonished industry observers were not on the balance sheets of cinema chains — they were on the ledgers of village guesthouses, rural restaurants, and local transport operators in a corner of Fujian Province that had, until then, been largely absent from tourist maps.

The village of Shicuo, where the film was shot, received an average of 300 visitors per day in May 2026. By July, the daily count had surged to 8,200, peaking at 14,000 on weekends. The local government's tourism bureau reported that the county's total tourism revenue for the June–August quarter reached ¥2.1 billion — a 198% increase from ¥705 million in the same period of 2025. The number of registered homestays in the county grew from 47 to 186 within three months, and the average nightly rate rose from ¥180 to ¥520.

What made this case distinctive was not the scale of the tourism surge — social media platforms have periodically fueled similar booms for photogenic locations — but its apparent durability. Unlike the "check-in" tourism driven by short-video platforms, where visitors arrive, take photographs for social media, and depart within hours, the visitors drawn by "A Love Letter to Grandma" tended to stay longer and spend more. A survey by the Fujian Provincial Department of Culture and Tourism found that 63% of film-motivated visitors stayed at least two nights, and 71% reported that emotional engagement with the film's story — rather than the aesthetic appeal of the

The commercial ecosystem that emerged around the film extended well beyond tourism. A line of licensed kitchenware inspired by the grandmother character's cooking scenes generated ¥340 million in sales. The film's soundtrack, featuring traditional Fujianese folk melodies reinterpreted by a contemporary composer, spent eight weeks at number one on China's music streaming charts. And in a sign of the model's replicability, by October 2026, provincial governments in Yunnan, Guizhou, and Sichuan had each announced incentive programs offering tax rebates and location subsidies to film productions that committed to shooting in underserved rural areas — a direct policy response to the Shicuo phenomenon.

33. What was the production budget of "A Love Letter to Grandma"?
- A. 1.52 billion yuan
B. 300 million yuan
C. 48 million yuan
D. 705 million yuan
34. How did daily visitor numbers to Shicuo change between May and July 2026?
- A. From 300 to about 8,200 per day.
B. From 1,800 to about 5,200 per day.
C. From 47 to 186 per day.
D. From ¥180 to ¥520 per day.
35. According to the passage, what distinguished the tourism generated by the film from typical social media-driven tourism?
- A. Film-driven tourists posted fewer photographs online.
B. Film-driven tourists stayed longer and were motivated by emotional engagement with the story.
C. Film-driven tourists spent less money than social media tourists.
D. Film-driven tourists only visited on weekends.
36. The word "anchoring" in paragraph 5 is closest in meaning to:
- A. floating
B. weighing
C. securing
D. drifting
37. What evidence does the passage provide to suggest the "film + cultural tourism" model is replicable?
- A. The director announced plans for a sequel set in another province.
B. Several provincial governments introduced incentive programs to attract film productions to rural areas.
C. The film was nominated for an international award at a major festival.
D. International tourists began visiting Shicuo in large numbers.

**The 2026 World Digital Education Conference:
Reimagining International Cooperation in the Age of Intelligence**

In August 2026, delegates from 127 countries converged on Shanghai for the third annual World Digital Education Conference, an event that has rapidly evolved from a niche gathering of technologists and education policymakers into one of the most consequential forums on the global governance agenda. Under the banner "Intelligent Transformation, Shared Future," the three-day conference addressed a question of profound significance: as artificial intelligence fundamentally reshapes how knowledge is created, transmitted, and credentialed, what principles should guide international cooperation in education?

The conference's centerpiece was the unveiling of the Shanghai Declaration on Digital Education Cooperation, a non-binding but symbolically weighty document endorsed by 94 participating nations. The declaration established

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

four pillars for international collaboration: first, the mutual recognition of digital credentials and micro-credentials across borders, building on pilot programs that had already enabled 340,000 students to transfer academic credits between institutions in China, ASEAN countries, and several African nations since 2024; second, the creation of an International AI in Education Ethics Framework, which set boundaries on the use of predictive algorithms in student assessment and prohibited the commercialization of student behavioral data; third, a commitment by signatory nations to invest collectively \$12 billion by 2030 in digital infrastructure for underserved schools, with an initial tranche of \$2.8 billion pledged during the conference itself; and fourth, the establishment of a Global Digital Education Resource Pool, envisioned as a publicly accessible repository of open-source curricula, AI-assisted tutoring systems, and culturally adapted learning materials.

Beneath the diplomatic language, however, the conference exposed persistent tensions that have long bedeviled international education cooperation. The most contentious debate revolved around data sovereignty — the principle that educational data generated within a nation's borders should be governed by that nation's laws. A bloc of developing countries, led by Indonesia, Nigeria, and Brazil, argued that the current architecture of digital education platforms, overwhelmingly dominated by technology companies headquartered in a handful of wealthy nations, amounted to a new form of intellectual colonialism. They demanded that the Global Digital Education Resource Pool be governed by a multilateral body with proportional representation from the Global South, rather than by the donor nations that would finance it.

A second fault line concerned the digital divide — not merely in infrastructure, but in what conference working papers termed "cognitive autonomy." Representatives from least-developed countries pointed out that while AI tutoring systems had demonstrated remarkable efficacy in controlled trials, nearly all such systems had been trained on datasets drawn from a narrow range of cultural and linguistic contexts — predominantly English, Mandarin, and a handful of European languages. A delegate from Ethiopia observed that her country's 88 officially recognized languages were collectively represented by fewer than 0.03% of the training data in the most widely deployed educational AI models. The ethical framework that emerged from the conference acknowledged this imbalance but stopped short of mandating specific remedies, calling instead for "voluntary commitments" from technology developers — language that critics decried as aspirational rather than enforceable.

Perhaps the conference's most tangible outcome was the launch of the China-ASEAN Digital Education Corridor, a bilateral initiative through which China committed to training 50,000 teachers from ASEAN member states in AI-augmented pedagogy over five years, and to deploying satellite-based broadband internet to 15,000 rural schools across Southeast Asia. While modest in relation to the scale of the challenge, the corridor was widely viewed as a concrete step toward the vision articulated in the Shanghai Declaration — one in which digital education serves not to widen existing inequalities but to narrow them, and in which international cooperation proceeds not on the terms dictated by the technologically powerful but on a foundation of genuine partnership and mutual respect.

38. What was the main theme of the 2026 World Digital Education Conference?

- A. "Education Without Borders: The End of National Curricula"
- B. "Intelligent Transformation, Shared Future"
- C. "Return to Tradition: Rejecting Technology in Classrooms"
- D. "Global Standardization of University Entrance Examinations"

39. According to the passage, what did the Shanghai Declaration establish as one of its four pillars?

- A. The replacement of all human teachers with AI tutors by 2030.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

- B. The mutual recognition of digital credentials and micro-credentials across borders.
C. A ban on all forms of digital technology in primary education.
D. The establishment of a single global university system.
40. What concern did the bloc of developing countries raise regarding the digital education platform landscape?
A. That platforms were too expensive for wealthy nations to afford.
B. That the dominance of technology companies from wealthy nations amounted to a form of intellectual colonialism.
C. That students in developing countries were uninterested in digital learning.
D. That AI tutoring systems had been proven ineffective in all trials.
41. The delegate from Ethiopia made the point that:
A. Ethiopia had fully digitized education in all 88 languages.
B. Ethiopian students consistently outperformed peers from wealthier nations.
C. Most educational AI models are trained on data from a very narrow range of languages and cultures.
D. Ethiopia planned to withdraw from all international education agreements.
42. Which of the following best describes the author's assessment of the conference's outcomes?
A. The conference was a complete failure with no meaningful results.
B. The conference produced both symbolic agreements and concrete initiatives, but significant structural challenges remain unresolved.
C. The conference resolved all tensions in international education cooperation definitively.
D. The conference's only achievement was attracting delegates from 127 countries.

Part IV Writing(20 points)

Directions: For this part, you are required to write an essay of at least 150 words on the following topic. You should state your opinion clearly and give reasons to support your points. You need to write on the answer sheet.

Topic: Hosting major international sporting events like the World Cup or Olympics brings both benefits and challenges to the host cities. Discuss your view.

In your essay, you should:

1. Clearly state your position on whether the benefits outweigh the challenges, or vice versa.
2. Discuss at least two specific benefits (e.g., economic stimulus, international prestige, infrastructure development, tourism growth, or cultural exchange) AND at least two specific challenges (e.g., financial burden, displacement of residents, environmental impact, or underutilized venues after the event).
3. Support your arguments with reference to real-world examples, including those from the 2026 sports events (such as the FIFA World Cup, the Milano-Cortina Winter Olympics, or the Asian Games).
4. Conclude with a balanced assessment and, if appropriate, suggest how the challenges can be managed.

Part I Listening Comprehension (25 points)

略，前面五套足够了

Part II Cloze (10 points)

Directions: There are a number of blanks in the following passage. For each blank there are four choices marked A), B), C) and D). You should choose ONE that best fits into the passage, Then mark the corresponding letter on the Answer Sheet with a single line through the center.

The first year of marriage is often described as a period of adjustment for a newlywed couple. It is a time of learning to blend two lives, habits, and expectations into one harmonious household. While the initial months are filled with excitement and joy, they can also be (18)_____ with unexpected challenges.

One of the most common areas of (19)_____ is finances. A couple who previously managed their own money must now learn to budget together, often requiring difficult conversations about spending habits and savings goals. Another frequent source of tension is the division of household chores. The simple act of deciding who takes out the trash or does the laundry can (20)_____ into a major disagreement if not handled with care.

Communication is the key to (21) these challenges. Experts advise newlyweds to establish open and honest dialogue from the very beginning. It is important to express feelings and needs (22)_____ letting them build up into resentment. Learning to compromise and see things from a partner's (23)_____ is also crucial for a healthy relationship.

Despite the potential difficulties, the first year is also a time of deep bonding and discovery. By (24)_____ obstacles together, couples can build a stronger foundation for their future. The shared experience of decorating a home, cooking meals together, and creating new traditions can (25)_____ the bond between them. Ultimately, the secret to a successful first year is 26 patience, understanding, and a shared commitment to making the relationship work. It is a journey of learning, growing, and 27 together.

Passage One

The Amazon Basin, a vast region spanning nine countries in South America, is defined by the Amazon River and its extensive network of tributaries. This region is not a monolithic entity but a complex mosaic of diverse ecosystems, including lowland rainforests, flooded forests, and seasonally flooded savannas. The geography of the basin has profoundly shaped both its biodiversity and the lives of its inhabitants.

The topography of the Amazon is predominantly flat, with most of the basin lying at low elevations. This flatness, combined with the immense volume of water from heavy rainfall, causes the river to flood vast areas during the wet season. This annual flooding, known as the "várzea" for whitewater rivers and "igapó" for blackwater rivers, is a critical ecological process. It deposits nutrient-rich sediment onto the floodplains, creating fertile grounds for agriculture and supporting a unique array of plant and animal life adapted to these seasonal changes.

The region's climate is classified as tropical rainforest, characterized by high temperatures and high humidity year-round. The average temperature rarely drops below 25°C, and rainfall is abundant, often exceeding 2,000 millimeters annually. This consistently warm and wet climate fuels the incredibly high rate of plant growth and decomposition, creating a dense, multi-layered canopy that is home to an estimated 10% of the world's known species.

Human settlement in the Amazon has been shaped by its geography. Indigenous communities have lived in harmony with the forest for millennia, developing sophisticated knowledge of its resources. In contrast, more recent urban centers, like Manaus in Brazil, have grown around major rivers, which serve as the primary highways for transportation and trade in a region where roads are scarce. The geography of the Amazon Basin is not just a backdrop; it is a dynamic and active force that continues to influence the ecological, economic, and cultural life of the region.

28. What is the main purpose of the passage?
- A. To describe the biodiversity of the Amazon rainforest.
 - B. To explain how the geography of the Amazon Basin shapes the region.
 - C. To argue for the protection of the Amazon River.
 - D. To compare the Amazon with other river basins.
29. The word "monolithic" in the first paragraph is closest in meaning to:
- A. Diverse and varied.
 - B. Large and powerful.
 - C. Uniform and unchanging.
 - D. Dangerous and unpredictable.
30. What is the ecological significance of the annual flooding in the Amazon?
- A. It destroys the vegetation.
 - B. It deposits nutrient-rich sediment.
 - C. It lowers the water table.
 - D. It prevents plant growth.
31. According to the passage, what is the primary reason for the high level of biodiversity in the Amazon?
- A. The presence of many large rivers.
 - B. The consistently warm and wet climate.
 - C. The flat topography of the basin.
 - D. The influence of human settlements.
32. It can be inferred from the last paragraph that rivers in the Amazon are particularly important for:
- A. Generating electricity.
 - B. Transportation and trade.
 - C. Providing drinking water.
 - D. Supporting tourism.

Passage Two

Perfectionism, the relentless striving for flawlessness and the setting of excessively high-performance standards, is often viewed as a desirable trait in today's competitive society. However, psychological research has increasingly revealed that this drive for perfection can be a double-edged sword, often leading to significant distress and

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中

dysfunction. It is important to distinguish between healthy striving for excellence and maladaptive perfectionism.

Healthy strivers, or "adaptive perfectionists," set high but attainable goals. They are motivated by a desire for achievement and personal growth. When they fall short of their goals, they are able to be self-compassionate, learn from their mistakes, and adjust their efforts. This form of perfectionism is associated with high levels of motivation, conscientiousness, and success.

In contrast, "maladaptive perfectionists" are driven by a fear of failure and a constant need for approval. They set impossibly high standards and are overly critical of their own performance. For them, anything less than perfect is a complete failure. This leads to a chronic state of anxiety, procrastination, and burnout. They often avoid taking on new challenges for fear of not meeting their own impossible expectations.

The roots of maladaptive perfectionism are complex, often linked to early childhood experiences and societal pressures. It can be a significant risk factor for a range of mental health issues, including depression, anxiety disorders, and eating disorders. Overcoming this form of perfectionism involves learning to challenge unrealistic standards, practicing self-compassion, and redefining success as progress and effort, not just a perfect outcome. The goal is to shift from a rigid, all-or-nothing mindset to a more flexible and self-accepting one.

33. What is the main idea of the passage?
- A. Perfectionism is always a positive trait. B. Perfectionism can be either healthy or harmful.
C. All forms of perfectionism lead to anxiety. D. Setting high standards is always bad.
34. According to the passage, how do "adaptive perfectionists" respond to failure?
- A. They feel devastated and give up. B. They learn from their mistakes and adjust.
C. They blame others for their shortcomings. D. They lower their standards permanently.
35. What is a key characteristic of "maladaptive perfectionists"?
- A. They are driven by a desire for personal growth. B. They are motivated by a fear of failure.
C. They are able to set realistic goals. D. They are self-compassionate.
36. The word "dysfunction" in the first paragraph is closest in meaning to:
- A. Success. B. Motivation.
C. Impairment. D. Creativity.
37. What is a recommended strategy for overcoming maladaptive perfectionism?
- A. Setting even higher standards. B. Ignoring all mistakes.
C. Practicing self-compassion. D. Seeking constant approval from others.

Passage Three

The field of aerospace engineering is at the cusp of a new era, driven by the convergence of private enterprise and technological breakthroughs. While government agencies like NASA have historically led space exploration, a new generation of private companies, such as SpaceX and Blue Origin, is now playing an increasingly dominant role, dramatically reducing the cost of access to space and accelerating the pace of innovation.

One of the most significant developments is the successful development and reuse of orbital-class rockets. Traditionally, rockets were used once and then discarded, making each launch extremely expensive. The ability to land a rocket's first stage on a drone ship or launch pad and reuse it for multiple flights has revolutionized the economics of spaceflight. This breakthrough has made it feasible to launch larger payloads more frequently, opening up possibilities for massive satellite constellations, space tourism, and even missions to Mars.

Another key area of focus is the development of advanced propulsion systems. While chemical rockets remain

更多学习资源，关注吉井解学公众号

吉大各专电子教材与学习生
活政策信息(持续更新中)

the workhorse, new technologies like ion thrusters and nuclear thermal propulsion are being researched. Ion thrusters, which use electricity to accelerate ions, are incredibly fuel-efficient, offering a potential for longer-duration missions with less propellant. Nuclear thermal propulsion, which uses a nuclear reactor to heat propellant, could drastically reduce travel time to distant destinations like Mars, making human missions more viable.

The future of aerospace is not just about reaching farther destinations; it is also about utilizing space to improve life on Earth. Satellite technology is critical for global communications, weather forecasting, navigation, and Earth observation. As the cost of launch decreases, we can expect to see even more innovative applications, from high-speed global internet coverage to precise monitoring of climate change and natural disasters. The new space race is not just about exploration; it is about building a space-based infrastructure that will fundamentally reshape our global economy and our understanding of our planet.

38. What is the main topic of the passage?
- A. The history of NASA. B. The rise of private companies in aerospace.
C. The different types of rocket fuel. D. The dangers of space travel.
39. According to the passage, what is the most significant economic impact of reusable rockets?
- A. They are more complex to build. B. They drastically reduce the cost of each launch.
C. They can only be used for small payloads. D. They are less reliable than traditional rockets.
40. The phrase "revolutionized the economics of spaceflight" in the second paragraph suggests that:
- A. Spaceflight has become more expensive.
B. Spaceflight has become much more affordable.
C. The economics of spaceflight has not changed.
D. The changes to spaceflight economics are small.
41. What is a potential advantage of ion thrusters over chemical rockets?
- A. They are much more powerful. B. They are more fuel-efficient.
C. They are cheaper to manufacture. D. They are easier to operate.
42. Based on the last paragraph, what is a key function of satellite technology?
- A. Only for military purposes. B. For entertainment and tourism.
C. For global communications and Earth observation. D. For powering homes on Earth.

Part IV Writing(20 points)

Directions: For this part, you are required to write an essay of at least 150 words on the following topic. You should state your opinion clearly and give reasons to support your points. You need to write on the answer sheet.

Topic: Counterfeit products, such as fake luxury goods and substandard electronics, are increasingly found in mainstream supermarkets. What measures should be taken to protect consumers from these fraudulent products, and what responsibilities do the supermarkets bear?

1. 【答案】B【解析】细节理解题。问题问：男士注册需要带什么？根据对话中女士的回答 “Just your student ID and the admission notice”（只需要你的学生证和录取通知书），可知B项正确。

Conversation 2

2. 【答案】B【解析】推理判断题。问题问：关于图书馆可以推断出什么？根据对话中男士说 “They’ve extended the opening hours to midnight on weekdays”（他们延长了工作日的开放时间至午夜），以及女士补充 “Only the self-study area stays open”（只有自习区保持开放），可知B项“工作日自习区现在开放到午夜”正确。

3. 【答案】B【解析】细节理解题。问题问：女士表达了什么担忧？根据女士说 “But the class is almost full. Have you checked the enrollment status online?”（但是课程几乎满了。你查过在线注册状态了吗？），以及男士回答 “there are only three spots left”（只剩下三个名额了），可知女士的担忧是关于课程可能已满，B项正确。

4. 【答案】B【解析】细节理解题。问题问：考试做了哪些变更？根据对话中女士说 “they moved it to June 20th”（他们把它移到了6月20日）可知日期推迟了；以及 “they’ve added an oral section”（他们还增加了一个口试部分），可知B项“日期被推迟，并且增加了口试部分”正确。

5. 【答案】B【解析】细节理解题。问题问：男士给出了什么建议？根据男士的话 “I’d say go for it if you’re passionate, but be prepared for a heavier workload”（我会说如果你有热情就去做，但要准备好更繁重的学业负担），可知B项“只有当她有热情并准备好更努力时才换”正确。

6. 【答案】C【解析】细节理解题。问题问：男士需要做什么才能获取该期刊的早期文章？根据女士说 “For issues before 2019, you’ll need to use the inter-library loan service”（对于2019年之前的期刊，你需要使用馆际互借服务），可知C项正确。

7. 【答案】D【解析】推理判断题。问题问：女士关于奖学金暗示了什么？根据女士说 “only 15 out of 60 applicants will receive it, so it’s pretty competitive”（60个申请者中只有15个能获得，所以竞争非常激烈），可知她暗示只有一小部分申请者能获奖，D项正确。

8. 【答案】B【解析】细节理解题。问题问：男士建议了什么？根据男士说 “Have you tried connecting from the computer lab in Building C?”（你试过从C栋的电脑室连接吗？），并补充说那里的电脑有稳定的有线连接，可知B项“使用C栋实验室的电脑”正确。

9. 【答案】B【解析】细节理解题。问题问：2026年世界人工智能大会的主题是什么？根据听力原文开头 “The 2026 World Artificial Intelligence Conference... under the theme ‘Intelligent Connectivity, Infinite Possibilities.’” 可知B项正确。

10. 【答案】B【解析】细节理解题。问题问：根据文章，HealthPal能帮助检测什么健康状况？根据听力原文 “HealthPal... provide early warnings of depression and anxiety disorders”（HealthPal能提供抑郁症和焦虑症的早期预警），可知B项正确。

11. 【答案】B【解析】细节理解题。问题问：文章中提到的CityFlow系统的一个成果是什么？根据原文 “peak-hour congestion has been reduced by approximately 23 percent”（高峰时段的拥堵减少了约23%），可知B项正确。

12. 【答案】B【解析】细节理解题。问题问：“太空计算星座”的目的是什么？根据听力原文 “The constellation is planned to... form a space-based computing network that provides real-time computational services”

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

to ground users” (该星座计划形成一个天基计算网络，为地面用户提供实时计算服务)，可知B项正确。

13. 【答案】B【解析】细节理解题。问题问：长征十号火箭第一节在回收测试中降落在哪里？根据听力原文 “the rocket’s first-stage booster precisely landed on an unmanned recovery vessel stationed in a designated area of the South China Sea” (火箭的第一级助推器精确降落在南海指定区域的一艘无人回收船上)，可知B项正确。

14. 【答案】B【解析】细节理解题。问题问：根据文章，2026年6月什么被批准了？根据听力原文 “in June 2026, the Tianwen-3 Mars sample return mission received formal approval” (2026年6月，天问三号火星样本返回任务正式获批)，可知B项正确。

15. 【答案】B【解析】细节理解题。问题问：阿尔忒弥斯二号任务共有多少名宇航员？根据听力原文 “Four astronauts... boarded the Orion spacecraft” (四名宇航员登上了猎户座飞船)，可知B项正确。

16. 【答案】C【解析】细节理解题。问题问：猎户座飞船在月球背面飞了多远？根据听力原文 “traveled to about 10,000 kilometers beyond the far side of the Moon” (飞到月球背面约10,000公里处)，可知C项正确。

17. 【答案】B【解析】细节理解题。问题问：任务期间发生了什么技术问题？根据听力原文 “the spacecraft’s solar panels experienced a brief power fluctuation” (飞船的太阳能板经历了一次短暂的电力波动)，可知B项正确。

Part II Cloze (10 points)

【原文翻译】

人工智能的快速发展引发了一场关于创造力本质的根本性辩论。随着AI系统在生成文本、图像和音乐方面变得越来越熟练，并且这些作品与人类作品极为相似，许多人开始质疑机器智能最终是否会完全取代人类创造力。

AI的支持者认为，这些系统仅仅是增强而非取代人类创造潜力的工具。他们指出，AI已经帮助艺术家探索新风格，帮助作家克服写作障碍，并使音乐家能够创作他们以前从未尝试过的音乐类型。在这种观点下，AI是一个协作伙伴，它增强而非削弱了人类的能力。

然而，批评者认为，真正的创造力需要意识、情感深度和生活经验——这些品质是当前的AI系统所不具备的。他们认为，AI生成的作品，无论多么精致，都缺乏那种使艺术具有意义的真实人文触感。这场辩论远未结束，但有一件事是肯定的：人类与机器创造力之间的张力将继续重塑我们对两者的理解。

18. 【答案】A【解析】本题考查动词辨析。A) ignited 点燃，引发；B) extinguished 熄灭；C) neglected 忽视；D) suppressed 压制。句意：人工智能的快速发展“引发”了一场关于创造力本质的根本性辩论。“ignited a debate”是常见搭配，意为“引发辩论”。因此，选A。

19. 【答案】B【解析】本题考查形容词辨析。A) clumsy 笨拙的；B) proficient 熟练的，精通的；C) reluctant 不情愿的；D) indifferent 漠不关心的。句意：随着AI系统在生成文本、图像和音乐方面变得越来越“熟练”。be proficient at doing sth. 是固定搭配。因此，选B。

20. 【答案】B【解析】本题考查动词辨析。A) distort 扭曲；B) resemble 相似，像；C) contradict 矛盾；D) surpass 超过。句意：AI生成的作品与人类作品极为“相似”。因此，选B。

21. 【答案】C【解析】本题考查动词辨析。A) enhance 增强；B) preserve 保存；C) displace 取代，替代；D) celebrate 庆祝。句意：许多人开始质疑机器智能是否会最终完全“取代”人类创造力。因此，选C。

22. 【答案】A【解析】本题考查动词辨析。A) amplify 放大，增强；B) constrain 限制；C) monitor 监控；D) dismiss 解雇，驳回。句意：AI支持者认为这些系统是“增强”而非取代人类创造潜力的工具。因此，选A。

23. 【答案】B【解析】本题考查动词辨析。A) aggravate 加剧；B) overcome 克服；C) provoke 挑衅；

更多学习资源，关注吉井解学公众号

D) sustain 维持。句意：AI帮助作家“克服”写作障碍（writer's block）。因此，选B。

24. 【答案】A【解析】本题考查动词辨析。A) attempted 尝试；B) abandoned 放弃；C) rejected 拒绝；D) perfected 完善。句意：使音乐家能够创作他们以前从未“尝试”过的音乐类型。因此，选A。

25. 【答案】C【解析】本题考查动词辨析。A) restricts 限制；B) undermines 削弱；C) augments 增强，补充；D) duplicates 复制。句意：AI是一个协作伙伴，它“增强”而非削弱了人类的能力。因此，选C。

26. 【答案】A【解析】本题考查动词辨析。A) possesses 拥有；B) acquires 获得；C) manufactures 制造；D) simulates 模拟。句意：真正的创造力需要意识、情感深度和生活经验——这些品质是当前的AI系统所不“具备”的。因此，选A。

27. 【答案】B【解析】本题考查名词辨析。A) harmony 和谐；B) tension 紧张，张力；C) indifference 冷漠；D) submission 服从。句意：人类与机器创造力之间的“张力”将继续重塑我们对两者的理解。因此，选B。

Part III Reading Comprehension (30 points)

Passage One

【原文翻译】

2026年世界人工智能大会（WAIC 2026）于7月6日至8日在上海举行，吸引了超过20万名参会者，来自62个国家的1500多家参展商。大会以“智能联结，无限可能”为主题，展示了正在将人工智能从实验室快速带入日常生活的突破性成果。

WAIC 2026无可争议的亮点是“百域智”的正式发布，这是中国迄今为止最雄心勃勃的通用人工智能平台。该平台由上海人工智能实验室牵头，联合18所大学和12家科技公司共同开发，将自然语言处理、计算机视觉和推理能力整合到一个统一的架构中。与以往仅在单一领域表现出色的AI模型不同，百域智在现场演示中展示了涵盖147个不同任务类别的能力，包括医学图像分析、法律文件起草和实时多语言翻译。

百域智的独特之处在于其“领域感知”设计。该平台可以自动检测用户查询的专业语境，并相应调整其推理框架。例如，当被问到同一个医学问题时，百域智会向外行人提供一般性解释，但当识别出用户是医疗专业人员时，则会提供详细的诊断推理。这种自适应能力为百域智赢得了大会的最高创新奖。

在医疗保健领域，几款AI应用引起了广泛关注。由清华大学研究人员开发的“HealthPal”系统，通过分析用户语音和面部微表情中的细微模式，展示了检测早期抑郁和焦虑迹象的能力。涉及12,000名参与者的临床试验报告准确率达到89%，超过了大多数传统的筛查方法。开发者强调，HealthPal旨在作为一种初步筛查工具，以辅助而非取代心理健康专业人员。

大会还讨论了紧迫的伦理问题。中国科技部发布了《人工智能伦理治理白皮书（2026）》，其中制定了算法透明度、数据隐私保护和AI决策问责制的指导方针。白皮书引入了一项强制性“AI影响评估”，适用于部署在医疗、刑事司法和教育等关键领域的任何AI系统。大会主席张伟教授指出：“我们正在进入一个明智地治理AI与快速发展AI同样重要的时代。”

28. 【答案】C【解析】细节理解题。题干问：百域智与之前AI模型的不同之处。根据第二段末句“Unlike previous AI models that excelled in only one domain, Baiyuzhi demonstrated competence across 147 different task categories during its live demonstration”，可知C项“它展示了跨越147个不同任务类别的能力”正确。因此，选C。

29. 【答案】B【解析】细节理解题。题干问：百域智“领域感知”设计的关键特征是什么。根据第三段“The platform can automatically detect the professional context of a user's query and adjust its reasoning framework accordingly”，可知B项“它根据用户的专业语境调整其推理”正确。因此，选B。

30. 【答案】B【解析】细节理解题。题干问：根据文章，HealthPal通过分析什么来帮助检测心理健康

吉大各专业课教材与学习资源
海量信息(持续更新中)

状况。根据第四段“by analyzing subtle patterns in users' speech and facial micro-expressions”，可知B项“用户的语音模式及面部微表情”正确。因此，选B。

31. 【答案】D【解析】细节理解题。题干问：文章如何描述HealthPal的临床试验结果。根据第四段“Clinical trials involving 12,000 participants reported an accuracy rate of 89%, surpassing most traditional screening methods”，可知D项“他们报告了89%的准确率，超过了大多数传统方法”正确。因此，选D。

32. 【答案】D【解析】细节判断题。题干问：以下哪项不是《人工智能伦理治理白皮书（2026）》提到的一部分。A项“算法透明度指导方针”、B项“数据隐私保护措施”、C项“对关键领域的强制性AI影响评估”均在第五段提及。D项“完全禁止在刑事司法中使用AI”文中未提及。因此，选D。

Passage Two

【原文翻译】

2026年被证明是中国航天雄心的分水岭，两项里程碑式的成就标志着中国在太空技术方面日益增长的能力：可重复使用火箭的成功海上回收和“太空计算星座”的启动。

2026年5月24日，中国航天科技集团公司（CASC）取得了历史性里程碑，长征十号火箭的第一级助推器成功执行了受控下降并精确降落在南海的一艘无人回收船上。助推器在将有效载荷送入近地轨道后，重返大气层，利用栅格舵和发动机重新点火引导自己到达指定的着陆区——一艘名为“海建-02”的无人船上一个仅52米乘38米的矩形平台上。这一成就使中国成为继美国之后第二个掌握大规模海上火箭回收复杂技术的国家。

这项突破的意义远不止国家自豪感。可重复使用火箭技术有望将发射成本降低约60%至70%，从而大幅降低进入太空的经济门槛。CASC官员宣布计划在2027年之前再进行至少六次回收测试，目标是到2028年实现长征十号的完全可重复使用。该技术预计将在中国即将开展的登月任务中发挥关键作用，包括嫦娥七号南极探测任务和国际月球科研站的建设。

同样雄心勃勃的是“太空计算星座”，其首颗实验卫星“天算一号”于2026年3月12日，在文昌航天发射场由长征八号火箭发射升空。该星座是中国空间技术研究院与清华大学、北京大学、吉林大学等顶尖大学合作的项目，计划构建一个由超过100颗低地球轨道卫星组成的网络，共同形成一个天基计算网格。

与仅仅中继数据的传统通信卫星不同，天算一号搭载了能够在轨道上进行复杂计算的高性能处理器。该卫星旨在为从灾害监测到自主航运导航等应用提供实时数据处理服务。项目首席科学家李宏峰博士解释说：“地面数据中心在延迟、覆盖范围和能源消耗方面面临限制。天基计算网络可以在边缘——更接近数据生成的地方——处理数据，从而提供仅靠地面基础设施无法实现的服务。”

该星座将分三个阶段部署：第一阶段（2026-2027）将建立一个30颗卫星的演示网络；第二阶段（2027-2029）将覆盖范围扩大到72颗卫星；第三阶段（2029-2031）将完成完整的108颗卫星星座。当完全投入运行时，该系统预计将为地球表面超过95%的区域提供计算覆盖，包括目前地面基础设施服务不足的偏远地区。国际观察人士指出，太空计算星座代表了太空利用的新范式，有可能重塑全球云计算的竞争格局。

33. 【答案】B【解析】细节理解题。题干问：2026年5月长征十号火箭测试的关键成就是什么。根据第二段“the Long March 10 rocket's first-stage booster successfully executed a controlled descent and precision landing onto an unmanned recovery vessel”，可知B项“其第一级助推器精确降落在海基回收船上”正确。因此，选B。

34. 【答案】C【解析】细节理解题。题干问：根据文章，可重复使用火箭技术能实现多少成本降低。根据第三段“Reusable rocket technology has the potential to reduce launch costs by an estimated 60 to 70 percent”，可知C项“60%至70%”正确。因此，选C。

35. 【答案】C【解析】细节理解题。题干问：哪所大学被提及为太空计算星座项目的合作者。根据第四段末句“a collaborative project between the China Academy of Space Technology and leading universities”，可知C项“清华大学”正确。因此，选C。

更多学习资源，关注吉井解学公众号

including Tsinghua, Peking University, and Jilin University”，可知C项“吉林大学”正确。因此，选C。

36. 【答案】B【解析】细节理解题。题干问：根据李宏峰博士的说法，天基计算相对于地面数据中心的一个关键优势是什么。根据第五段李博士的话“A space-based computing network can process data at the edge—closer to where it is generated”，可知B项“能够在更接近数据生成的地方处理数据”正确。因此，选B。

37. 【答案】D【解析】细节理解题。题干问：太空计算星座部署的第三阶段将实现什么。根据第六段“Phase 3 (2029 - 2031) will complete the full 108-satellite constellation”，可知D项“完成完整的108颗卫星星座”正确。因此，选D。

Passage Three

【原文翻译】

2026年4月18日，美国东部时间上午8点37分，有史以来最强大的火箭——太空发射系统（SLS）在肯尼迪航天中心39B发射台轰鸣升空，搭载着猎户座飞船及其四名宇航员，开启了人类54年来首次重返月球附近的旅程。阿尔忒弥斯II号任务是NASA月球探测计划中的一个关键里程碑，它不仅仅是一次技术演示，更是人类在深空探测中重燃雄心的宣言。

机组人员——指挥官里德·怀斯曼、飞行员维克托·格洛弗、任务专家克里斯蒂娜·科赫和加拿大航天局任务专家杰里米·汉森——代表了经验与象征意义的精心组合。格洛弗成为第一位进入近地轨道以外深空的有色人种，而科赫和汉森则分别成为第一位进入深空的女性及第一位加拿大人。机组人员的组成被广泛认为体现了该计划的精神：下一个太空探索时代属于全人类。

任务计划大约为期10天的旅程。在完美入轨后，猎户座飞船执行了一次地月转移点火，使其进入飞向月球的轨道。第4天，飞船经过月球背面，到达了月球背面以外约10,000公里的最大距离——这是自阿波罗17号以来，任何载人航天器飞行过的最远距离。在此期间，宇航员经历了与地球的完全失联，这是一次计划中的信号中断，持续了34分钟，因为月球本身阻挡了无线电信号。这一刻让人想起阿波罗时代，鲜明地提醒人们深空旅行固有的孤立感。

然而，这次任务并非没有挑战。在第3天，约翰逊航天中心的地面控制人员检测到猎户座飞船四个太阳能电池板翼出现间歇性功率波动。NASA工程师将其描述为“轻微但令人担忧”的异常，导致电压下降持续2到7秒。经过14小时的密集诊断，团队确定一个负责管理功率分配的软件算法在特定光照条件下误解了传感器数据。一个校准补丁被上传，问题得到完全解决，但这一事件凸显了在远离地球时运行复杂系统的脆弱性。

此次任务最令人难忘的成就之一，是首次从深空进行实时视频广播。第5天，当猎户座飞船在距离地球约38万公里处巡航时，宇航员进行了一次22分钟的高清广播，全球约有5.2亿人收看。指挥官怀斯曼漂浮在飞船窗户旁，背景中可见月球表面，他说：“你们看到的不仅仅是月球。它是一面镜子，反映了当人类选择共同探索时所能取得的成就。”广播中还包括宇航员与来自八个国家学校学生的简短对话，放大了其鼓舞人心的影响力。

飞船于4月28日安全溅落在加利福尼亚州海岸附近的太平洋，结束了这次行程230万公里的任务。阿尔忒弥斯II号的成功为阿尔忒弥斯III号奠定了基础，后者目前计划于2027年年中执行，旨在让第一位女性和下一位男性在月球南极附近着陆。除此之外，NASA设想阿尔忒弥斯计划作为一个试验场，用于测试未来将人类送往火星所需的技术和操作系统。用NASA局长比尔·尼尔森在溅落后新闻发布会上的话说：“阿尔忒弥斯II号不仅仅是重返月球；它为我们通往宇宙的未来架起了桥梁。”

38. 【答案】B【解析】细节理解题。题干问：根据文章，阿尔忒弥斯II号宇航员有什么历史性荣誉。根据第二段“Glover became the first person of color to travel beyond low Earth orbit, while Koch and Hansen were respectively the first woman and the first Canadian to do so.”，可知科赫是第一位进入低地球轨道以外深空的女

吉大各专电子教材与学习资源
持续更新中

性。因此，选B。

39. 【答案】B【解析】细节理解题。题干问：第4天计划中的通信中断期间发生了什么。根据第三段末句“During this period, the crew experienced a complete loss of direct communication with Earth, a planned blackout lasting 34 minutes as the Moon's bulk blocked radio signals.”，可知B项“月球挡住了猎户座与地球之间的直接无线电信号，持续了34分钟”正确。因此，选B。

40. 【答案】C【解析】细节理解题。题干问：第3天的功率波动异常最终归因于什么。根据第四段“the team determined that a software algorithm responsible for managing power distribution was misinterpreting sensor data under specific illumination conditions”，可知C项“一个负责管理功率分配的软件算法在特定光照条件下误解了传感器数据”正确。因此，选C。

41. 【答案】C【解析】细节理解题。题干问：根据文章，以下哪项最能描述第5天现场直播的意义。根据第五段“the crew transmitted a 22-minute high-definition broadcast that was viewed by an estimated 520 million people worldwide... The broadcast included a brief conversation between the crew and students from schools in eight countries”，可知C项“有超过5亿人观看，并包括与来自多个国家学生的对话”正确。因此，选C。

42. 【答案】C【解析】推理判断题。题干问：NASA局长比尔·尼尔森在新闻发布会上的陈述暗示了阿尔忒弥斯II号的什么意义。根据末段比尔·尼尔森的话“Artemis II did not just revisit the Moon; it built the bridge to our future in the cosmos”，以及前文“NASA envisions the Artemis program as a proving ground for the technologies... that will one day carry humans to Mars”，可知C项“该任务是通往更雄心勃勃目标（包括最终的火星探索）的垫脚石”正确。因此，选C。

Part IV Writing (15 points)

【参考范文】

AI and Creativity: A Collaborative Future

The debate over AI and creativity is a hot topic. Some believe that AI will eventually replace human creativity, generating art and ideas without our input. Others argue that AI is merely a tool that can assist but never truly create, as it lacks consciousness and genuine emotion.

In my opinion, AI will not replace human creativity, but rather serve as a powerful collaborator that enhances it. While AI can analyze vast amounts of data and generate impressive outputs, it cannot replicate the uniquely human experiences, emotions, and intentions that form the core of true creativity. For example, in the field of music, AI can compose a technically perfect piece, but it may lack the soul and personal story that a human composer brings to a melody. Therefore, AI is best viewed as a creative partner that helps us overcome limitations and explore new possibilities, not as a competitor.

In conclusion, the rise of AI does not spell the end of human creativity. Instead, it opens up a new era of collaboration, where human imagination and machine intelligence work together to achieve things neither could alone. The future of creativity lies in synergy, not replacement.

评分标准：

- 内容切题，观点明确 (30%)
- 结构清晰，逻辑连贯 (25%)
- 语言准确，表达流畅 (25%)
- 字数达标 (20%)

吉大研究生入学英语分级考试 全真模拟卷（二）详解

Part I Listening Comprehension (25 points)

1. 【答案】C【解析】推理判断题。问题问：那位女士暗示了什么？根据对话中女士的回答 “As long as you have the original packaging and the tags are still attached, you're within the 7-day return window”（只要你有原包装并且标签还在，你就在7天退货期内），可知C项“如果男士满足所述条件，他就有资格退货”正确。

2. 【答案】A【解析】观点态度题。问题问：女士对电商平台的态度是什么？根据女士说 “That's exactly what the platforms want — the flash sale countdowns, the ‘limited stock’ warnings, the stacked coupons. It's all designed to make us impulse-buy. I uninstalled three shopping apps this morning.”（这正是平台想要的——限时抢购倒计时、‘库存有限’的警告、叠加的优惠券。这些都是为了让我们冲动消费。我今天早上卸载了三个购物APP），可知A项“她觉得它们的营销手段具有操纵性”正确。

3. 【答案】C【解析】推理判断题。问题问：从对话中可以推断出什么？根据女士说 “The 2026 revised Advertising Law now requires influencers to label paid promotions clearly, and exaggerated efficacy claims can result in fines up to 2 million yuan.”（2026年修订的《广告法》现在要求网红明确标注付费推广，夸大功效的声明可能导致高达200万元的罚款），可知C项“新法规加强了对误导性广告的限制”正确。

4. 【答案】C【解析】细节理解题。问题问：女士在警告男士什么？根据女士说 “Be very careful. There's a scam circulating in 2026 where buyers ‘overpay’ via QR code and then ask for a partial refund, but the original payment never clears.”（要非常小心。2026年流传一种骗局，买家通过二维码‘多付’然后要求部分退款，但原始付款从未到账），可知C项“一种针对在线卖家的欺诈手段”正确。

5. 【答案】B【解析】主旨大意题。问题问：说话者主要在讨论什么？根据男士说 “After watching this year's 3·15 Gala, I can't look at processed meat products the same way.”（看了今年的3·15晚会后，我无法再用同样的眼光看待加工肉类产品了），以及女士补充 “The expose on the ‘premium’ cooking oil that was actually repackaged gutter oil was even worse.”（对‘优质’食用油实际上是重新包装的地沟油的曝光更糟），可知B项“一个揭露食品安全违规行为的电视节目”正确。

6. 【答案】B【解析】推理判断题。问题问：关于以旧换新计划，我们从对话中了解到什么？根据女士说 “That explains why EV sales jumped 38% in the first half of 2026. The old-for-new policy isn't just boosting consumption; it's genuinely accelerating the green transition.”（这解释了为什么2026年上半年电动汽车销量增长了38%。以旧换新政策不仅仅是在促进消费；它确实在加速绿色转型），可知B项“它促进了环保消费的增长”正确。

7. 【答案】B【解析】主旨大意题。问题问：对话涉及什么问题？根据男士说 “the delivery driver asked me to sign on a screen that had a pre-checked box — something about ‘agreeing to share personal data with partner merchants.’”（快递员让我在一个有预先勾选框的屏幕上签字——上面写着‘同意与合作伙伴商家共享个人数据’），以及女士说 “That's a classic dark pattern. The 2026 Personal Information Protection Law update explicitly bans pre-ticked consent boxes.”（这是一个经典的黑暗模式。2026年《个人信息保护法》更新版明确禁止预先勾选的同意框），可知B项“未经授权收集消费者个人信息”正确。

8. 【答案】C【解析】推理判断题。问题问：女士对“先买后付”服务暗示了什么？根据女士说 “BNPL services have tripled their user base... but the 2026 central bank report shows that 27% of young users have missed at least one payment. The convenience is seductive, but the debt trap is real.”（BNPL服务的用户群自2024年以来增长了三倍，但2026年央行报告显示，27%的年轻用户至少错过了一次还款。这种便利性很诱人，但债务陷阱是真实的），可知C项“尽管它们看似方便，但会带来显著的经济风险”正确。

持续更新(持续更新中)

9. 【答案】B【解析】细节理解题。问题问：2026年上半年，以旧换新计划创造了多少零售总额？根据听力原文 “the program drove a total of 1.1 trillion yuan in retail sales during the first half of the year” (该计划在2026年上半年推动了1.1万亿元的零售总额)，可知B项 “1.1万亿元” 正确。

10. 【答案】C【解析】细节理解题。问题问：在该计划下，新能源汽车可获得最高补贴是多少？根据听力原文 “For new energy vehicles, the subsidy can reach up to 30,000 yuan per vehicle” (对于新能源汽车，每辆车补贴最高可达30,000元)，可知C项 “30,000元” 正确。

11. 【答案】C【解析】细节理解题。问题问：根据文章，该计划还实现了什么额外的环境效益？根据听力原文 “the initiative has prevented approximately 8 million tons of electronic waste from entering landfills” (该计划阻止了约800万吨电子垃圾进入垃圾填埋场)，可知C项 “它阻止了约800万吨电子垃圾进入垃圾填埋场” 正确。

12. 【答案】B【解析】细节理解题。问题问：2026年3·15晚会最令人震惊的揭露是什么？根据听力原文 “The most alarming investigation revealed a network of workshops... that had been reprocessing expired frozen meat products... by washing them with chemical solutions, re-seasoning them heavily, and repackaging them with falsified production dates” (最令人震惊的调查揭示了一个作坊网络...它们用化学溶液清洗过期冷冻肉制品，重新大量调味，并用伪造的生产日期重新包装)，可知B项 “过期冷冻肉被化学处理后重新销售” 正确。

13. 【答案】B【解析】细节理解题。问题问：过期肉丑闻涉及多少个加工点？根据听力原文 “involving at least 12 processing sites” (涉及至少12个加工点)，可知B项 “12” 正确。

14. 【答案】C【解析】细节理解题。问题问：直播后政府宣布了什么长期监管措施？根据听力原文 “The government also announced a mandatory blockchain-based food traceability system for all processed meat and edible oil products, scheduled to take effect in January 2027.” (政府还宣布对所有加工肉类和食用油产品实施强制性的基于区块链的食品追溯系统，预计于2027年1月生效)，可知C项 “一个强制性的基于区块链的食品追溯系统” 正确。

15. 【答案】B【解析】细节理解题。问题问：与上一年相比，2026年夏季“中国绿色产品”认证商品的销售额增长了百分之多少？根据听力原文 “sales of products certified with the ‘China Green Product’ label increased by 67% year-on-year” (获得‘中国绿色产品’认证的产品销售额同比增长了67%)，可知B项 “67%” 正确。

16. 【答案】B【解析】细节理解题。问题问：根据消费者调查，2026年有多少比例的年轻消费者表示愿意为可持续产品支付额外费用？根据听力原文 “64% of consumers aged 18 - 35 said they were willing to pay a premium of 10% - 25% for environmentally sustainable products” (64%的18-35岁消费者表示愿意为环境可持续产品支付10%-25%的溢价)，可知B项 “64%” 正确。

17. 【答案】C【解析】细节理解题。问题问：专家对绿色消费趋势提出了什么担忧？根据听力原文 “experts also caution that ‘greenwashing’ —where companies make misleading claims about environmental benefits— remains a significant challenge” (专家也警告说，‘漂绿’——即公司对环境效益做出误导性声明——仍然是一个重大挑战)，可知C项 “公司可能会进行误导性的环保声明” 正确。

Part II Cloze (10 points)

【原文翻译】

在当今这个可以即时获取商品、营销策略被精心设计的时代，理性消费的概念变得比以往任何时候都更加重要，也(18)更加难以实践。消费主义，这种将个人幸福等同于物质占有的意识形态，已经如此彻底地(19)渗透到现代文化中，以至于抗拒它的诱惑需要刻意、有意识的努力。

(20)支撑消费主义行为的心理机制是极其精妙的。公司投入数十亿资金进行研究，旨在(21)利用我

吉大各专业课教材与学习生
活政策信息(持续更新中)

们最深层的安全感——将产品与社会地位、浪漫成功和自我价值联系起来。由购物触发的多巴胺驱动的奖励循环，在(22)生物学层面上与那些涉及其他行为成瘾的循环惊人地相似，这解释了为什么许多人在一次计划外的购物狂欢后，会感到最初的一阵兴奋，随后却是空虚感。

然而，越来越多的(23)消费者群体正在积极拒绝这种范式。社交媒体上“去影响力”内容的兴起，即创作者敦促粉丝不要购买某些产品，(24)反映了更广泛的文化对盲目消费的抵制。同样，极简主义运动倡导拥有更少但质量更好的物品，已经(25)获得了显著的吸引力，尤其是在那些亲身体验过物质积累边际效益递减的城市专业人士中。

从经济(26)角度来看，理性消费并不意味着禁欲；相反，它意味着基于真实需求、长期价值和个人财务健康来做出购买决策。这种方法与消费主义模式形成了鲜明的(27)对比，后者优先考虑数量、新奇性和对人为需求的永久创造。

18. 【答案】A【解析】本题考查形容词辨析。A) difficult 困难的；B) different 不同的；C) diffuse 扩散的；D) defiant 挑衅的。句意：理性消费的概念变得比以往任何时候都更加重要，也“更加难以”实践。根据“more crucial and more...to practice”(更重要且更难实践)，前后语义一致，应选一个表示“困难”的词。因此，选A。

19. 【答案】A【解析】本题考查动词辨析。A) permeated 渗透，弥漫；B) permitted 允许；C) perpetuated 使永存；D) precipitated 沉淀，促使。句意：消费主义已经如此彻底地“渗透/弥漫”到现代文化中。permeated modern culture 意为“渗透到现代文化中”，强调其广泛性和深度。因此，选A。

20. 【答案】A【解析】本题考查动词辨析。A) underlying 构成……的基础，位于……之下；B) undertaking 承担，从事；C) underlining 强调，在……下面划线；D) undermining 削弱，破坏。句意：“支撑”消费主义行为的心理机制。the mechanisms underlying... 是固定短语，意为“构成……基础/支撑……的机制”。因此，选A。

21. 【答案】A【解析】本题考查动词辨析。A) exploit 利用，开发；B) explore 探索；C) explode 爆炸；D) expire 到期。句意：公司投入资金进行研究，旨在“利用”我们最深层的安全感。exploit our deepest insecurities 意为“利用我们最深的不安全感”。因此，选A。

22. 【答案】A【解析】本题考查副词辨析。A) biologically 生物学上；B) biographically 传记上；C) bibliographically 书目上；D) bilaterally 双边地。句意：由购物触发的多巴胺驱动的奖励循环，在“生物学层面上”与那些涉及其他行为成瘾的循环相似。描述成瘾的生理基础，应选用“biologically”。因此，选A。

23. 【答案】A【解析】本题考查名词辨析。A) segment 部分，群体；B) sentiment 情绪，观点；C) sediment 沉淀物；D) segregation 隔离。句意：越来越多的“消费者群体”正在积极拒绝这种范式。a growing segment of consumers 意为“越来越多的消费者群体”，是常见搭配。因此，选A。

24. 【答案】A【解析】本题考查动词辨析。A) reflects 反映；B) refracts 折射；C) reforms 改革；D) refrains 克制，refrain from doing。句意：“去影响力”文化的兴起“反映了”更广泛的文化对盲目消费的抵制。因此，选A。

25. 【答案】A【解析】本题考查动词辨析。A) gained 获得；B) attained 获得(通常指经过努力达到目标)；C) acquired 获得(指通过自身努力获得技能、知识等)；D) derived 源自，获得。句意：极简主义运动已经“获得了”显著的吸引力。gained traction 是固定搭配，意为“获得吸引力/势头”。因此，选A。

26. 【答案】A【解析】本题考查名词辨析。A) standpoint 立场，观点；B) standard 标准；C) standstill 停顿；D) standout 杰出的人或物。句意：从经济“角度”来看。from an economic standpoint 是固定搭配，意为“从经济角度来看”。因此，选A。

27. 【答案】A【解析】本题考查固定搭配。A) contrast 对比，对照；B) contract 合同；C) contrary 相

持续更新中(持续更新中)

反的；D) contradiction 矛盾。句意：这种方法与消费主义模式形成了鲜明的“对比”。in stark contrast to 是固定搭配，意为“与……形成鲜明对比”。因此，选A。

Part III Reading Comprehension (45 points)

Passage One

【原文翻译】

2026年上半年，中国的消费品以旧换新计划证明，经济刺激和环境可持续性确实可以齐头并进。该政策向用节能环保新产品替换旧产品的消费者提供政府补贴，创造了1.1万亿元人民币的零售额——约占同期消费品零售总额的4.6%。

其操作方式很直接：消费者带来旧物品——无论是用了十年的冰箱、汽油动力踏板车，还是过时的智能手机——并在购买符合条件的替代品时获得折扣。对于大型家电，补贴通常覆盖新产品价格的15%，每件商品上限为2000元。汽车行业的补贴条件更为优厚，新能源汽车以旧换新可享受中央和地方合计最高3万元的补贴。

该政策的成功很大程度上归功于其简化的实施流程。与早期需要消费者在多个政府部门间办理复杂文书工作的补贴计划不同，2026年的版本将整个流程整合到了各大电商平台。消费者可以在一个应用程序内验证他们的资格、安排旧物品回收以及领取补贴。经济学家指出，这种“麻烦成本”的降低大大提高了参与率。

也许最显著但不太容易立即看到的成就在于该计划的环境维度。生态环境部估计，在2026年上半年，以旧换新计划减少了约800万吨电子和家庭垃圾进入垃圾填埋场。以旧换新的产品被送往超过300家政府认证的回收设施，其中有价值的材料——电子产品中的稀土金属、家电中的钢材、车辆中的电池——被提取出来并重新投入制造供应链。

然而，批评者指出了该计划的长期可持续性问题。“补贴结束后会发生什么？”中国人民大学的张伟教授问道。“如果消费者已经被训练得期望15-20%的折扣是常态，一旦政府支持退出，市场可能难以维持势头。”据报道，政策制定者正在探索一种分阶段的补贴削减方案，该方案将持续到2028年，让市场有时间进行调整。

28. 【答案】B【解析】细节理解题。题干问：2026年上半年，以旧换新计划占总零售额的比例是多少？根据第一段“generated 1.1 trillion yuan in retail sales—accounting for roughly 4.6% of total retail sales”，可知B项“4.6%”正确。因此，选B。

29. 【答案】B【解析】细节理解题。题干问：根据文章，该计划高参与率的一个关键原因是什么？根据第三段“the 2026 version integrates the entire process into major e-commerce platforms... Consumers can verify their eligibility, schedule pickup of old items, and claim their subsidy all within a single app. This reduction in ‘hassle cost’ ... has dramatically improved participation rates”，可知B项“通过数字平台简化了申请流程”正确。因此，选B。

30. 【答案】C【解析】细节理解题。题干问：有多少家政府认证的回收设施处理以旧换新的产品？根据第四段“Traded-in products are routed to over 300 government-certified recycling facilities”，可知C项“超过300家”正确。因此，选C。

31. 【答案】C【解析】细节理解题。题干问：张伟教授对该计划提出了什么担忧？根据第五段张教授的话“If consumers have been trained to expect 15 – 20% discounts as the norm, the market may struggle to maintain momentum once government support is withdrawn”，可知C项“市场可能会变得依赖补贴”正确。因此，选C。

32. 【答案】B【解析】观点态度题。题干问：以下哪项最能描述作者对以旧换新计划的总体评价？文章前四段详细描述了计划的积极成果（高零售额、简化流程、环境效益），第五段则引用了批评者的观点，指出了长期可持续性的挑战。因此，作者的态度是“谨慎乐观，既承认成就也承认挑战”。因此，选B。

Passage Two

【原文翻译】

2026年春节旅游和消费季，全国交通网络旅客发送量创纪录地达到29亿人次，同时也引发了消费者投诉激增的令人不安的现象，这促使人们呼吁在假日经济中加强监管干预。

根据中国消费者协会2026年3月发布的数据，在为期40天的春节期间，消费者投诉数量比上一年增长了34%，全国达到187万件。投诉主要集中在三大类：交通运输服务、住宿和在线活动票务。

交通投诉占总数的38%，主要集中在许多消费者所说的“技术军备竞赛”抢票上。尽管铁路运力有所扩大——高峰日期间增开了1200列火车——但在北京-哈尔滨、上海-成都、广州-武汉等热门线路，需求远远超过供应。第三方“抢票”软件的泛滥使情况更加复杂，这些软件允许支付了溢价费用的用户自动完成订票流程，实际上使那些试图通过官方渠道购票的人处于不利地位。中国铁路总公司承认了这一问题，并宣布对其订票平台进行技术升级，包括更先进的机器人检测系统，将在2027年春运前完成。

住宿类投诉占第二大份额，为29%，其中涉及通过在线平台预订的短租和民宿的纠纷增长尤为显著。最常见的投诉涉及“合同违约”——房东在入住前几周甚至几天单方面取消已确认的预订，然后以原价三到五倍的价格重新挂牌。在一个在社交媒体上广泛传播的案例中，一个六口之家以每晚800元的价格预订了云南大理的一家民宿，却在入住前48小时收到了取消通知；第二天，同一房源以每晚3600元的价格重新出现在平台上。这一事件引发了一场关于平台责任制的全国性辩论，消费者权益倡导者认为，平台应对房东的违约行为承担连带责任。

在线活动票务投诉同比增长了惊人的156%，主要是由复苏的音乐会和演出市场推动的。主要问题包括通过自动购票程序进行的系统性黄牛倒票、可能使票面价值增加30%-50%的神秘“服务费”，以及尽管收取了高价但座位分配不透明。

33. 【答案】B【解析】细节理解题。题干问：2026年春节期间，消费者投诉有多少件？根据第二段“the number of consumer complaints... reaching 1.87 million cases nationwide”，可知B项“187万件”正确。因此，选B。

34. 【答案】C【解析】细节理解题。题干问：中国铁路总公司承诺实施什么措施？根据第三段“The China Railway Corporation acknowledged the issue and announced a technical upgrade to its booking platform, including more sophisticated bot-detection systems”，可知C项“在其订票平台上安装更先进的机器人检测系统”正确。因此，选C。

35. 【答案】B【解析】例证题。题干问：文章引用大理民宿事件主要是为了说明什么？根据第四段“The most common grievance involved ‘contract cancellation’—hosts unilaterally canceling confirmed bookings... only to relist the property at rates three to five times the original price... The incident sparked a nationwide debate...”，可知该案例是为了说明“房东取消预订以更高价格重新挂牌”这一现象。因此，选B。

36. 【答案】B【解析】细节理解题。题干问：文章关于第三方抢票软件说明了什么？根据第三段“the proliferation of third-party ‘ticket-grabbing’ software, which allowed users who paid premium fees to automate the booking process, effectively disadvantaging those attempting to purchase tickets through official channels”，可知B项“它给了那些能负担得起溢价费用的用户不公平的优势”正确。因此，选B。

37. 【答案】C【解析】观点态度题。题干问：作者贯穿全文的语气最恰当的描述是什么？文章客观地分析了春节期间投诉激增的数据，并详细描述了交通、住宿、票务等各个领域的具体问题及其原因，呈现出一种“分析性的”和“关切的”语气。因此，选C。

Passage Three

【原文翻译】

吉大各专业课教材与学习资源
持续更新(持续更新中)

2026年的夏天很可能被铭记为绿色消费在中国跨越了一个关键门槛的季节——从少数环保人士的小众偏好转变为主流力量，重塑了行业、供应链和日常习惯。数字讲述了一个引人注目的故事：获得“中国绿色产品”认证的商品销售额在6月至8月间同比增长了67%；主要电商平台上与可持续性相关的搜索词飙升了214%；翻新电子产品市场扩大了89%，因为新一代消费者接受了循环经济原则。

在这些头条数字背后，是一个更复杂、并且在许多方面更有趣的转变。2026年的绿色消费浪潮与早期更试探性的转变不同之处，不仅在于其规模，更在于其深度——可持续选择在多大程度上被融入日常决策的框架，而不是被视为偶尔的、表演性的姿态。

考虑一下绿色消费者形象的变化。中国消费者协会2024年的一项调查发现，典型的有环保意识的购物者往往是女性、城市居民、年龄在28-40岁之间，并且相对富裕。到2026年8月，这一形象已大幅扩展。该协会对30个城市12000名受访者的最新调查发现，绿色消费在男性消费者（上升23个百分点）、三四线城市居民（上升31个百分点）以及45-60岁消费者（上升18个百分点）中均出现了显著增长。换句话说，绿色消费正在变得大众化。

这种转变背后的动机同样具有启示性。虽然环境问题仍然是首要驱动因素——62%的受访者将“保护地球”列为主要动机——但务实的考量正在增加。47%的人表示他们选择绿色产品是因为感受到的健康益处（无化学物质材料、节能电器带来的更好空气质量），而41%的人则提到了长期成本节省（更低的电费、更耐用的商品）。这种道德和实际动机的融合表明，绿色消费不是一个依赖于道德情感的短期趋势，而是对切实利益的一种理性回应。

经济涟漪效应是巨大的。中国的绿色产品认证体系在2024年覆盖了约8000个产品类别，到2026年年中已扩展到超过14000个类别。最初抵制认证成本的制造商现在正在积极争夺绿色认证，认识到“绿色溢价”——消费者愿意为认证可持续产品支付的额外金额——在婴儿产品、化妆品和高端家电等品类中可能高达25%。

然而，前进的道路并非没有障碍。其中最大的障碍是“漂绿”：即对产品环境效益做出未经证实或误导性声称的做法。在2026年的前八个月，国家市场监督管理总局调查了2847起涉嫌漂绿的案件，比2025年同期增长了76%。常见手段包括：在没有支持性认证的情况下使用“环保”或“天然”等模糊声明；使用绿色包装暗示其具有环保效益而实际情况并非如此；以及选择性披露——例如，突出一种可持续成分，同时掩盖对环境有害的制造过程。

解决“漂绿”问题需要多管齐下的方法。监管机构正在制定更严格的规定，定义什么是合法的绿色声明，并预计在2028年前逐步引入强制性第三方验证。消费者教育活动正在教导购物者要超越营销语言，检查政府认证标签。越来越多的独立监督组织正使用人工智能工具大规模扫描产品列表，将可疑的声明标记给监管机构审查。绿色消费革命，似乎正在进入其更成熟——也更苛刻——的阶段。

38. 【答案】C【解析】细节理解题。题干问：作者说绿色消费在2026年夏季“跨越了一个关键门槛”是什么意思？根据第一段“from a niche preference of the environmentally conscious few to a mainstream force”，可知C项“它从少数人的小众偏好转变为主流现象”正确。因此，选C。

39. 【答案】B【解析】细节理解题。题干问：根据文章，2024年至2026年间，哪类人群的绿色消费显著增长？根据第三段“found significant growth in green consumption among male consumers (up 23 percentage points), residents of third- and fourth-tier cities (up 31 points), and consumers aged 45 - 60 (up 18 points)”，可知B项“男性消费者、小城市居民和老年年龄群体”正确。因此，选B。

40. 【答案】D【解析】细节判断题。题干问：根据文章引用的调查，以下哪项没有被提及为绿色消费的动机？根据第四段“62% of respondents identified ‘protecting the planet’ ... Forty-seven percent said they chose green products because of perceived health benefits... while 41% cited long-term cost savings”，可知A、B、C三项均被提及为动机。D项“来自同龄人和同事的社会压力”文中未提及。因此，选D。

吉大各专业课教材与学习生
活政策信息(持续更新中)

41. 【答案】C【解析】词义猜测题。题干问：文中使用的“greenwashing”一词指的是什么？根据第六段第一句“The most significant of these is greenwashing: the practice of making unsubstantiated or misleading claims about a product's environmental benefits”，可知C项“关于产品环境效益的误导性声明”正确。因此，选C。

42. 【答案】B【解析】推理判断题。题干问：从文章中可以推断出关于中国绿色消费未来的什么信息？文章最后两段讨论了“漂绿”这一挑战以及监管、教育、技术等多方面的应对措施，并指出“绿色消费革命，似乎正在进入其更成熟——也更苛刻——的阶段”。因此，可推断出B项“它正在向一个更受监管和更成熟的阶段发展，尽管‘漂绿’等挑战依然存在”正确。因此，选B。

Part IV Writing (20 points)

【参考范文】

Towards a Safer Live-Streaming Shopping Environment

Live-streaming shopping, while revolutionary, is plagued by significant problems. False advertising and exaggerated product claims are rampant, as hosts often prioritize sales over truth. This erodes consumer trust and leads to financial losses.

To address these issues, a multi-stakeholder approach is essential. Government regulators should enforce stricter penalties for fraudulent claims and mandate transparent disclosure of all sponsorship deals. E-commerce platforms must take responsibility by implementing robust pre-screening mechanisms for live content and establishing clear, easily accessible channels for consumer complaints and refunds. Consumers themselves need to cultivate a critical mindset, verifying product claims with official certifications and exercising caution with “limited-time” offers.

In conclusion, through a combination of stricter regulation, platform accountability, and informed consumer behavior, the live-streaming marketplace can be transformed into a healthier environment where innovation and consumer protection go hand in hand.

吉大研究生入学英语分级考试 全真模拟卷(三) 详解

Part I Listening Comprehension (25 points)

1. 【答案】B【解析】细节理解题。问题问: 女士建议男士做什么? 根据对话中女士的回答 “Why don't you take the subway? The new Line 6 extension opened last month — it stops right at the east gate of campus and it's fully air-conditioned.” (你为什么不去坐地铁呢? 新开通的6号线延长线上个月开通了——它正好停在学校东门, 而且全程有空调), 可知B项 “使用公共交通代替骑自行车” 正确。

Conversation 2 (暴雨预警)

2. 【答案】C【解析】推理判断题。问题问: 从对话中可以推断出什么? 根据男士说 “Should we cancel our trip to the mountains tomorrow?” (我们应该取消明天的爬山计划吗?), 以及女士回答 “Absolutely. The local meteorological bureau just issued a notice that all mountain scenic areas will be closed tomorrow.” (当然。当地气象局刚刚发布通知, 所有山区景区明天将关闭), 可知C项 “由于安全原因, 爬山计划很可能被取消” 正确。

3. 【答案】B【解析】细节理解题。问题问: 女士对2026年过敏季说了什么? 根据女士说 “The 2026 pollen count in Beijing is 40% higher than the ten-year average. Doctors are calling it a ‘pollen super-season’ — warmer winters mean trees start releasing pollen earlier and in greater quantities.” (2026年北京的花粉数量比十年平均值高出40%。医生称其为 ‘花粉超级季’ ——更温暖的冬天意味着树木更早、更大量地释放花粉), 可知B项 “高花粉数量与更温暖的冬季气温有关” 正确。

4. 【答案】C【解析】细节理解题。问题问: 女士提供了什么节能建议? 根据女士说 “Have you tried setting it to 26° C instead of 22° C? The National Energy Conservation Week campaign recommends that temperature — every degree higher can cut energy consumption by about 6%.” (你试过把它调到26° C而不是22° C吗? 全国节能宣传周活动推荐那个温度——每调高一度可以减少约6%的能耗), 可知C项 “将空调设定到适中的较高温度” 正确。

5. 【答案】B【解析】细节理解题。问题问: 航班为什么延误了? 根据女士说 “That's because the storm is en route — a massive thunderstorm system is sitting right over our flight path. The 2026 summer has seen 30% more flight disruptions than last year, mostly due to severe convective weather.” (那是因为风暴正在途中——一个巨大的雷暴系统正好位于我们的航线上。2026年夏季的航班中断比去年增加了30%, 主要是由于剧烈的对流天气), 可知B项 “航线上有雷暴” 正确。

6. 【答案】B【解析】主旨大意题。问题问: 说话者主要在讨论什么? 根据男士说 “I used to go ice skating on Houhai Lake every winter... but my son has never had the chance. The lake hasn't frozen thick enough for skating in three years.” (我小时候每个冬天都去后海滑冰……但我儿子从未有过机会。湖面已经连续三年没有冻到足够厚可以滑冰了), 以及女士回应 “It's the same story across northern China... Some traditional winter festivals have had to switch to artificial ice rinks.” (在中国北方也是如此……一些传统的冬季节日不得不改用人工冰场), 可知B项 “由于气温升高, 传统冬季活动减少” 正确。

7. 【答案】B【解析】细节理解题。问题问: 为了减少碳排放, 女士的公司采取了什么政策? 根据女士说 “My firm now requires employees to take the high-speed rail for any domestic trip under 1,000 kilometers.” (我们公司现在要求员工在1000公里以内的国内旅行中乘坐高铁), 可知B项 “员工在较短的国内旅行中必须使用高铁” 正确。

8. 【答案】C【解析】细节理解题。问题问: 根据女士的说法, 是什么决定了外卖容器是否可回收? 根据女士说 “If it's contaminated with food residue, it goes in ‘other waste.’ ... only clean, dry packaging is accepted

消息推送(持续更新中)

for recycling.” (如果被食物残渣污染，就属于‘其他垃圾’……只有干净、干燥的包装才被接受回收)，可知C项“容器是否干净且无食物残渣”正确。

9. 【答案】B【解析】细节理解题。问题问：2026年5月，英国打破了什么纪录？根据原文 “The United Kingdom experienced its hottest May day on record when the village of Coningsby in Lincolnshire recorded 35.1° C” (英国经历了有记录以来最热的五月天，林肯郡科宁斯比村记录到35.1° C)，可知B项“英国历史上五月最高气温”正确。

10. 【答案】B【解析】细节理解题。问题问：2026年德里经历了多少天连续超过44° C的高温？根据原文 “Delhi recorded 16 consecutive days above 44° C” (德里记录了连续16天超过44° C的高温)，可知B项正确。

11. 【答案】B【解析】细节理解题。问题问：2026年7月，哪种天气现象影响了密西西比河流域？根据原文 “the Mississippi River basin suffered a ‘flash drought’ — rainfall deficits exceeding 60% over a six-week period” (密西西比河流域遭受了‘闪旱’——六周内降雨量不足超过60%)，可知B项正确。

12. 【答案】B【解析】细节理解题。问题问：根据文章，什么是厄尔尼诺现象？根据原文 “El Niño... is the warm phase of the El Niño – Southern Oscillation (ENSO) cycle. It occurs when... a pool of anomalously warm water to accumulate along the equatorial Pacific” (厄尔尼诺是厄尔尼诺-南方涛动循环的暖相位。当异常温暖的海水聚集在赤道太平洋沿岸时发生)，可知B项“一种涉及赤道东太平洋海水异常变暖的气候模式”正确。

13. 【答案】C【解析】细节理解题。问题问：到2026年7月下旬，Niño-3.4区域的海面温度异常是多少？根据原文 “sea surface temperature anomalies in the Niño-3.4 monitoring region... reached 1.9° C above the long-term mean” (Niño-3.4监测区域的海面温度异常达到比长期平均值高1.9° C)，可知C项正确。

14. 【答案】B【解析】细节理解题。问题问：关于厄尔尼诺与长期全球变暖的结合，提出了什么特别的担忧？根据原文 “the potential for El Niño 2026 to temporarily push global average temperatures beyond the 1.5° C threshold” (2026年厄尔尼诺可能暂时将全球平均气温推高至1.5° C阈值以上)，可知B项正确。

Passage 3 (中国碳达峰碳中和进展与全国节能宣传周)

15. 【答案】B【解析】细节理解题。问题问：与2025年同期相比，2026年上半年中国的碳强度下降了百分之多少？根据原文 “China's carbon intensity... declined by 5.2% in the first half of 2026 compared to the same period in 2025” (与2025年同期相比，2026年上半年中国的碳强度下降了5.2%)，可知B项正确。

16. 【答案】C【解析】细节理解题。问题问：2026年全国节能宣传周的主题是什么？根据原文 “Organized under the theme ‘Green Transition, Shared Future’” (以‘绿色转型，共享未来’为主题组织)，可知C项正确。

17. 【答案】C【解析】细节理解题。问题问：根据文章，2026年中国碳市场发生了什么新发展？根据原文 “China's carbon market... had expanded in 2026 to include the building materials and non-ferrous metals sectors” (中国的碳市场在2026年扩大到包括建材和有色金属行业)，可知C项正确。

Part II Cloze (10 points)

【原文翻译】

气候变化是人类面临的最大的(18)挑战之一。虽然国际谈判和政府政策占据了头条新闻，但普通人在(19)减少温室气体排放方面的作用已经成为环境讨论中日益突出的议题。

研究持续显示出一个悖论：公众对气候变化的认识从未如此之高——2026年皮尤研究中心的一项调查发现，19个国家的78%的人将气候变化视为一个主要的(20)威胁——然而个人行为改变却十分缓慢。这种环境态度与实际行为之间的差距，心理学家将其(21)称为“价值-行动差距”，这对气候倡导者来说既是挑战也是机遇。

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

几个心理(22)障碍有助于解释这种差异。首先,气候变化被视为一种遥远的威胁——在时间上、地理上和心理上都很遥远——这降低了立即改变行为的(23)紧迫性。其次,个人通常认为自己的个人行为太(24)微不足道,无法产生有意义的改变,这是一种被称为“生态瘫痪”的认知扭曲。第三,社会规范——关于什么是可接受行为的不成文规则——既可以促进也可以(25)阻碍可持续的选择。例如,如果在一个社区中节能被视为不寻常,那么无论个人信念如何,人们都不太可能采纳它。

解决这些障碍需要多层次的方法。在个人层面,提供(26)比较性反馈——例如向家庭展示他们的能源消耗与邻居相比如何——已被证明在促进节能方面非常有效。在社区层面,将可持续行为确立为可见的社会规范可以创造积极的同伴(27)压力。在政策层面,将可持续选择设为默认选项——例如,自动将家庭注册到可再生能源计划中,并允许选择退出——可以在不需要持续动机的情况下大幅提高参与率。

18. 【答案】A【解析】本题考查名词辨析。A) challenges 挑战; B) champions 冠军, 倡导者; C) charters 宪章; D) chapters 章节。句意: 气候变化是人类面临的最大的“挑战”之一。“one of the greatest challenges”是常见搭配。因此, 选A。

19. 【答案】A【解析】本题考查动词辨析。A) mitigating 减轻, 缓解; B) migrating 迁徙; C) militating (against) 妨碍, 产生不利影响; D) mimicking 模仿。句意: 普通人在“减少”温室气体排放方面的作用。mitigating greenhouse gas emissions 是固定搭配, 意为“减少温室气体排放”。因此, 选A。

20. 【答案】B【解析】本题考查名词辨析。A) treat 款待, 治疗; B) threat 威胁; C) thread 线; D) thrust 推力, 要点。句意: 19个国家的78%的人将气候变化视为一个主要“威胁”。a major threat 意为“主要威胁”。因此, 选B。

21. 【答案】B【解析】本题考查动词短语辨析。A) indicate (to) 向……表明; B) refer (to) 指的是, 称为; C) reflect (on) 反思; D) infer (from) 从……推断。句意: 心理学家将其“称为”“价值-行动差距”。refer to...as... 是固定搭配, 意为“将……称为……”。因此, 选B。

22. 【答案】A【解析】本题考查名词辨析。A) barriers 障碍; B) barricades 路障, 街垒; C) barnacles 藤壶(附着在船底的甲壳动物); D) barristers 大律师。句意: 几个心理“障碍”有助于解释这种差异。psychological barriers 意为“心理障碍”。因此, 选A。

23. 【答案】B【解析】本题考查名词辨析。A) urge 冲动, 强烈要求; B) urgency 紧迫性; C) urbanity 温文尔雅; D) utterance 言论, 发声。句意: 这降低了立即改变行为的“紧迫性”。the urgency of immediate behavioral change 意为“立即改变行为的紧迫性”。因此, 选B。

24. 【答案】A【解析】本题考查形容词辨析。A) trivial 微不足道的, 琐碎的; B) trivialize 使……显得琐碎(动词); C) triumphant 胜利的, 得意的; D) tributary 支流, 附属的。句意: 个人通常认为自己的个人行为太“微不足道”了。too trivial to make a difference 意为“太微不足道以至于无法产生改变”。因此, 选A。

25. 【答案】B【解析】本题考查动词辨析。A) inhabit 居住于; B) inhibit 阻碍, 抑制; C) inherit 继承; D) initiate 开始, 发起。句意: 社会规范既可以促进也可以“阻碍”可持续的选择。“facilitate or inhibit”形成对比, 意为“促进或阻碍”。因此, 选B。

26. 【答案】B【解析】本题考查形容词辨析。A) comparable 可比较的, 类似的; B) comparative 比较的, 相对的; C) comparing 比较(动词的现在分词); D) comparison 比较(名词)。句意: 提供“比较性”反馈。原文中破折号后的内容解释了这种反馈的具体形式: “showing households how their energy consumption compares to that of their neighbors”(向家庭展示他们的能源消耗与邻居相比如何)。这明确说明, 这种反馈的核心是进行对比, 将“自己的”与“邻居的”数据进行并列比较, 从而让居民看到差异。因此, 这种反馈的本质是“比较性的反馈”, 即“comparative feedback”, 这是一个在行为心理学和环保倡导中非常常见的固定

吉大各专业电子教材与学习资源
持续更新中(持续更新中)

搭配，意为“将个人表现与群体平均水平进行比较的反馈”。因此，选B。

27. 【答案】A 【解析】本题考查名词辨析。A) pressure 压力；B) treasure 宝藏；C) leisure 休闲；D) measure 措施，测量。句意：可以创造积极的同伴“压力”。peer pressure 是固定搭配，意为“同伴压力”。因此，选A。

Part III Reading Comprehension (45 points)

Passage One

【原文翻译】

2026年前八个月，六大洲遭遇了一系列无情的极端天气事件，这给气候科学家的警告——地球气候系统正在进入未知领域——增添了紧迫的分量。

在欧洲，英国经历了有记录以来最热的五月天，林肯郡的科宁斯比村在5月19日录得 35.1°C ——这个温度对于英格兰的晚春来说更像是西班牙南部的仲夏。英国气象局确认，此前自1922年以来一直保持的 32.8°C 的五月纪录，在同一天被英格兰中部和东部的14个气象站超越。英国国家卫生署报告称，与高温相关的急诊就诊人数增加了42%，铁路运营商因轨道温度接近 50°C 而在全网络实施了限速措施。

南亚的情况则更为严峻。印度北部和巴基斯坦遭遇了有史以来最持久、最强烈的热浪之一，拉贾斯坦邦的法洛迪镇在6月3日达到了 48.2°C 。德里连续16天录得超过 44°C 的高温——这一前所未有的纪录使该市的电网不堪重负，因为空调需求激增了35%，高于基准水平。官方数据将全地区超过1400例额外死亡归因于高温相关原因。在巴基斯坦的信德省，极端高温和季风洪水的结合——科学家称之为“复合极端事件”——导致大约80万人流离失所。

美洲也未能幸免。美国西南部上空持续存在的热穹在亚利桑那州凤凰城连续五天出现超过 47.8°C 的高温，而密西西比河流域则遭受了“闪旱”——在六周内降雨量不足超过60%，导致支流干涸，中断了运输农产品的驳船交通，并引发了对秋季歉收的担忧。在南美洲，巴西的亚马逊地区经历了120年有记录以来最严重的干旱，包括内格罗河在内的主要支流降至自1902年开始测量以来的最低水位。

世界天气归因倡议是一个由气候科学家组成的合作组织，分析极端天气与气候变化之间的联系。该组织在2026年8月得出结论，如果没有人为造成的变暖，这些事件中的许多将会“几乎不可能发生”。

28. 【答案】B 【解析】主旨大意题。题干问：以下哪项最能概括文章主旨？文章第一段点明主旨，即2026年前八个月六大洲经历了极端天气，末段引用研究结论指出气候变化是关键因素。A项“极端天气仅限于少数特定地区”与原文“六大洲”矛盾；C项“各国政府成功控制了影响”与原文描述的严重情况不符；D项“极端天气主要影响欧洲农业”过于片面。因此，B项“2026年见证了多个大陆广泛而严重的极端天气，气候变化被确定为关键贡献因素”正确。因此，选B。

29. 【答案】B 【解析】细节理解题。题干问：根据文章，在五月热浪期间英国的铁路服务发生了什么？根据第二段末句“rail operators imposed speed restrictions across the network as track temperatures approached 50°C ”，可知B项“由于轨道温度高，实施了限速”正确。因此，选B。

30. 【答案】C 【解析】细节理解题。题干问：文章提到巴基斯坦信德省有80万人流离失所是由于什么？根据第三段末句“In Pakistan's Sindh province, the combination of extreme heat and monsoon flooding... displaced an estimated 800,000 people”，可知C项“极端高温和季风洪水的结合”正确。因此，选C。

31. 【答案】B 【解析】细节理解题。题干问：文章将密西西比河流域的干旱描述为“闪旱”是因为什么？根据第四段“the Mississippi River basin suffered a ‘flash drought’ — rainfall deficits exceeding 60% over a six-week period”，可知“闪旱”的特点是发展迅速，在短短六周内降雨量严重不足。因此，B项“它发展得非常迅速，仅在六周内就出现了严重降雨不足”正确。因此，选B。

32. 【答案】C 【解析】细节理解题。题干问：世界天气归因倡议在2026年8月得出了什么结论？根据文

持续更新中(持续更新中)

章末段“Many of these events would have been ‘virtually impossible’ without human-induced warming”，可知C项“如果没有人为造成的变暖，许多极端事件将‘几乎不可能发生’”正确。因此，选C。

Passage Two

【原文翻译】

2026年8月，世界气象组织(WMO)正式确认，厄尔尼诺现象已在热带太平洋形成，为气候模型预测的、一代以来最强的厄尔尼诺事件之一奠定了基础。对于一个已经承受着比工业化前水平高 1.45°C 的变暖后果的世界来说，强厄尔尼诺的到来不仅仅代表着一个额外的天气扰动，更是对全球预测、准备和应对气候驱动危机能力的压力测试。

厄尔尼诺——西班牙语意为“男孩”，指的是基督圣婴，因为历史上秘鲁渔民在圣诞节前后观察到这一现象——是厄尔尼诺-南方涛动(ENSO)循环的暖相位。当通常将温暖表层水向西推过太平洋的信风减弱或逆转时，就会发生厄尔尼诺现象，使得异常温暖的海水聚集在赤道太平洋沿岸，特别是秘鲁和厄瓜多尔沿海。这种海洋热量的重新分布扰乱了全球的大气环流模式，产生了WMO所描述的“全球天气的重新组织”。

2026年的厄尔尼诺事件以惊人的速度发展。到7月下旬，厄尔尼诺-3.4监测区域——赤道中太平洋的一个矩形区域，被认为是典型的ENSO指数区域——的海面温度距平达到比长期平均值高 1.9°C 。这一读数的重要性不仅在于其幅度，还在于其时机：自1997-1998年事件以来，在发展阶段还没有记录到如此强烈的异常，而1997-1998年事件仍然是极端厄尔尼诺事件的基准。

级联的后果已经可以感受到。在东南亚，包括泰国和越南的主要水稻产区，2026年季风季节的降雨量比平均水平低了30-40%，在全球粮食价格已经处于高位之际威胁到了产量。澳大利亚气象局警告说，即将到来的南半球夏季山火风险增加，这令人不安地与2019-2020年灾难性的“黑色夏季”大火相提并论。在非洲之角——埃塞俄比亚、索马里和肯尼亚——社区仍在从2020-2023年毁灭性的干旱中恢复，而预计的降雨量高于正常水平则带来了洪水和山体滑坡的矛盾威胁。

也许最令人担忧的是，2026年厄尔尼诺有可能暂时将全球平均气温推高至 1.5°C 阈值以上，而《巴黎协定》将这一阈值确定为关键护栏。WMO在8月份的更新估计，2026年至2028年间至少有一年升温超过 1.5°C 的可能性为66%。WMO秘书长佩特里·塔拉斯博士警告说：“这并不是说《巴黎协定》的目标将被永久突破——那需要持续几十年的平均升温——但这将让我们一瞥我们试图避免的世界。”

因此，2026年的厄尔尼诺既是警告，也是当务之急：警告全球气候系统的容错空间正在缩小，并且当务之急是加速对适应、早期预警系统以及摆脱化石燃料转型的投资，以免这“一瞥”成为永久现实。

33. 【答案】C【解析】主旨大意题。题干问：文章的主要目的是什么？文章首先介绍了厄尔尼诺现象的性质（第二段），然后详细描述了2026年事件的严重性（第三段），并讨论了其潜在后果（第四、五段）。因此，C项“解释厄尔尼诺的性质，描述2026年事件的严重性，并讨论其潜在后果”正确。A项“提供自19世纪以来所有厄尔尼诺事件的历史概述”过于宽泛；B项“认为2026年厄尔尼诺是一种自然现象，与气候变化无关”与原文观点相反；D项“促进厄尔尼诺影响地区的旅游业”毫无根据。因此，选C。

34. 【答案】B【解析】细节理解题。题干问：根据文章，厄尔尼诺现象是如何发展的？根据第二段“*It occurs when trade winds that normally push warm surface waters westward across the Pacific weaken or reverse...*”，可知B项“通常将温暖海水向西推过太平洋的信风减弱或逆转”正确。因此，选B。

35. 【答案】B【解析】细节理解题。题干问：文章将2026年厄尔尼诺的发展与之前的哪个事件进行了比较？根据第三段末句“*such a strong anomaly has not been recorded at this stage of the development cycle since the 1997 - 1998 event*”，可知是与1997-1998年厄尔尼诺事件进行比较。因此，选B。

36. 【答案】B【解析】细节理解题。题干问：在非洲之角，厄尔尼诺的预期影响被描述为“矛盾的”是因为什么？根据第四段末句“*In the Horn of Africa... where communities are still recovering from the devastating*”，可知是因为社区仍在从毁灭性的干旱中恢复。因此，选B。

活政策信息(持续更新中)

2020 - 2023 drought, the expected shift to above-normal rainfall brings the paradoxical threat of floods and landslides”,可知B项“在从干旱中恢复后，社区现在面临洪水和山体滑坡的威胁”正确。因此，选B。

37. 【答案】B【解析】细节理解题。题干问：WMO秘书长对全球气温超过 1.5°C 阈值发出了什么警告？根据第五段WMO秘书长的话“This is not to say that the Paris target will be permanently breached... but it will provide a glimpse of the world we are trying to avoid”，可知B项“暂时超标将让我们一瞥《巴黎协定》试图阻止的情况”正确。因此，选B。

Passage Three

【原文翻译】

如果说2026年的夏天给了国际社会什么教训，那就是人类应对极端高温的治理结构与挑战的规模和复杂性完全不相称。随着六大洲的气温记录被打破——英国春季 35.1°C ，印度平原 48.2°C ，美国沙漠城市 47.8°C ——积累的证据使一件事变得明确无误：曾经是“极端”的情况正在迅速成为常态，而为更凉爽、更稳定的气候设计政策架构正在压力下不堪重负。

治理差距在多个层面显现出来。在地方层面，最直接的表现是基础设施不足。世界上大多数城市都是为20世纪而非21世纪的气候设计和建造的。城市热岛效应——密集的混凝土、沥青以及建筑物和车辆产生的废热使城市温度比周边农村地区高出 $3-8^{\circ}\text{C}$ ——加剧了问题。在德里，2026年6月连续16天超过 44°C 的高温压垮了应急服务，卫星测量显示，在最热的午后，人口密集社区的地表温度达到了 56°C ——在这种条件下，户外劳动在生理上已不可能，甚至没有主动冷却的室内空间也变得危险。该市为3300万大都市人口提供的公共避暑中心不足200个。

在国家层面，挑战在于机构碎片化。高温治理——在它存在的范围内——通常分散在卫生部门、气象机构、城市规划部门、劳动监管机构和应急管理机构之间，彼此之间几乎没有协调。2026年发表在《气候政策》期刊上的一项研究审查了40个国家的高温准备框架，发现只有11个国家正式指定了具有跨部门权力的“高温事务官”，只有7个国家制定了法律上可强制执行的工作场所高温标准。在美国，尽管高温是与天气相关的死亡率的主要原因——超过飓风、洪水和龙卷风的总和——但截至2026年年中，职业安全与健康管理局仍未颁布联邦高温标准，这使得农业、建筑和仓储行业的工人依赖于各州级规则拼凑而成的、不均衡的保护。

在国际层面，治理真空更为明显。与温室气体排放不同——后者有《联合国气候变化框架公约》和《巴黎协定》形式的全面（尽管不完美）多边条约框架——目前没有专门针对高温适应和恢复能力的等效国际机制。《仙台减灾框架》提供了一些指导，但其对极端高温的处理充其量是粗略的。联合国秘书长在2026年7月呼吁制定“全球高温行动议程”——包括普及早期预警系统、标准化高温健康协议以及为发展中国家的城市降温基础设施提供专项融资——这是为解决这一制度赤字所做的首批认真努力之一，但成员国是否会将言论转化为具有约束力的承诺仍不确定。

前进的道路需要根本性的重新构想。极端高温不能再被视为一种例外情况，通过临时措施来管理——当温度飙升时开放避暑中心，当危险已经来临时发出警告。相反，它必须被嵌入到治理的永久结构中：强制要求被动降温设计的建筑规范、优先考虑绿地和反光表面的城市规划、将高温视为职业危害的劳动法，以及将高温恢复能力视为全球公共产品的国际融资机制。2026年的夏天不会是最后一次。它究竟是系统性改革的催化剂，还是恶化轨迹中的又一个数据点，取决于各国政府在其后做出的选择。

38. 【答案】B【解析】主旨大意题。题干问：作者在本篇文章的核心论点是什么？文章开篇即指出治理结构与挑战不相称，随后从地方、国家、国际三个层面详细阐述了“治理差距”，最后一段呼吁进行“根本性的重新构想”。因此，B项“现有的治理结构不足以应对日益严重的极端高温挑战，迫切需要系统性改革”正确。A项“极端高温是无法避免的自然现象，无需政策应对”与全篇呼吁改革相悖；C项“仅靠技术方案就能解决高温危机，无需任何政策改变”文中未提及；D项“发展中国家应单独负责应对高温挑战”

更多学习资源，关注吉井解学公众号

吉大各专专业电子教材与学习生
活政策信息(持续更新中)

与文章呼吁国际合作的观点不符。因此，选B。

39. 【答案】B【解析】细节理解题。题干问：根据文章，城市热岛效应可以使城市温度比周边农村地区高出多少？根据第二段“Urban heat island effects... raise city temperatures 3 - 8° C above surrounding rural areas”，可知B项“3-8° C”正确。因此，选B。

40. 【答案】B【解析】细节理解题。题干问：发表在《气候政策》上的对40个国家高温准备框架的审查发现了什么？根据第三段“found that only 11 had formally designated ‘heat officers’ with cross-departmental authority”，可知B项“只有11个国家正式指定了具有跨部门权力的‘高温事务官’”正确。因此，选B。

41. 【答案】C【解析】细节理解题。题干问：文章指出，截至2026年年中，美国的情况如何？根据第三段末句“the Occupational Safety and Health Administration had still not promulgated a federal heat standard... despite heat being the leading cause of weather-related mortality”，可知C项“尽管高温是与天气相关死亡率的主要原因，但尚未颁布联邦工作场所高温标准”正确。因此，选C。

42. 【答案】B【解析】观点态度题。题干问：作者在最后一段的语气最恰当的描述是什么？最后一段作者指出“极端高温不能再被视为一种例外情况”，必须“嵌入到治理的永久结构中”，并说“2026年的夏天不会是最后一次。它究竟是系统性改革的催化剂，还是恶化轨迹中的又一个数据点，取决于各国政府在其后做出的选择”。这表明作者认为改革是必要的，但结果取决于政府的选择，因此是“谨慎乐观但紧迫的，强调系统性改革是必要的，行动窗口期开启但正在缩小”。因此，选B。

Part IV Writing (20 points)

【参考范文】

Individual Actions Matter in the Fight Against Climate Change

While climate change is a global problem requiring international cooperation, individual actions are far from negligible. They create the cultural shift that makes broader policy changes possible. When millions of people adopt sustainable habits, they signal to businesses and governments that there is public demand for greener alternatives, thereby accelerating the transition to a low-carbon economy.

There are several concrete steps ordinary people can take. First, reduce energy consumption at home. Simple actions like switching to LED bulbs, unplugging electronics when not in use, and using energy-efficient appliances can significantly cut household carbon emissions. Second, adopt sustainable transportation. Walking, cycling, using public transit, or carpooling not only reduces one's carbon footprint but also eases traffic congestion and improves air quality. Third, make mindful consumption choices. This includes reducing food waste, choosing locally sourced and seasonal produce, avoiding single-use plastics, and supporting companies with transparent environmental practices.

In conclusion, while individual actions alone cannot solve the climate crisis, their collective impact is substantial. When combined with systemic policy changes, they form a powerful force for transformation. Every small step counts, and together, they can build a more sustainable and resilient future.

吉大研究生入学英语分级考试 全真模拟卷（四）详解

Part I Listening Comprehension (25 points)

1. 【答案】B【解析】细节理解题。问题问：女士建议男士做什么？根据对话中女士的回答 “They release new appointment slots every morning at 7:00 sharp. If you log in exactly at that time, your chances are much better.” (他们每天早晨7点整放出新的预约名额。如果你正好在那个时间登录，机会会大得多)，可知B项“在早上7点登录预约系统，那时新名额会放出”正确。

2. 【答案】C【解析】细节理解题。问题问：女士建议男士如何应对他的血压问题？根据对话中女士说 “The 2026 National Health Commission guidelines... recommend lifestyle changes — cutting sodium intake... doing 150 minutes of moderate exercise... and monitoring at home for three months before even considering medication.” (2026年国家卫健委指南建议改变生活方式——减少钠摄入……进行150分钟中等强度运动……在家监测三个月，然后再考虑用药)，可知C项“采纳生活方式调整建议并在家监测血压”正确。

3. 【答案】B【解析】推理判断题。问题问：女士对健身房的“心理健康”会员套餐说了什么？根据女士说 “it aligns with a real trend... the yoga-and-meditation combination has decent evidence behind it — a Shanghai Jiao Tong University study found an 8-week program reduced anxiety scores by 31%.” (它符合一个真实趋势……瑜伽和冥想的结合有不错的证据支持——上海交通大学的一项研究发现，一个为期8周的项目将焦虑评分降低了31%)，可知B项“它反映了一项国家倡议，并且有一些科学依据”正确。

4. 【答案】B【解析】细节理解题。问题问：女士对生酮饮食说了什么？根据女士说 “a comprehensive 2026 review... found that while keto can produce short-term weight loss, the Mediterranean diet and traditional Chinese dietary pattern... are the only ones consistently associated with both physical and mental health benefits over the long term.” (2026年的一项全面综述发现，虽然生酮饮食可以产生短期减重效果，但地中海饮食和传统中式饮食模式……是唯一一个与长期身心健康益处持续相关的饮食模式)，可知B项“长期证据支持地中海饮食和传统中式饮食模式”正确。

5. 【答案】B【解析】细节理解题。问题问：女士对改善男士的睡眠有何建议？根据女士说 “Try putting your phone in another room and reading a physical book for 30 minutes before bed” (尝试把手机放在另一个房间，睡前读一本纸质书30分钟)，可知B项“把手机放在卧室外，睡前读一本纸质书”正确。

Conversation 6 (疫苗接种)

6. 【答案】A【解析】细节理解题。问题问：女士对目前的HPV疫苗接种计划说了什么？根据女士说 “The 2026 expanded national immunization program now offers free HPV vaccination to all girls and women aged 9 to 26. In 15 pilot cities... free vaccination has also been extended to boys and young men in the same age range.” (2026年扩大的国家免疫计划现在向所有9至26岁的女孩和女性提供免费HPV疫苗接种。在15个试点城市……免费接种也已扩大到同一年龄段的男孩和年轻男性)，可知A项“26岁以下的女性可以免费接种，一些城市现在也包括年轻男性”正确。

7. 【答案】B【解析】推理判断题。问题问：女士鼓励男士做什么？根据女士说 “The campus center offers completely confidential services... Why not just go for one session and see how it feels?” (校园中心提供完全保密的服务……为什么不去试一次，看看感觉如何呢？)，可知B项“去校园心理咨询中心至少进行一次咨询”正确。

8. 【答案】B【解析】细节理解题。问题问：女士对“健康体重管理倡议”说了什么？根据女士说 “it's one of the 2026 ‘Ten Practical Health Services for the People’ ... The initiative offers free nutrition counseling and group exercise programs at community health centers.” (这是2026年‘卫生健康系统为民服务十件实事’之

活政策信息(持续更新中)

一……该倡议在社区卫生中心提供免费营养咨询和团体运动项目)，可知B项“它是2026年国家健康服务包的一部分，提供免费咨询和运动项目”正确。

9. 【答案】C【解析】细节理解题。问题问：根据文章，中国目前持证临床心理学家与人口的比例是多少？根据原文“China has roughly 40,000 licensed clinical psychologists, yielding a ratio of one per 35,000 citizens”（中国约有4万名持证临床心理学家，比例为每3.5万名公民中有一名），可知C项“每3.5万人中有一名心理学家”正确。

10. 【答案】C【解析】细节理解题。问题问：清华大学AI系统在识别需要专业干预的病例方面达到了多少准确率？根据原文“it achieved an 87% accuracy rate in identifying cases requiring professional intervention”（它在识别需要专业干预的病例方面达到了87%的准确率），可知C项正确。

11. 【答案】B【解析】细节理解题。问题问：李晓明博士用什么术语来描述AI与人类治疗师之间的预期关系？根据原文“Conference chair Dr. Li Xiaoming described this as a ‘collaborative intelligence’ model”（大会主席李晓明博士将其描述为一种‘协作智能’模式），可知B项正确。

12. 【答案】C【解析】细节理解题。问题问：文中提到的国产眼动追踪眼镜的大致价格是多少？根据原文“the domestically produced glasses have brought the price down to approximately 4,800 yuan”（国产眼镜已将价格降至约4800元），可知C项“约4800元”正确。

13. 【答案】C【解析】细节理解题。问题问：在临床试验中，眼动追踪系统对重度抑郁症的筛查准确率是多少？根据原文“the system demonstrated a screening accuracy of approximately 80% for major depressive disorder”（该系统对重度抑郁症的筛查准确率约为80%），可知C项正确。

14. 【答案】B【解析】细节理解题。问题问：首席研究员如何描述眼动追踪设备在心理健康护理中的作用？根据原文“the mental health equivalent of a ‘blood pressure cuff for mental health’ ... for large-scale population screening”（相当于心理健康的‘血压计’……用于大规模人群筛查），可知B项“作为‘心理健康的血压计’——一种筛查工具”正确。

15. 【答案】B【解析】细节理解题。问题问：根据2026年健康倡议，城市地区社区心理健康服务站的目标是什么？根据原文“the target is one community mental health station for every 50,000 residents”（目标是每5万名居民设一个社区心理健康服务站），可知B项“每5万名居民有一个服务站”正确。

16. 【答案】C【解析】细节理解题。问题问：政府通过三年加速培训计划旨在培训多少额外的心理健康工作者？根据原文“the government launched an accelerated training program aiming to produce 30,000 additional mental health workers over a three-year period”（政府启动了一个加速培训计划，旨在三年内培养3万名额外的心理健康工作者），可知C项正确。

17. 【答案】C【解析】细节理解题。问题问：根据文章，目前有多少百分比的中国成年人受到肥胖或超重的影响？根据原文“obesity and overweight now affect more than 50% of Chinese adults”（肥胖和超重现在影响超过50%的中国成年人），可知C项“超过50%”正确。

Part II Cloze (10 points)

【原文翻译】

几十年来，医学界将身体健康和心理健康视为完全独立的领域——这种（18）划分已被当代神经科学证明不仅人为，而且适得其反。现在，（19）越来越多的证据表明，定期体育锻炼是预防和（20）缓解抑郁、焦虑和压力相关障碍症状的最有效干预措施之一。

在生物学层面，运动通过多种途径发挥作用。体育锻炼会刺激内啡肽、血清素和多巴胺的释放——这些神经递质（21）调节情绪、愉悦感和动力。同样重要的是，定期运动（22）减弱了身体对压力的皮质醇反应，这意味着与（23）久坐不动的人相比，活跃的人面对心理挑战时，压力激素的激增明显更小。随着时间的推

吉大各专业课教材与学习资源
持续更新中(持续更新中)

移，如果不加以控制，慢性压力会（24）加剧抑郁症状，可能将一个人从轻度（25）抑郁状态推向全面的重度抑郁发作。

运动的心理益处同样深远。体育锻炼提供了一种掌控感和自我效能感，可以对抗抑郁的特征——无助感和（26）压抑感。尤其是团体运动，将体育锻炼的生化益处与社会联系结合起来，直接针对伴随情绪障碍的社交退缩和孤立。对于某些患者来说，这种双重效应强大到足以（27）缓解对药物的需求——不是通过掩盖症状，而是通过解决其潜在的生化和社会心理根源。

尽管有这些证据，但只有不到15%的心理健康从业者将运动常规纳入他们的治疗方案。弥合研究与临床实践之间的差距，代表了当代心理健康保健中最有前景的前沿领域之一。

18. 【答案】A【解析】本题考查名词辨析。A) division 划分，分隔；B) diversion 转移，消遣；C) dividend 红利，股息；D) divination 占卜，预测。句意：医学界将身体健康和心理健康视为完全独立的领域——这种“划分”已被证明是人为的。a division 指代前文“将身心视为独立领域”的划分行为。因此，选A。

19. 【答案】D【解析】本题考查形容词辨析。A) molding 塑造的；B) mowing 割草的；C) mourning 哀悼的；D) mounting 越来越多的，不断增加的。句意：现在，“越来越多的”证据表明体育锻炼是有效的干预措施。a mounting body of evidence 是固定搭配，意为“越来越多的证据”。因此，选D。

20. 【答案】C【解析】本题考查动词辨析。A) aggravating 加剧；B) elevating 提升；C) alleviating 缓解，减轻；D) relegating 降级，使降职。句意：定期体育锻炼是预防和“缓解”抑郁、焦虑等症状的最有效干预措施之一。alleviating symptoms 意为“缓解症状”。因此，选C。

21. 【答案】B【解析】本题考查动词辨析。A) relegate 降级；B) regulate 调节；C) regurgitate 反刍，重复；D) regenerate 再生。句意：这些神经递质“调节”情绪、愉悦感和动力。neurotransmitters regulate... 是常见搭配，意为“神经递质调节……”。因此，选B。

22. 【答案】A【解析】本题考查动词辨析。A) dampens 抑制，减弱；B) damages 损害；C) darkens 使变暗；D) dazzles 使目眩。句意：定期运动“减弱”了身体对压力的皮质醇反应。dampens the cortisol response 意为“减弱皮质醇反应”。因此，选A。

23. 【答案】A【解析】本题考查形容词辨析。A) sedentary 久坐不动的；B) sedimentary 沉积的；C) seditious 煽动性的；D) seductive 诱人的。句意：与“久坐不动”的人相比，活跃的人压力激素激增减小。sedentary counterparts 意为“久坐不动的同龄人/对应人群”。因此，选A。

24. 【答案】B【解析】本题考查动词辨析。A) alleviate 缓解；B) aggravate 加剧；C) elevate 提升；D) deliberate 仔细考虑。句意：慢性压力会“加剧”抑郁症状。因此，选B。

25. 【答案】C【解析】本题考查名词辨析。A) repression 压抑（心理机制）；B) oppression 压迫；C) depression 抑郁，沮丧；D) suppression 压制，抑制。句意：将一个人从轻度“抑郁”状态推向全面的重度抑郁发作。mild depression 是常见搭配，指“轻度抑郁”。因此，选C。

26. 【答案】A【解析】本题考查名词辨析。A) oppression 压迫；B) repression 压抑，抑制；C) expression 表达；D) aggression 攻击性。句意：对抗抑郁的特征——无助感和“压抑感”。“feelings of helplessness and oppression” 是一个在描述抑郁情绪时常见的搭配，意为“无助和被压迫感”，共同强调人感到被某种力量（如生活压力、疾病）压垮、无法挣脱的状态。而repression 意为“压抑，抑制”。在心理学中，这是一个非常专业的术语，特指弗洛伊德精神分析学派中的一种防御机制，即个体无意识地将痛苦的记忆、冲动或欲望排挤出意识之外。它强调的是“主动地、无意识地压抑”，而不是“被压迫、被重负压垮”的这种感觉。因此，选A。

27. 【答案】D【解析】本题考查动词辨析。A) elevate 提升；B) relegate 降级；C) deliberate 仔细考虑；D) alleviate 缓解，减轻。句意：这种双重效应强大到足以“缓解”对药物的需求。alleviate the need for medication

吉大各专业课教材与学习生
活政策信息(持续更新中)

意为“减轻对药物的需求”。因此，选D。

Part III Reading Comprehension (45 points)

Passage One

【原文翻译】

2026年3月，第三届全国社会心理服务创新发展大会在北京召开，以“AI+互联网+心理服务”为主题，汇聚了2000多位专家。这次会议标志着中国应对世界卫生组织所称的“全球心理健康危机”的一个关键转折点——这场危机被疫情加深并推入公众意识。

统计数据令人震惊。中国心理健康调查发现，约有18.5%的中国成年人——近2亿人——在过去一年中经历过可诊断的心理健康状况，但只有不到15%的人接受了专业护理。瓶颈是结构性的：中国约有4万名持证临床心理学家，导致每3.5万公民中只有一名心理学家。以这种能力，大多数需要帮助的人根本无法通过常规渠道获得服务。

基于AI的解决方案正在出现以填补这一空白。大会上展示的几个平台表明，在临床数据集上训练并由经验丰富的治疗师监督的大型语言模型，可以进行初步筛查访谈，其准确性接近初级临床医生。清华大学开发的一个系统——已在12个省份部署——到2026年3月已处理了230万次咨询，识别出87%需要专业干预的病例，同时为症状较轻的患者提供基于证据的自我帮助资源。

至关重要的是，开发者和临床医生都强调，AI并不是用来替代人类治疗师的。大会主席李晓明博士指出：“治疗联盟——治疗师与来访者之间基于信任的关系——仍然是所有心理治疗模式中治疗效果的最强预测因素。AI可以管理‘前门’——筛查、分诊和心理教育——但最深层的治愈仍然需要真正的人类存在。”

大会还讨论了伦理护栏。与会者呼吁在与AI系统互动时强制透明化、数据收集的明确知情同意，以及为基于AI的心理健康工具建立国家认证框架。会议结束时，14个省份宣布计划到2027年将AI心理健康筛查整合到初级医疗系统中——这一发展如果实现，将代表着AI在公共心理健康领域世界上最大规模的部署之一。

28. 【答案】C【解析】细节理解题。题干问：根据文章，大约有多少百分比的中国成年人心理健康状况患者接受了专业护理？根据第二段“yet fewer than 15% received professional care”，可知C项“少于15%”正确。因此，选C。

29. 【答案】C【解析】细节理解题。题干问：清华大学的AI系统主要设计用来做什么？根据第三段末句“identifying 87% of cases requiring professional intervention while providing evidence-based self-help resources to those with milder symptoms”，可知C项“进行初步筛查，为轻症患者提供自助资源，同时将严重病例分诊给专业人员”正确。因此，选C。

30. 【答案】C【解析】细节理解题。题干问：根据李晓明博士的说法，什么是成功的心理治疗效果的最强预测因素？根据第四段“The therapeutic alliance — the trust-based relationship between therapist and client — remains the single strongest predictor of treatment outcomes”，可知C项“治疗师与来访者之间基于信任的治疗关系”正确。因此，选C。

31. 【答案】D【解析】细节判断题。题干问：以下哪项伦理保障措施未被提及是会议上讨论的？A项“与AI互动时的强制透明化”、B项“数据收集的明确知情同意”、C项“AI心理健康工具的国家认证框架”均在第五段提及。D项“对所有AI治疗用户的强制政府补贴”文中未提及。因此，选D。

32. 【答案】B【解析】细节理解题。题干问：会议结束时，14个省份做出了什么承诺？根据末段“14 provinces had announced plans to integrate AI mental health screening into primary care systems by 2027”，可知B项“到2027年将AI心理健康筛查整合到初级医疗系统中”正确。因此，选B。

Passage Two

【原文翻译】

吉大专业电子教材与学习资源
海量信息(持续更新中)

2026年6月,《科技日报》发表了一篇关于非药物干预治疗精神疾病迅速发展格局的全面专题报道——这一领域直到最近才被边缘化,处于主流精神病学实践的边缘。该报道详细介绍了多项本土创新,它们正在重塑中国如何检测、监测和治疗心理健康状况。

其中最引人注目的是一款国产眼动追踪系统,由中国科学院心理研究所与一家杭州医疗技术公司合作开发。该设备采用轻量级眼镜形式,嵌入红外摄像头,可实时捕获三类眼部数据:注视持续时间(眼睛在情绪化图像上停留的时间)、扫视速度(眼睛在焦点之间移动的速度)以及瞳孔对情感刺激的反应扩张。机器学习算法将这些生物特征签名与包含8000多例确诊病例的临床数据库进行比对,以计算风险概况。

使这一迭代版本与早期研究级系统不同的,是其极低的成本。实验室眼动追踪设备历史上每台成本高达20万元——仅限于资金充足的学术机构——而国产眼镜已将价格降至约4800元,大约相当于一款中档智能手机的价格。在涵盖五家医院和1200名参与者的临床试验中,该系统对重度抑郁症的筛查准确率约为80%,对广泛性焦虑症的筛查准确率约为78%。虽然这些数字低于通过全面精神病学评估所能达到的诊断精度,但它们足以进行大规模人群筛查——相当于社区诊所的血压检查。

该文章还介绍了蓬勃发展的数字疗法领域——通过智能手机提供临床验证的治疗方案的软件干预。北京大学研究人员开发的一个平台,通过结构化互动模块提供认知行为疗法,在一项3600名参与者的随机对照试验中,完成12周项目的用户抑郁评分降低了34%。国家药品监督管理局于2026年2月为该平台颁发了数字疗法注册证书——这是中国首批此类批准之一——标志着“软件即药物”的监管路径。

接受采访的专家们在报道中谨慎地告诫不要过度乐观。眼动追踪眼镜80%的准确率虽然作为筛查工具令人印象深刻,但仍会产生假阳性(将正常情绪变化病理化)和假阴性(遗漏真正的病例)。而数字疗法,无论设计多么精良,都无法复制一位熟练治疗师能够根据患者不断变化的需求实时调整治疗的激励性存在。共识是:这些技术是人类提供护理的强大辅助工具,而非替代品。

33. 【答案】C【解析】细节理解题。题干问:根据文章,国产眼动追踪眼镜的近似价格是多少?根据第三段“the domestically manufactured glasses have driven the price down to approximately 4,800 yuan”,可知C项“约4800元”正确。因此,选C。

34. 【答案】B【解析】细节理解题。题干问:在临床试验中,眼动追踪系统对广泛性焦虑症的筛查准确率是多少?根据第三段“achieved a screening accuracy of approximately 80% for major depressive disorder and 78% for generalized anxiety disorder”,可知对广泛性焦虑症的准确率约为78%。因此,选B。

35. 【答案】B【解析】细节理解题。题干问:完成北京大学数字认知行为疗法项目的用户抑郁评分降低了多少百分比?根据第四段“demonstrated a 34% reduction in depression scores among users who completed a 12-week program”,可知B项“34%”正确。因此,选B。

36. 【答案】B【解析】细节理解题。题干问:2026年2月,北京大学的数字治疗平台取得了什么监管里程碑?根据第四段末句“The National Medical Products Administration granted the platform a digital therapeutics registration certificate in February 2026”,可知B项“它获得了国家药品监督管理局颁发的数字疗法注册证书”正确。因此,选B。

37. 【答案】B【解析】细节理解题。题干问:专家对眼动追踪筛查技术提出了什么担忧?根据末段“The 80% accuracy of the eye-tracking glasses... still produces both false positives... and false negatives”,可知B项“其80%的准确率意味着它可能产生假阳性和假阴性”正确。因此,选B。

Passage Three

【原文翻译】

2026年全国人民代表大会和中国人民政治协商会议(即“两会”——中国最重要的年度政治会议)对健康政策投入了前所未有的审议关注。然而,使2026年的讨论与前几年不同的,不仅仅是关注的数量,而是其

持续更新中(持续更新中)

概念广度：健康不是作为一个限定的医学技术问题，而是作为一个多维现象来讨论的，涵盖心理健康、老年护理、预防医学以及决定谁在疾病中挣扎、谁在健康中蓬勃发展的社会经济因素。在提交的487项健康相关议题的全国人大提案中，有156项专门针对心理健康——是2024年两会期间数量的两倍多，证明了该议题在公共议程上的急剧上升。

青年心理健康困境构成了最反复出现且情感最强烈的次主题。中国科学院2025年国民心理健康调查的数据在全国人大讨论中被广泛引用，显示26.4%的大学生报告了与中度至重度焦虑相符的症状，而21.8%的人筛查出临床抑郁阳性——这些数字自2019年以来上升了5到7个百分点。正如代表和专家证人所述，其病因是多因素且协同作用的：在劳动力市场上激烈学术和就业竞争，尽管青年失业率已从2023年峰值回落，但2026年初仍保持在14.2%；算法策划的社交媒体无处不在且有害，越来越多的研究将其与社交攀比、身体形象焦虑和昼夜节律紊乱联系起来；以及一个人口结构，其中许多年轻人作为独生子女在现已废止的独生子女政策下长大，承受着父母期望的纯粹重压，却没有兄弟姐妹可以提供的情绪支撑。

两会期间阐述的政策回应显示出一种日益增长的认识，即渐进的、各自为政的干预措施在本质上是不足的。一个由教育、卫生和劳动领域的全国人大代表组成的跨委员会联合提出了“青年心理健康系统干预框架”的综合提案，要求在三个教育转折点（升入初中、高中和大学）进行全民心理健康筛查；在每所招收500名以上学生的学校中任命全职持证心理学家；将社交情感学习纳入课程；以及——在对痛苦结构性维度的特别显著承认中——进行劳动力市场改革，以遏制延续年轻专业人士慢性压力的“996”工作文化（上午9点至晚上9点，每周工作6天）。

人口老龄化构成了第二个主要主题轴，老年护理与心理健康之间的联系比以往任何时候都更具体的措辞进行阐述。中国60岁及以上人口在2025年激增至3.1亿——占总人口的22%——预计到2035年将超过4亿。全国人大代表指出，抑郁症估计困扰着23%独居的老年人，而社会孤立已被确定为认知能力下降的风险因素，其严重程度可与缺乏体育锻炼和吸烟相媲美。会议期间颁布的“银发心理健康倡议”拨款85亿元用于社区项目，整合体育锻炼、认知训练和社会参与——这含蓄地承认了老年人的心理健康与社交联系和存在意义密不可分。

第三个贯穿始终的主题是健康公平。来自主要农村省份的政协委员援引数据显示，农村县获得心理健康服务的机会不到大都市中心的十分之一。甘肃省和贵州省的精神科医生与人口比例约为每20万人中有一名精神科医生——与上海或北京相比存在20倍的差距。“农村心理健康人才输送管道”是卫生部和教育部的一项合作项目，提议为来自农村地区、承诺毕业后返回原籍县实践的学生提供全额补贴的医学教育，目标是在2030年前在每个乡镇卫生院至少配备一名心理健康专业人员。

2026年两会健康议题讨论的持久意义不在于任何孤立的政策声明，而在于它们所预示的范式重新定位：从将健康概念化为没有病理，到健康是一种身体、心理和社会全面繁荣的状态；从将医疗保健视为一系列零散的、反应性的干预，到健康作为系统性社会和经济条件的涌现属性；以及从健康政策作为一个技术官僚的死水，到健康作为发展合法性的核心指标。这种概念转变是否会转化为持续的财政承诺和持久的制度改革仍然是一个悬而未决的问题——但2026年两会使其无可争议地表明，这个问题现在已不可避免地摆在了桌面上。

38. 【答案】B【解析】细节理解题。题干问：根据文章，提交的487项健康相关议题的全国人大提案中，有多少项专门针对心理健康？根据第一段末句“Of the 487 NPC proposals submitted on health-related subjects, 156 specifically addressed mental health”，可知B项“156”正确。因此，选B。

39. 【答案】B【解析】细节理解题。题干问：文章引用的数据表明，有多少百分比的大学生筛查出临床抑郁阳性？根据第二段“21.8% screened positive for clinical depression”，可知B项“21.8%”正确。因此，选B。

活政策信息(持续更新中)

40. 【答案】D【解析】细节判断题。题干问：以下哪项未被识别为导致年轻人心理健康问题的因素？A项“竞争激烈的劳动力市场中的学术和就业压力”、B项“算法策划的社交媒体的普遍影响”、C项“作为独生子女承受父母全部期望的情感负担”均在第二段中提及。D项“近几代人加剧的遗传倾向”文中未提及。因此，选D。

41. 【答案】B【解析】细节理解题。题干问：文中提到的“996”工作文化指的是什么？根据第三段末句“labor market reforms to curtail the ‘996’ work culture (9 a.m. to 9 p.m., six days a week)”，可知B项“从上午9点工作到晚上9点，每周工作6天，这导致了慢性压力”正确。因此，选B。

42. 【答案】D【解析】细节理解题。题干问：甘肃省和贵州省的精神科医生与人口比例被描述为大约多少？根据最后一段“The psychiatrist-to-population ratio in Gansu and Guizhou provinces languished at approximately 1 per 200,000”，可知D项“每20万人中1名”正确。因此，选D。

Part IV Writing (20 points)

【参考范文】

Addressing the Youth Mental Health Crisis: Causes and Solutions

In recent years, mental health issues among young people have become alarmingly prevalent. Two major causes stand out. First, immense academic and employment pressure creates chronic stress, with youth unemployment remaining high and competition fierce. Second, pervasive social media exacerbates social comparison, body image anxiety, and sleep disruption, fueling depression and anxiety.

Addressing this crisis requires concerted efforts from all stakeholders. Individuals should learn to set boundaries, reduce screen time, and seek help when needed. Families must foster open communication and reduce excessive expectations. Schools are crucial: they should integrate mental health education into curricula, provide accessible counseling services, and cultivate a supportive environment that prioritizes well-being over mere grades. At the societal level, governments should invest in youth mental health services, regulate exploitative work cultures like "996," and launch public awareness campaigns to destigmatize seeking help.

In conclusion, while the causes are complex, the most urgent need is a systemic shift in our collective priorities. We must move from valuing only achievement to valuing holistic well-being. Only by creating a supportive ecosystem can we ensure that young people not only survive but thrive.

吉大研究生入学英语分级考试 全真模拟卷(五) 详解

Part I Listening Comprehension (25 points)

1. 【答案】C【解析】细节理解题。问题问: 女士建议男士做什么? 根据对话中女士的回答 “Have you considered flying into a nearby city like Guadalajara and taking a domestic connection? It could save you hundreds of dollars.” (你考虑过飞到附近城市比如瓜达拉哈拉, 然后坐国内航班中转吗? 可以省下不少钱), 可知C项 “飞到一个替代城市, 然后通过国内航班中转以节省费用” 正确。

2. 【答案】B【解析】主旨大意题。问题问: 说话者主要在谈论什么? 根据男士说 “That bicycle kick goal in the 89th minute was absolutely unreal.” (那个第89分钟倒钩进球太不真实了), 以及女士回应 “I've seen the highlights all over social media.” (我在社交媒体上看到了所有高光时刻), 可知B项 “一场足球比赛中一个精彩的进球” 正确。

3. 【答案】C【解析】细节理解题。问题问: 女士认为花样滑冰决赛中最令人难忘的是什么? 根据女士说 “What struck me most was the sportsmanship. The Italian skater was the first to embrace the Japanese competitor after her score was announced.” (最打动我的是体育精神。意大利选手在分数公布后是第一个拥抱日本选手的), 可知C项 “选手之间展现的体育精神” 正确。

4. 【答案】C【解析】细节理解题。问题问: 女士将电影的成功归因于什么? 根据女士说 “It's the sincerity that gets you. The director didn't rely on melodrama or special effects; it's a beautifully told story about the relationship between a grandmother and her grandson.” (打动你的是真诚。导演没有依赖情节剧或特效; 这是一个关于祖母和孙子之间关系的美丽故事), 可知C项 “其真诚、发自内心的叙事” 正确。

5. 【答案】B【解析】细节理解题。问题问: 女士告诉男士关于奥运场馆的什么信息? 根据女士说 “The Cortina Sliding Centre is open to the public from May through October with a guided experience. But you'll need to book at least two months in advance.” (科尔蒂纳滑降中心从5月到10月向公众开放, 提供导游体验。但你需要至少提前两个月预订), 可知B项 “游客可以参观, 但需要提前预订” 正确。

6. 【答案】C【解析】细节理解题。问题问: 从对话中我们了解到关于世界杯门票的什么信息? 根据女士说 “With 48 teams and 104 matches, demand was always going to outstrip supply. Your best bet now is the resale platform, but FIFA has capped resale prices at 110% of face value to prevent scalping.” (48支球队和104场比赛, 需求总是会超过供应。你现在最好的选择是转售平台, 但国际足联已将转售价格上限设为票面价值的110%, 以防止倒票), 可知C项 “需求远远超过供应, 国际足联实施了转售价格控制” 正确。

7. 【答案】C【解析】细节理解题。问题问: 女士关于世界杯文化活动说了什么? 根据女士说 “FIFA has organized cultural performances at all 16 host cities throughout the tournament.” (国际足联在整个赛事期间, 在所有16个主办城市都组织了文化表演), 可知C项 “文化表演计划在所有16个主办城市举行” 正确。

8. 【答案】C【解析】细节理解题。问题问: 女士对参观电影拍摄地提出了什么担忧? 根据女士说 “The local government told me that daily visitor numbers jumped from around 300 to over 8,000 after the film's release. The infrastructure wasn't designed for that volume.” (当地政府告诉我, 电影上映后, 每日游客数量从约300人跃升至8000多人。基础设施的设计容量无法承受这个数量), 可知C项 “巨大的游客数量让村庄的接待能力不堪重负” 正确。

9. 【答案】C【解析】细节理解题。问题问: 2026年国际足联世界杯有多少支球队参赛? 根据原文 “The tournament will also be the first to feature 48 teams, expanding from the traditional 32-team format” (本届赛事也是首次有48支球队参赛, 从传统的32支球队形式扩大), 可知C项 “48支” 正确。

10. 【答案】B【解析】细节理解题。问题问: 哪个体育场将举办世界杯的开幕赛? 根据原文 “The opening

match will be held at Mexico City's iconic Estadio Azteca” (开幕赛将在墨西哥城标志性的阿兹特克体育场举行)，可知B项正确。

11. 【答案】C【解析】细节理解题。问题问：根据文章，阿兹特克体育场有什么特别之处？根据原文 “Estadio Azteca... will become the first stadium to host World Cup matches in three different tournaments (1970, 1986, and 2026).” (阿兹特克体育场将成为第一个在三个不同赛事（1970年、1986年和2026年）中举办世界杯比赛的体育场)，可知C项正确。

12. 【答案】B【解析】细节理解题。问题问：米兰-科尔蒂纳2026年冬奥会的一个显著组织特点是什么？根据原文 “Milano-Cortina 2026 was spread across multiple clusters spanning northern Italy.” (米兰-科尔蒂纳2026年冬奥会分布在意大利北部多个集群)，可知B项 “比赛分布在意大利北部的多个场馆集群” 正确。

13. 【答案】C【解析】细节理解题。问题问：根据文章，本届奥运会在性别平等方面取得了什么成就？根据原文 “for the first time in Winter Olympic history, female athletes accounted for 47% of all participants — the highest proportion ever recorded.” (在冬奥会历史上首次，女性运动员占有所有参赛者的47%——这是有记录以来的最高比例)，可知C项正确。

14. 【答案】B【解析】细节理解题。问题问：组织者如何解决可持续性问题？根据原文 “An impressive 93% of competition venues were either existing or temporary structures, dramatically reducing the construction costs and environmental footprint.” (令人印象深刻的是，93%的比赛场馆是现有或临时建筑，大幅降低了建设成本和环境足迹)，可知B项正确。

15. 【答案】B【解析】细节理解题。问题问：电影《给阿嬷的情书》是关于什么的？根据原文 “The film tells the story of a young urban professional who returns to his rural hometown after his grandmother falls ill.” (这部电影讲述了一位年轻的都市白领在祖母生病后回到农村家乡的故事)，可知B项正确。

16. 【答案】A【解析】细节理解题。问题问：电影对其拍摄地的旅游业产生了什么影响？根据原文 “The village... saw its daily visitor numbers surge from approximately 300 to over 8,000 within two months of the film's release.” (电影上映两个月内，该村的日游客数量从约300人激增至8000多人)，可知A项 “每日游客从约300人增加到超过8000人” 正确。

17. 【答案】C【解析】细节理解题。问题问：根据文章，这种 “电影+文化旅游” 模式与短暂的社交媒体旅游趋势有何不同？根据原文 “Unlike fleeting social media-driven tourism fads, the film created a deep emotional connection between audiences and the location.” (与短暂的社交媒体驱动的旅游热潮不同，这部电影在观众和拍摄地之间建立了深厚的情感联系)，可知C项 “电影在观众和拍摄地之间建立了深厚的情感联系” 正确。

Part II Cloze (10 points)

【原文翻译】

在当今这个全球互联互通前所未有的时代，跨越文化边界进行有效沟通的能力已不仅仅是一种优势，而是一种（18）必需品。随着企业在各大洲扩展业务，大学以创纪录的数量招收国际学生，以及数字平台抹去了地理（19）距离，那些具备跨文化能力的人发现自己处于独特的优势地位，能够蓬勃发展。

然而，跨文化沟通仍然（20）充满挑战。语言障碍只是最显而易见的障碍。更（21）微妙的是文化中那些无形的维度：关于等级和权威的未言明的假设，关于时间和守时的不同观念，以及（22）微妙的、支配着情绪表达和身体距离的规范。在一种文化中构成尊重姿态的行为，在另一种文化中可能被（23）解读为粗鲁或具有攻击性，而这种误解可能会破坏谈判，损害关系，并（24）浪费原本可能蓬勃发展起来的机会。

该领域的学者区分了文化意识——即对文化差异存在的表面认识——和文化智力，或称“CQ”，它（25）指的是在不同文化背景下适当调整自己行为的能力。发展CQ需要的不仅仅是记住一份文化礼仪清单；它要

持续更新中(持续更新中)

求对其他思维和生活方式有真正的好奇心，愿意(26)审视自己的文化假设，并有从不可避免的失误中学习的谦逊态度。

国际体育赛事、全球学术会议和跨境艺术合作都充当着跨文化交流的强大(27)催化剂。它们创造了超越语言和文化鸿沟的共同体验，在庆祝参与者的多样性的同时，也提醒他们共同的人性。在一个经常因误解和不信任而四分五裂的世界里，这些真正的跨文化联结时刻不是奢侈品——它们是必需品。

18. 【答案】A【解析】本题考查词性辨析。A)necessity 名词，必需品；B)necessity's 名词所有格，意为“必需的”；C)necessarily 副词，必然地；D)necessitate 动词，使成为必需。句意：跨越文化边界进行有效沟通的能力已不仅仅是一种优势，而是一种“必需品”。冠词a后应跟名词，necessity意为“必需品，必要的事物”，符合语境。因此，选A。

19. 【答案】A【解析】本题考查名词辨析。A)distances 距离；B)distinctions 区别，差异；C)distractions 分心的事物；D)distributions 分布，分配。句意：数字平台抹去了地理“距离”。erase geographical distances 意为“消除地理距离”。因此，选A。

20. 【答案】A【解析】本题考查固定搭配。A)fraught 充满(忧虑、危险等)的；B)freight 货运，货物；C)fought 战斗(fight的过去式)；D)fracture 骨折，断裂。句意：跨文化沟通仍然“充满”挑战。be fraught with challenges 是固定搭配，意为“充满挑战”。因此，选A。

21. 【答案】A【解析】本题考查形容词辨析。A)subtle 微妙的，难以察觉的；B)subtlety 微妙(名词)；C)subsequent 随后的，后来的；D)subsidiary 辅助的，附属的。句意：更“微妙”的是文化中那些无形的维度。far more subtle 意为“更加微妙”，与后文“invisible dimensions”对应。因此，选A。

22. 【答案】A【解析】本题考查形容词辨析。A)nuanced 微妙的，有细微差别的；B)numerous 许多的，大量的；C)notorious 臭名昭著的；D)nutritional 营养的。句意：支配着情绪表达和身体距离的“微妙的”规范。nuanced norms 意为“有细微差别的规范”，形容文化规范的复杂性。因此，选A。

23. 【答案】A【解析】本题考查动词辨析。A)interpreted 解读，理解；B)interrupted 打断；C)interrogated 审问，质问；D)integrated 整合。句意：在一种文化中构成尊重姿态的行为，在另一种文化中可能被“解读”为粗鲁或具有攻击性。be interpreted as 是固定搭配，意为“被解读为……”。因此，选A。

24. 【答案】A【解析】本题考查动词辨析。A)squander 浪费，挥霍；B)surrender 投降，放弃；C)surround 包围；D)surpass 超过，超越。句意：这种误解可能会破坏谈判，损害关系，并“浪费”原本可能蓬勃发展起来的机会。squander opportunities 意为“浪费机会”。因此，选A。

25. 【答案】A【解析】本题考查动词辨析。A)denotes 表示，指的是；B)detonates 引爆；C)detaches 分离，拆下；D)deteriorates 恶化。句意：文化智力，或称“CQ”，它“指的是”在不同文化背景下适当调整自己行为的能力。denotes 意为“表示，指代”，符合对术语下定义的语境。因此，选A。

26. 【答案】A【解析】本题考查动词辨析。A)interrogate 质问，审视；B)integrate 整合；C)interject 插嘴；D)intercept 拦截，截获。句意：愿意“审视”自己的文化假设。interrogate one's own assumptions 意为“审视/质疑自己的假设”，强调批判性反思。因此，选A。

27. 【答案】A【解析】本题考查名词辨析。A)catalysts 催化剂；B)catastrophes 灾难；C)catalogues 目录；D)categories 类别。句意：国际体育赛事、全球学术会议和跨境艺术合作都充当着跨文化交流的强大“催化剂”。serve as catalysts for... 意为“充当……的催化剂”，强调其促进作用。因此，选A。

Part III Reading Comprehension (45 points)

Passage One

【原文翻译】

2026年被体育经济学家描述为现代史上大型国际体育赛事最密集的一年——一个吸引了数十亿人并重

更多学习资源，关注吉井解学公众号

吉大专业电子教材与学习资源
海量信息(持续更新中)

塑了全球体育赛历的“超级体育季”。

这一年始于2月份的米兰-科尔蒂纳冬奥会，在16天的比赛期间吸引了累计28亿的全球电视观众。意大利利用这届奥运会展示其北部地区，伦巴第和威尼托大区的旅游局报告称，2026年第一季度国际游客到达人数比2025年增长了34%。

仅仅四个月后，注意力便转移到了大西洋彼岸。2026年国际足联世界杯于6月11日开赛，横跨美国、加拿大和墨西哥的16个城市。本届世界杯有48支球队——从传统的32支扩军——和104场比赛，是有史以来规模最大的一届世界杯。国际足联预计，本届世界杯的现场总观众人数将达到580万，全球电视观众将超过50亿。主办国投入了约62亿美元用于基础设施升级，包括体育场翻新、机场扩建和公共交通改善。

夹在这两大盛事之间的是一个具有重大区域意义的事件：定于9月19日至10月4日在日本爱知县名古屋市举行的2026年亚运会。虽然全球知名度不及奥运会或世界杯，但亚运会对日本来说是一个重要的里程碑，标志着该国自1994年广岛亚运会以来首次主办该赛事。来自42个国家的选手参加了40个运动项目的比赛，包括电子竞技作为正式奖牌项目的首次亮相。据预测，爱知-名古屋亚运会将为中部地区创造5400亿日元（约合36亿美元）的经济活动。

这三项大型赛事在同一年度内集中举行是史无前例的。德勤体育商业集团的分析师估计，2026年冬奥会、世界杯和亚运会对主办国的综合经济影响将达到185亿美元——这一数字使以往任何体育年都相形见绌。然而，活动的集中也引发了关于未来周期申办竞争、在压缩的资格赛日程下的运动员福利，以及要求主办城市和国家进行更大投资这一模式的可持续性等问题。

28. 【答案】B【解析】细节理解题。题干问：米兰-科尔蒂纳冬奥会的累计全球电视观众是多少？根据第一段末句“a cumulative global television audience of 2.8 billion viewers”，可知B项“28亿”正确。因此，选B。

29. 【答案】D【解析】细节理解题。题干问：2026年国际足联世界杯有多少支球队参赛？根据第二段“With 48 teams — up from the traditional 32”，可知D项“48支”正确。因此，选D。

30. 【答案】B【解析】细节理解题。题干问：关于爱知-名古屋亚运会，文章指出什么值得注意？根据第三段“the Asian Games represented a critical milestone for Japan, marking the country's first time hosting the event since Hiroshima in 1994”，可知B项“这标志着日本自1994年以来首次主办该赛事”正确。因此，选B。

31. 【答案】C【解析】细节理解题。题干问：德勤体育商业集团估计这三项大型赛事的综合经济影响是多少？根据末段“the combined economic impact of the 2026 Winter Olympics, World Cup, and Asian Games would reach \$18.5 billion”，可知C项“185亿美元”正确。因此，选C。

32. 【答案】C【解析】细节理解题。题干问：文章对2026年大型体育赛事的集中举办提出了什么担忧？根据末段末句“the clustering of events also raised questions about... athlete welfare amid compressed qualification schedules, and the environmental sustainability of a model”，可知C项“该模式引发了关于可持续性和运动员福利的问题”正确。因此，选C。

Passage Two

【原文翻译】

当导演陈宇宁在2025年底完成《给奶奶的情书》的拍摄时，该片的总预算为4800万元——按照当代中国电影的标准，这是一个适中的数字，因为大片仅制作成本就经常超过3亿元。参与该项目的人都没有预料到2026年夏天会发生什么。

这部电影于2026年6月12日上映，到第六个周末时，累计票房已达15.2亿元，使其成为今年非系列、非动画类中国电影中票房最高的影片。但真正令行业观察者震惊的数字并非电影院的资产负债表上的数字，而是福建省一个此前基本不在旅游地图上的角落里的乡村客栈、乡村餐馆和当地交通运营商的账本上的数

更多学习资源，关注吉井解学公众号

字。

影片的拍摄地石厝村在2026年5月平均每天接待300名游客。到了7月，每日游客数量激增至8200人，周末高峰期达到14000人。当地政府旅游局报告称，该县6月至8月季度的旅游总收入达到21亿元，较2025年同期的7.05亿元增长了198%。该县登记在册的民宿数量在三个月内从47家增加到186家，平均每晚房价从180元上涨到520元。

这个案例的独特之处不在于旅游激增的规模——社交媒体平台曾周期性地为风景如画的地方引发过类似的繁荣——而在于其明显的持久性。与由短视频平台驱动的“打卡”旅游不同，那种旅游中，游客到达、拍照上传社交媒体、然后在几小时内离开，而《给奶奶的情书》吸引的游客往往停留时间更长，消费也更多。福建省文化和旅游厅的一项调查发现，63%的受电影驱动的游客至少停留两晚，71%的游客表示，他们主要是被电影故事的情感共鸣所吸引，而不仅仅是风景的美学吸引力。研究人员认为，这种情感锚定将被动的观光者转变成了主动的文化参与者。

围绕这部电影形成的商业生态系统远远超出了旅游业的范畴。一系列受奶奶角色烹饪场景启发的授权厨具创造了3.4亿元的销售额。电影原声带重新演绎了传统的福建民间旋律，在流媒体排行榜上连续八周位居榜首。并且，作为该模式可复制性的一个迹象，到2026年10月，云南、贵州和四川省政府各自宣布了激励计划，向承诺在服务不足的农村地区拍摄的电影制作提供税收减免和场地补贴——这是对石厝现象的直接政策回应。

33. 【答案】C【解析】细节理解题。题干问：《给奶奶的情书》的制作预算是多少？根据第一段“the production's total budget stood at 48 million yuan”，可知C项“4800万元”正确。因此，选C。

34. 【答案】A【解析】细节理解题。题干问：2026年5月至7月间，石厝村的每日游客数量是如何变化的？根据第三段“received an average of 300 visitors per day in May 2026... By July, the daily count had surged to 8,200”，可知A项“从每天300人增加到约8200人”正确。因此，选A。

35. 【答案】B【解析】细节理解题。题干问：根据文章，这部电影带来的旅游与典型的社交媒体驱动的旅游有何不同？根据第四段“the visitors drawn by... tended to stay longer and spend more... 71% reported that emotional engagement with the film's story... was their primary motivation”，可知B项“受电影驱动的游客停留时间更长，并且是被故事的情感共鸣所驱动”正确。因此，选B。

36. 【答案】C【解析】词义猜测题。题干问：第5段中的“anchoring”一词最接近下列哪个意思？根据上下文“This emotional anchoring... transformed passive sightseers into active cultural participants”，这里“anchoring”意为“锚定，固定”，强调情感将游客与电影场景紧密联系在一起，类似于“securing”。因此，选C。

37. 【答案】B【解析】细节理解题。题干问：文章提供了什么证据表明“电影+文化旅游”模式是可复制的？根据末段末句“provincial governments in Yunnan, Guizhou, and Sichuan had each announced incentive programs... to film productions that committed to shooting in underserved rural areas”，可知B项“几个省级政府推出了激励计划，以吸引电影制作到农村地区”正确。因此，选B。

Passage Three

【原文翻译】

2026年8月，来自127个国家的代表齐聚上海，参加第三届世界数字教育大会。这一会议已迅速从一个小众的技术专家和教育政策制定者聚会，发展成为全球治理议程上最重要的论坛之一。在“智能转型，共享未来”的旗帜下，为期三天的会议探讨了一个意义深远的问题：随着人工智能从根本上重塑知识创造、传播和认证的方式，哪些原则应该指导教育领域的国际合作？

会议的核心是发布《上海数字教育合作宣言》，这是一份不具约束力但具有象征意义的文件，得到了94

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

个参与国的认可。该宣言确立了国际合作的四大支柱：第一，跨境数字证书和微证书的互认，建立在自2024年以来已使34万名学生在中国、东盟国家和几个非洲国家的机构之间转移学分的试点项目之上；第二，创建国际人工智能教育伦理框架，为在学生评估中使用预测算法设定边界，并禁止学生行为数据的商业化；第三，签署国承诺到2030年集体投资120亿美元用于服务不足学校的数字基础设施，会议期间已认捐了首期28亿美元；第四，建立全球数字教育资源库，设想为一个可公开访问的开放课程、人工智能辅助辅导系统和适应文化的学习材料存储库。

然而，在官方外交辞令之下，会议暴露了长期困扰国际教育合作的持续紧张局势。最具争议的辩论围绕数据主权展开——即在一国境内产生的教育数据应受该国法律管辖的原则。由印度尼西亚、尼日利亚和巴西领导的一批发展中国家认为，当前数字教育平台的架构——由总部设在少数富裕国家的科技公司主导——构成了一种新的知识殖民主义。他们要求全球数字教育资源库由一个多边机构管理，该机构应给予全球南方国家与其人口相称的代表权，而不是由为它提供资金的捐助国管理。

第二条分歧线涉及数字鸿沟——不仅在基础设施方面，而且在会议工作文件所称的“认知自主权”方面。来自最不发达国家的代表指出，虽然人工智能辅导系统在对照试验中表现出显著的功效，但几乎所有此类系统都是在来自狭窄文化和语言背景的数据集上训练的——主要是英语、普通话和少数几种欧洲语言。一位埃塞俄比亚代表观察到，她所在国家88种官方认可的语言，在部署最广泛的教育人工智能模型的训练数据中，总共占比不到0.03%。会议产生的伦理框架承认了这种不平衡，但没有要求采取具体的补救措施，而是呼吁技术开发者做出“自愿承诺”——批评者谴责这种语言是“愿望性的”而非“可强制执行的”。

也许会议最切实的成果是启动了“中国-东盟数字教育走廊”，这是一项双边倡议，中国承诺在五年内培训5万名东盟成员国的教师掌握人工智能增强的教学法，并在东南亚的15000所农村学校部署基于卫星的宽带互联网。虽然与挑战的规模相比显得不大，但该走廊被广泛视为朝着《上海宣言》中阐述的愿景迈出的具体一步——数字教育不是扩大现有不平等，而是缩小它们，国际合作不是按照技术强国所强加的条件进行，而是建立在真正伙伴关系和相互尊重的基础上。

38. 【答案】B【解析】细节理解题。题干问：2026年世界数字教育大会的主题是什么？根据第一段末句“Under the banner ‘Intelligent Transformation, Shared Future’”，可知B项“‘智能转型，共享未来’”正确。因此，选B。

39. 【答案】B【解析】细节理解题。题干问：根据文章，《上海宣言》确立的四大支柱之一是什么？根据第二段“the mutual recognition of digital credentials and micro-credentials across borders”，可知B项“跨境数字证书和微证书的互认”正确。因此，选B。

40. 【答案】B【解析】细节理解题。题干问：发展中国家集团对数字教育平台格局提出了什么担忧？根据第三段“the current architecture of digital education platforms, overwhelmingly dominated by technology companies headquartered in a handful of wealthy nations, amounted to a new form of intellectual colonialism”，可知B项“来自富裕国家的科技公司的主导地位构成了一种知识殖民主义”正确。因此，选B。

41. 【答案】C【解析】细节理解题。题干问：埃塞俄比亚代表提出了什么观点？根据第四段“A delegate from Ethiopia observed that her country's 88 officially recognized languages were collectively represented by fewer than 0.03% of the training data in the most widely deployed educational AI models”，可知C项“大多数教育人工智能模型是在来自非常狭窄的语言和文化背景的数据上训练的”正确。因此，选C。

42. 【答案】B【解析】观点态度题。题干问：以下哪项最能描述作者对会议成果的评估？文章既提到了会议的积极成果，如《上海宣言》的发布和“中国-东盟数字教育走廊”的启动，也指出了存在的分歧和挑战，如数据主权争议和数字鸿沟问题。因此，B项“会议既产生了象征性协议，也产生了具体举措，但重大的结构性挑战仍然未解决”正确。因此，选B。

Part IV Writing (20 points)

【参考范文】

Hosting Major International Sporting Events: A Double-Edged Sword

Hosting major international sporting events like the World Cup or Olympics is a double-edged sword. In my view, while the benefits are substantial, the challenges are equally significant and must be carefully managed to avoid long-term negative consequences.

On the one hand, the benefits are undeniable. First, hosting such events provides a powerful economic stimulus. The 2026 FIFA World Cup, for example, spurred an estimated \$6.2 billion in infrastructure upgrades across host cities, including stadiums, airports, and public transit. Second, these events offer immense international prestige and a boost in tourism. The 2026 Milano-Cortina Winter Olympics, for instance, led to a 34% increase in international arrivals in Italy's northern regions during the first quarter.

On the other hand, the challenges are formidable. The most pressing is the financial burden. The massive investment required can strain public budgets, and there is a real risk that venues become underutilized after the event, creating a long-term maintenance liability. Furthermore, there are major environmental concerns. The clustering of events in 2026 has raised questions about the sustainability of a model that demands ever-larger investments and produces significant carbon emissions from travel and construction.

In conclusion, I believe the benefits can outweigh the challenges if managed wisely. Host cities should prioritize using existing or temporary venues to reduce costs and environmental impact, as Milano-Cortina did by using 93% existing or temporary venues. They should also develop a clear post-event plan for venue reuse. With careful planning, major sporting events can be a catalyst for positive, lasting change rather than a burden.

吉大研究生入学英语分级考试 全真模拟卷(六) 详解

Part I Listening Comprehension (25 points)

(略)

Part II Cloze (10 points)

【原文翻译】

婚姻的第一年常被描述为新婚夫妇的适应期。这是一个学习将两种生活、习惯和期望融合成一个和谐家庭的时间。虽然最初的几个月充满了兴奋和喜悦,但它们也可能(18)充满意想不到的挑战。

最常见的(19)冲突领域之一是财务。以前各自管理金钱的夫妇现在必须学会一起做预算,这通常就需要消费习惯和储蓄目标进行艰难的对话。另一个常见的紧张来源是家务分工。决定谁倒垃圾或洗衣服这样简单的行为,如果处理不当,可能会(20)升级为一场大的争执。

沟通是(21)应对这些挑战的关键。专家建议新婚夫妇从一开始就建立开放、诚实的对话。重要的是表达感受和需求,(22)而不是让它们积累成怨恨。学会妥协并从伴侣的(23)视角看问题对于健康的关系也至关重要。

尽管有潜在的困难,第一年也是加深感情和发现的时光。通过(24)共同克服障碍,夫妻可以为未来建立更坚实的基础。一起装饰房屋、共同烹饪美食以及创造新传统的经历可以(25)加强他们之间的纽带。最终,成功度过第一年的秘诀是(26)耐心、理解以及共同致力于维系这段关系的承诺的结合。这是一段学习、成长和(27)共同成长的旅程。

18. 【答案】A【解析】本题考查固定搭配。A) filled 充满; B) ignored 忽视; C) avoided 避免; D) delayed 延迟。句意:最初的几个月充满了兴奋和喜悦,但它们也可能“充满”意想不到的挑战。be filled with 是固定搭配,意为“充满”。因此,选A。

19. 【答案】B【解析】本题考查名词辨析。A) agreement 协议,一致; B) conflict 冲突; C) celebration 庆祝; D) harmony 和谐。句意:最常见的“冲突”领域之一是财务。根据上下文,这里讨论的是婚姻中可能出现的负面问题,conflict 意为“冲突”,符合语境。因此,选B。

20. 【答案】B【解析】本题考查动词辨析。A) disappear 消失; B) escalate 升级,加剧; C) diminish 减少; D) resolve 解决。句意:决定谁倒垃圾或洗衣服这样简单的行为,如果处理不当,可能会“升级”为一场大的争执。escalate into a major disagreement 意为“升级为大的争执”。因此,选B。

21. 【答案】C【解析】本题考查动词辨析。A) creating 创造; B) overlooking 忽视; C) navigating 应对,导航; D) avoiding 避免。句意:沟通是“应对”这些挑战的关键。navigate challenges 意为“应对/克服挑战”,是常见搭配。因此,选C。

22. 【答案】A【解析】本题考查介词辨析。A) without 没有; B) by 通过; C) through 通过; D) despite 尽管。句意:重要的是表达感受和需求,“而不是”让它们积累成怨恨。根据句意,应表达“而不是”的意思。因此,选A。

23. 【答案】A【解析】本题考查名词辨析。A) perspective 视角,观点; B) mistake 错误; C) success 成功; D) failure 失败。句意:学会妥协并从伴侣的“视角”看问题对于健康的关系也至关重要。see things from one's perspective 意为“从某人的视角看问题”。因此,选A。

24. 【答案】B【解析】本题考查动词辨析。A) ignoring 忽视; B) overcoming 克服; C) creating 创造; D) avoiding 避免。句意:通过“共同克服”障碍,夫妻可以为未来建立更坚实的基础。overcoming obstacles 意为“克服障碍”。因此,选B。

25. 【答案】C【解析】本题考查动词辨析。A) weaken 削弱; B) test 测试; C) strengthen 加强; D) ignore

更多学习资源，关注吉井解学公众号

吉大专业电子教材与学习资源
海量信息(持续更新中)

忽视。句意：一起装饰房屋、共同烹饪美食以及创造新传统的经历可以“加强”他们之间的纽带。strengthen the bond 意为“加强纽带”。因此，选C。

26. 【答案】B【解析】本题考查固定搭配。A) a lack of 缺乏；B) a combination of 结合；C) a rejection of 拒绝；D) a fear of 害怕。句意：成功度过第一年的秘诀是“耐心、理解以及共同致力于维系这段关系的承诺的”结合。a combination of... 意为“……的结合”，符合语境。因此，选B。

27. 【答案】B【解析】本题考查固定搭配。A) growing apart 疏远；B) growing together 共同成长；C) drifting away 逐渐疏远；D) staying apart 分离。句意：这是一段学习、成长和“共同成长”的旅程。根据上文“deep bonding”和“harmonious household”，可知应选“共同成长”。因此，选B。

Part III Reading Comprehension (45 points)

Passage One

【原文翻译】

亚马逊盆地是一个广阔的、横跨南美洲九个国家的大区域，由亚马逊河及其广泛的支流网络所界定。这个地区不是一个单一的实体，而是一个由不同生态系统组成的复杂马赛克，包括低地雨林、洪泛森林和季节性洪水泛滥的稀树草原。盆地的地理环境深刻地塑造了其生物多样性和居民的生活。

亚马逊的地形主要是平坦的，大部分盆地处于低海拔。这种平坦，加上来自强降雨的巨大水量，导致河流在雨季淹没大片区域。这种被称为白水河的“várzea”和黑水河的“igapó”的年度洪水，是一个关键的生态过程。它将富含营养的沉积物沉积到洪泛区，为农业创造了肥沃的土地，并支持了适应这些季节性变化的独特动植物群落。

该地区的气候被归类为热带雨林气候，特点是全年高温高湿。平均气温很少低于25°C，降雨量充沛，通常每年超过2000毫米。这种持续温暖潮湿的气候促进了极高的植物生长和分解速度，形成了茂密的多层树冠，这里栖息着地球上约10%的已知物种。

亚马逊的人类定居点也受其地理环境的影响。数千年来，土著社区与森林和谐相处，发展出对森林资源的丰富知识。相比之下，更近期的城市中心，如巴西的马瑙斯，是围绕主要河流发展起来的，这些河流在一个道路稀缺的地区充当了交通和贸易的主要高速公路。亚马逊盆地的地理环境不仅仅是一个背景；它是一个动态的、活跃的力量，继续影响着该地区的生态、经济和文化生活。

28. 【答案】B【解析】主旨大意题。题干问：文章的主要目的是什么？文章首段点明亚马逊盆地的地理“塑造了”其生物多样性和居民生活，随后从地形、气候、人类定居等角度详细阐述了地理环境的影响。因此，B项“解释亚马逊盆地的地理环境如何塑造该地区”正确。A项“描述亚马逊雨林的生物多样性”过于片面；C项“主张保护亚马逊河”和D项“将亚马逊与其他流域进行比较”均非文章重点。因此，选B。

29. 【答案】C【解析】词义猜测题。题干问：第一段中“monolithic”一词最接近下列哪个意思？根据原文“This region is not a monolithic entity but a complex mosaic of diverse ecosystems”，可知“monolithic”与“complex mosaic of diverse ecosystems”（复杂多样的生态系统马赛克）形成对比，因此意为“单一、不变的”。C项“Uniform and unchanging”（统一且不变的）最接近。A项“多样且变化”confusing；B项“大而强”和D项“危险且不可预测”均不符合。因此，选C。

30. 【答案】B【解析】细节理解题。题干问：亚马逊年度洪水的生态意义是什么？根据第二段“It deposits nutrient-rich sediment onto the floodplains, creating fertile grounds for agriculture”，可知B项“它沉积了富含营养的沉积物”正确。A项“破坏植被”、C项“降低水位”和D项“阻止植物生长”均与原文相反。因此，选B。

31. 【答案】B【解析】细节理解题。题干问：根据文章，亚马逊高生物多样性的主要原因是什么？根据第三段“This consistently warm and wet climate fuels the incredibly high rate of plant growth and decomposition...”

持续更新中(持续更新中)

home to an estimated 10% of the world's known species”，可知B项“持续温暖潮湿的气候”正确。A项“许多大河流的存在”、C项“平坦的地形”和D项“人类定居点的影响”均非主要原因。因此，选B。

32. 【答案】B【解析】推理判断题。题干问：从最后一段可以推断出亚马逊河流对于什么特别重要？根据第四段“urban centers... have grown around major rivers, which serve as the primary highways for transportation and trade”，可知B项“交通和贸易”正确。A项“发电”、C项“提供饮用水”和D项“支持旅游”在文中未提及。因此，选B。

Passage Two

【原文翻译】

完美主义，即对完美无缺的不懈追求和设定过高绩效标准，在当今竞争激烈的社会中常被视为一种理想的品质。然而，心理学研究越来越多地揭示出，这种对完美的追求可能是一把双刃剑，常常导致显著的痛苦和功能障碍。区分对卓越的健康追求与适应不良的完美主义非常重要。

健康的奋斗者，或“适应性完美主义者”，设定了高但可实现的目标。他们受到成就和个人成长欲望的驱动。当他们未能达到目标时，他们能够自我同情，从错误中学习，并调整自己的努力。这种形式的完美主义与高水平的动机、责任心和成功相关。

相比之下，“适应不良的完美主义者”受到对失败的恐惧和对持续认可的需要的驱动。他们设定了不可能达到的高标准，并对自己过于苛刻。对他们来说，任何不完美都是完全的失败。这导致长期的焦虑、拖延和倦怠。他们常常避免接受新的挑战，因为害怕无法达到自己不可能达到的期望。

适应不良完美主义的根源是复杂的，通常与早期童年经历和社会压力有关。它可能是多种心理健康问题的重要风险因素，包括抑郁症、焦虑症和饮食失调。克服这种形式的完美主义涉及到学会挑战不现实的标准，练习自我同情，并将成功重新定义为进步和努力，而不仅仅是完美的结果。目标是从僵化、非黑即白的思维模式转变为更灵活、更自我接纳的思维模式。

33. 【答案】B【解析】主旨大意题。题干问：文章的主要观点是什么？文章首段指出完美主义是“双刃剑”，并区分了“健康的”和“适应不良的”完美主义，全文围绕这一区分展开。因此，B项“完美主义可以是健康的，也可能是有害的”正确。A项“完美主义总是积极的品质”、C项“所有形式的完美主义都导致焦虑”和D项“设定高标准总是坏事”均与原文不符。因此，选B。

34. 【答案】B【解析】细节理解题。题干问：根据文章，“适应性完美主义者”如何应对失败？根据第二段“When they fall short of their goals, they are able to be self-compassionate, learn from their mistakes, and adjust their efforts”，可知B项“他们从错误中学习并调整”正确。A项“他们感到崩溃并放弃”、C项“他们责怪他人”和D项“他们永久降低标准”均与原文相反。因此，选B。

35. 【答案】B【解析】细节理解题。题干问：“适应不良的完美主义者”的一个关键特征是什么？根据第三段“In contrast, ‘maladaptive perfectionists’ are driven by a fear of failure and a constant need for approval”，可知B项“他们受到对失败的恐惧的驱动”正确。A项“他们受到个人成长的驱动”和D项“他们能够自我同情”是“适应性完美主义者”的特征；C项“他们能够设定现实的目标”与原文相反。因此，选B。

36. 【答案】C【解析】词义猜测题。题干问：第一段中“dysfunction”一词最接近下列哪个意思？根据原文“often leading to significant distress and dysfunction”，完美主义导致“痛苦”和“功能障碍”。C项“Impairment”（损伤，障碍）与“dysfunction”含义最接近。A项“成功”、B项“动机”和D项“创造力”均不符合语境。因此，选C。

37. 【答案】C【解析】细节理解题。题干问：克服适应不良完美主义的一个推荐策略是什么？根据末段“Overcoming this form of perfectionism involves learning to challenge unrealistic standards, practicing self-compassion, and redefining success”，可知C项“练习自我同情”正确。A项“设定更高的标准”、B项“忽视

持续更新中(持续更新中)

所有错误”和D项“寻求他人持续认可”均与原文相反。因此，选C。

Passage Three

【原文翻译】

航空航天工程领域正处于一个新时代的风口浪尖，由私营企业和技术突破的共同推动。虽然像NASA这样的政府机构历史上引领了太空探索，但新一代私营公司，如SpaceX和蓝色起源，现在正扮演着越来越主导的角色，大幅降低了进入太空的成本，并加速了创新步伐。

最重要的进展之一是轨道级火箭的成功开发与重复使用。传统上，火箭使用一次就丢弃，使得每次发射极其昂贵。将火箭的第一级降落在无人船或发射台上并重复使用多次飞行的能力，彻底改变了太空飞行的经济性。这一突破使得更频繁地发射更大的有效载荷成为可能，为大规模卫星星座、太空旅游甚至火星任务开辟了可能性。

另一个关键焦点是先进推进系统的开发。虽然化学火箭仍然是主力，但像离子推进器和核热推进这样的新技术正在研究中。离子推进器利用电力加速离子，非常省油，为用更少的推进剂进行更长期的任务提供了可能性。核热推进利用核反应堆加热推进剂，可以大幅减少到火星等遥远目的地的旅行时间，使人类任务更加可行。

航天的未来不仅仅是到达更远的目的地；它还关乎利用太空改善地球上的生活。卫星技术对于全球通信、天气预报、导航和地球观测至关重要。随着发射成本的降低，我们可以期待看到更多创新应用，从高速全球互联网覆盖到对气候变化和自然灾害的精确监测。新的太空竞赛不仅仅是关于探索；它是关于建设一个将从根本上重塑我们全球经济和我们对自己星球理解的天基基础设施。

38. 【答案】B【解析】主旨大意题。题干问：文章的主要话题是什么？文章首段点明主题：私营企业在航空航天领域扮演越来越主导的角色，随后从可重复使用火箭、先进推进系统和卫星应用等方面展开论述。因此，B项“私营公司在航空航天领域的崛起”正确。A项“NASA的历史”和C项“不同类型的火箭燃料”只是文章部分内容；D项“太空旅行的危险”未提及。因此，选B。

39. 【答案】B【解析】细节理解题。题干问：根据文章，可重复使用火箭最重要的经济影响是什么？根据第二段“The ability to land a rocket's first stage... and reuse it for multiple flights has revolutionized the economics of spaceflight”，可知可重复使用降低了成本。B项“它们大幅降低了每次发射的成本”正确。A项“它们更复杂”、C项“它们只能用于小载荷”和D项“它们不如传统火箭可靠”均与原文不符。因此，选B。

40. 【答案】B【解析】语义理解题。题干问：第二段中“revolutionized the economics of spaceflight”这个短语暗示了什么？该短语所在的句子提到“The ability to land a rocket's first stage... and reuse it...”，这种能力使成本降低，因此暗示太空飞行变得更实惠。B项“太空飞行变得负担得起得多”正确。A项“更贵”、C项“没有改变”和D项“变化很小”均与原文相反。因此，选B。

41. 【答案】B【解析】细节理解题。题干问：离子推进器相对于化学火箭的潜在优势是什么？根据第三段“Ion thrusters, which use electricity to accelerate ions, are incredibly fuel-efficient”，可知B项“它们更省油”正确。A项“更强大”、C项“制造成本更低”和D项“更容易操作”在文中未提及。因此，选B。

42. 【答案】C【解析】细节理解题。题干问：根据最后一段，卫星技术的一个关键功能是什么？根据末段“Satellite technology is critical for global communications, weather forecasting, navigation, and Earth observation”，可知C项“用于全球通信和地球观测”正确。A项“仅用于军事目的”、B项“用于娱乐和旅游”和D项“为地球上的家庭供电”均不全面。因此，选C。

Part IV Writing (20 points)

Combating Counterfeit Products: A Shared Responsibility

吉大各专业课教材与学习生
活政策信息(持续更新中)

The proliferation of counterfeit products in mainstream supermarkets is a serious threat to consumer safety and market integrity. To protect consumers, a multi-pronged approach is necessary.

First, governments must strengthen legal frameworks. This includes imposing stricter penalties on manufacturers and distributors of fakes, and establishing a more efficient system for product verification and traceability. Second, consumers should be educated to identify genuine products, report suspicious items, and prioritize authorized retailers. Third, supermarkets bear a crucial responsibility. As the final point of sale, they must implement rigorous supplier audits and random product inspections. They should not hide behind claims of ignorance; their duty of care to their customers requires them to be proactive in ensuring the authenticity of everything on their shelves. When a counterfeit is found, supermarkets should not only remove it immediately but also compensate affected consumers and publicly disclose the breach.

In conclusion, protecting consumers from counterfeit goods is a shared duty. While governments set the rules and consumers stay vigilant, supermarkets must act as the frontline guardians of trust. Their responsibility is absolute: to guarantee that the products they sell are safe and genuine.

模拟卷一 • 听力录音文本

Section A

Directions: In this part, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A, B, C and D, and decide which is the best answer.

Conversation 1

M: Excuse me, I need to register for the new semester but the online system keeps showing an error. Is there another way?

W: You can go to the Graduate Administration Office on the third floor. They can process manual registration until Friday.

M: Thanks. Do I need to bring anything?

W: Just your student ID and the admission notice.

Question: What does the man need to bring for registration?

Conversation 2

W: Have you heard about the new library policy? They've extended the opening hours to midnight on weekdays.

M: Really? That's great news. I've been struggling to find a place to study after 10 p.m.

W: Same here. But the reading rooms on the second floor still close at 10. Only the self-study area stays open.

M: That's fine. I usually prefer the self-study area anyway.

Question: What can be inferred about the library?

Conversation 3

M: Dr. Chen, could you sign this course selection form for me? I'd like to take Advanced Artificial Intelligence this semester.

W: Let me check... You've already completed the prerequisite courses, so that should be fine. But the class is almost full. Have you checked the enrollment status online?

M: Yes, there are only three spots left.

W: Then don't waste time. I'll sign it now and you go submit it immediately.

Question: What concern does the woman express?

Conversation 4

M: I heard the final exam schedule has been changed. Do you know when the Computational Linguistics exam will be now?

W: It was originally on June 15th, but they moved it to June 20th because of the conference.

M: That gives us five extra days to prepare. That's a relief!

W: Don't celebrate too soon. The exam is now in the morning instead of afternoon, and they've added an oral section.

Question: What changes have been made to the exam?

Conversation 5

W: I'm thinking of switching my major from mechanical engineering to aerospace engineering. What do you think?

更多学习资源，关注吉井解学公众号

M: That's a big decision. Aerospace is more specialized. Have you talked to your advisor?

W: Not yet. I wanted to hear your thoughts first since you made a similar switch last year.

M: I'd say go for it if you're passionate, but be prepared for a heavier workload in the first semester.

Question: What advice does the man give?

Conversation 6

M: Excuse me, could you help me locate the journal "Nature Machine Intelligence"? I can't find it in the database.

W: Let me check. It seems our university only has digital access from 2019 to 2025. For issues before 2019, you'll need to use the inter-library loan service.

M: How long does that usually take?

W: About 3 to 5 working days. You can submit the request online through the library portal.

Question: What should the man do to access early issues of the journal?

Conversation 7

M: I've applied for the graduate research fellowship. Do you know when the results will be announced?

W: The committee meets next Monday, and they'll send out notifications by the end of next week.

M: That's sooner than I expected. The website said it would take a month.

W: They've streamlined the process this year. By the way, only 15 out of 60 applicants will receive it, so it's pretty competitive.

Question: What does the woman imply about the fellowship?

Conversation 8

W: I'm having trouble accessing the online learning platform from my laptop. The videos keep buffering.

M: The campus Wi-Fi has been unstable lately. Have you tried connecting from the computer lab in Building C?

W: Not yet. Do they have the necessary software installed?

M: Yes, all the computers there have the latest version of the learning platform and a stable wired connection.

Question: What does the man suggest?

Section B

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage 1:

The 2026 World Artificial Intelligence Conference, or WAIC 2026, opened in Shanghai on July 17th under the theme "Intelligent Connectivity, Infinite Possibilities." The event attracted exhibitors from more than 60 countries and quickly became the focal point for discussions on how AI is reshaping everyday life.

The standout exhibit this year was the Baiyuzhi universal AI platform, which demonstrated breakthroughs across multiple domains. In healthcare, the platform showcased an AI-powered health assistant called HealthPal. HealthPal can analyze a user's voice patterns and facial micro-expressions to provide early warnings of depression and anxiety disorders. Clinical trials have reported an accuracy rate of 89 percent, making it one of the most reliable AI diagnostic tools for mental health.

In urban transportation, the CityFlow intelligent traffic management system has been piloted in Shanghai and Shenzhen. By integrating real-time data from cameras, sensors, and navigation apps, CityFlow dynamically adjusts traffic signal timings and route guidance. Officials report that peak-hour congestion has been reduced by

更多学习资源，关注吉井解学公众号

approximately 23 percent in pilot zones.

The conference also placed significant emphasis on AI ethics. China released the White Paper on Artificial Intelligence Ethics Governance 2026, which proposes a comprehensive framework covering data privacy, algorithmic transparency, and accountability standards. Over 200 industry leaders signed a joint pledge to adopt the guidelines in their product development.

Questions 9 to 11 are based on the passage you have just heard.

Question 9: What was the main theme of WAIC 2026?

Question 10: According to the passage, what health condition can HealthPal help detect?

Question 11: What was one outcome of the CityFlow system mentioned in the passage?

Passage 2

China has taken major strides in both satellite-based computing and reusable rocket technology in 2026. In March, the country successfully launched the Tiansuan-1 space computing experimental satellite, officially kicking off the Space Computing Constellation program. The constellation is planned to consist of over 100 low-orbit satellites forming a space-based computing network that provides real-time computational services to ground users. According to the Zhejiang Laboratory, which leads the project, the constellation has already demonstrated four core capabilities after nine months of in-orbit testing: networking, on-board computing, model deployment, and scientific payload verification. The single-satellite maximum computing power reaches 744 TOPS, making it the world's largest orbital computing constellation.

In May, China Aerospace Science and Technology Corporation achieved another milestone: the first successful sea-based recovery test of the Long March 10 launch vehicle. After completing its launch mission, the rocket's first-stage booster precisely landed on an unmanned recovery vessel stationed in a designated area of the South China Sea. This breakthrough in reusable rocket technology makes China the second country after the United States to master large-scale rocket sea recovery.

Furthermore, in June 2026, the Tianwen-3 Mars sample return mission received formal approval. The mission, scheduled for launch in 2028, aims to retrieve soil and rock samples from the Martian surface and return them to Earth for analysis — a feat no other nation has yet accomplished.

Questions 12 to 14 are based on the passage you have just heard.

Question 12: What is the purpose of the "Space Computing Constellation"?

Question 13: Where did the Long March 10 rocket's first stage land during its recovery test?

Question 14: What was approved in June 2026, according to the passage?

Passage 3

In April 2026, NASA launched the Artemis II mission, marking humanity's first journey to the vicinity of the Moon since Apollo 17 in 1972. Four astronauts — Commander Reid Wiseman, Pilot Victor Glover, Mission Specialist Christina Koch, and Canadian astronaut Jeremy Hansen — boarded the Orion spacecraft, propelled by the powerful Space Launch System rocket, for an approximately ten-day lunar flyby.

The mission represented a critical step in testing deep-space operations. The Orion spacecraft traveled to about 10,000 kilometers beyond the far side of the Moon, where the crew evaluated the performance of life support systems, communication equipment, and navigation instruments under real deep-space conditions. One remarkable moment came when the astronauts conducted the first-ever live video broadcast from deep space, with over 520 million viewers worldwide watching in real time.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

However, the mission was not without challenges. On the third day of the flight, the spacecraft's solar panels experienced a brief power fluctuation that caused temporary concern at mission control. Engineers quickly identified the issue as a calibration anomaly and successfully resolved it by remotely adjusting the panel orientation, restoring full power within two hours.

The Artemis II mission concluded safely, and its success has paved the way for Artemis III, planned for 2027, which aims to land astronauts on the lunar surface for the first time in over five decades. NASA Administrator Bill Nelson called Artemis II "a turning point in human space exploration," adding that it proves we are ready to return to the Moon — and eventually reach Mars.

Questions 15 to 17 are based on the passage you have just heard.

Question 15: How many astronauts were aboard the Artemis II mission?

Question 16: How far did the Orion spacecraft travel beyond the far side of the Moon?

Question 17: What technical issue occurred during the mission?

模拟卷二 • 听力录音文本

Section A

Directions: In this part, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A, B, C and D, and decide which is the best answer.

Conversation 1 (购物退货)

M: I bought this jacket online last week, but the color looks completely different from the picture. The website said "navy blue" but this is practically black. Can I return it?

W: As long as you have the original packaging and the tags are still attached, you're within the 7-day return window. Just bring it to the service desk on the third floor.

Question: What does the woman imply?

Conversation 2 (双十一购物)

M: Did you see the "Double Eleven" pre-sale numbers this year? Total GMV exceeded 1.5 trillion yuan across all platforms. I ended up buying three pairs of shoes I definitely don't need.

W: That's exactly what the platforms want — the flash sale countdowns, the "limited stock" warnings, the stacked coupons. It's all designed to make us impulse-buy. I uninstalled three shopping apps this morning.

Question: What is the woman's attitude toward online shopping platforms?

Conversation 3 (直播购物)

M: I watched a livestream last night where the host claimed this face cream could "erase wrinkles in seven days." I almost bought it, but something felt off.

W: Good instinct. The 2026 revised Advertising Law now requires influencers to label paid promotions clearly, and exaggerated efficacy claims can result in fines up to 2 million yuan. That host was treading on thin ice.

Question: What can be inferred from the conversation?

Conversation 4 (二手交易)

M: I listed my old phone on Xianyu and someone offered me 800 yuan within five minutes. Is that normal? It seems too fast.

W: Be very careful. There's a scam circulating in 2026 where buyers "overpay" via QR code and then ask for a partial refund, but the original payment never clears. Always insist on payment through the platform's official channel.

Question: What is the woman warning the man about?

Conversation 5 (食品安全)

M: After watching this year's 3·15 Gala, I can't look at processed meat products the same way. That segment about using expired raw materials and falsifying production dates was horrifying.

W: And it wasn't just that. The expose on the "premium" cooking oil that was actually repackaged gutter oil was even worse. I've started cooking every meal at home now.

Question: What are the speakers mainly discussing?

Conversation 6 (绿色消费)

M: This new energy vehicle I bought under the trade-in program — the government subsidy covered almost 15% of the cost, and the manufacturer threw in free charging for the first year.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

W: That explains why EV sales jumped 38% in the first half of 2026. The old-for-new policy isn't just boosting consumption; it's genuinely accelerating the green transition.

Question: What do we learn about the trade-in program from this conversation?

Conversation 7 (快递与隐私)

M: I received a package yesterday and the delivery driver asked me to sign on a screen that had a pre-checked box — something about "agreeing to share personal data with partner merchants."

W: That's a classic dark pattern. The 2026 Personal Information Protection Law update explicitly bans pre-ticked consent boxes. You can report that to the local cyberspace administration.

Question: What issue does the conversation address?

Conversation 8 (消费信贷)

M: The "Buy Now, Pay Later" option kept popping up during checkout. Before I knew it, I had four installment plans running simultaneously. Now my monthly payments are eating up 40% of my income.

W: BNPL services have tripled their user base since 2024, but the 2026 central bank report shows that 27% of young users have missed at least one payment. The convenience is seductive, but the debt trap is real.

Question: What does the woman suggest about BNPL services?

Section B

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage 1: 中国2026年消费品以旧换新政策

In 2026, China's consumer goods trade-in program has emerged as one of the most significant economic stimulus measures of the decade. According to data released by the Ministry of Commerce in July 2026, the program drove a total of 1.1 trillion yuan in retail sales during the first half of the year, with over 150 million consumers participating nationwide.

The policy, which was first introduced in 2024 and significantly expanded in early 2026, covers a wide range of products including household appliances, automobiles, furniture, and electronic devices. Consumers who trade in their old products for new, more energy-efficient models receive direct subsidies ranging from 10% to 20% of the purchase price. For new energy vehicles, the subsidy can reach up to 30,000 yuan per vehicle, while old appliance buybacks typically offer between 200 and 1,000 yuan depending on the item and its condition.

The program's impact extends beyond mere sales figures. Environmental analysts estimate that the initiative has prevented approximately 8 million tons of electronic waste from entering landfills, as traded-in products are directed to certified recycling facilities. Furthermore, the policy has stimulated technological upgrading across manufacturing sectors, with companies investing heavily in R&D to produce more energy-efficient models that qualify for the subsidy program—creating a virtuous cycle of innovation and consumption.

Questions 9 to 11 are based on the passage you have just heard.

Question 9: How much in total retail sales did the trade-in program generate in the first half of 2026?

Question 10: What is the maximum subsidy available for a new energy vehicle under the program?

Question 11: According to the passage, what additional environmental benefit has the program achieved?

Passage 2: 2026年3·15晚会——食品安全与消费者权益

The 2026 CCTV 3·15 Gala, broadcast on March 15, once again sent shockwaves through China's consumer

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

market by exposing a series of egregious violations of consumer rights, with food safety taking center stage.

The most alarming investigation revealed a network of workshops in central China that had been reprocessing expired frozen meat products—some dating back to 2022—by washing them with chemical solutions, re-seasoning them heavily, and repackaging them with falsified production dates for sale at discount supermarkets and food delivery platforms. Investigators traced the operation across three provinces, involving at least 12 processing sites that had collectively distributed over 500 tons of potentially hazardous food products.

The broadcast also uncovered fraud in the premium cooking oil industry, where certain manufacturers were blending low-grade rapeseed oil with industrial-grade oil and marketing it as "first-press extra virgin" cooking oil. Laboratory tests commissioned by the program found that samples contained carcinogenic compounds at levels exceeding national safety standards by up to 40 times.

In the weeks following the broadcast, the State Administration for Market Regulation launched a nationwide inspection campaign covering over 8,000 food processing facilities. By April 2026, 47 arrests had been made, 23 production licenses were revoked, and fines totaling 380 million yuan were imposed. The government also announced a mandatory blockchain-based food traceability system for all processed meat and edible oil products, scheduled to take effect in January 2027.

Questions 12 to 14 are based on the passage you have just heard.

Question 12: What was the most shocking revelation in the 2026 3·15 Gala?

Question 13: How many processing sites were involved in the expired meat scandal?

Question 14: What long-term regulatory measure did the government announce after the broadcast?

Passage 3: 2026年暑期绿色消费新趋势

The summer of 2026 witnessed an unprecedented surge in green consumption across China, signaling a fundamental shift in consumer behavior that experts believe may be permanent rather than seasonal.

Data from multiple e-commerce platforms showed that during the June-to-August period, sales of products certified with the "China Green Product" label increased by 67% year-on-year, while searches for "sustainable," "biodegradable," and "carbon-neutral" products rose by 214%. Particularly notable was the explosive growth in the refurbished electronics market, which expanded by 89% as younger consumers increasingly embraced the concept of extending product lifecycles rather than chasing the newest models.

A survey conducted by the China Consumers Association in August 2026, covering 12,000 respondents across 30 cities, found that 64% of consumers aged 18–35 said they were willing to pay a premium of 10%–25% for environmentally sustainable products, up from 41% in a similar 2024 survey. The top three categories for green spending were personal care products (biodegradable packaging), fashion (recycled materials), and home appliances (energy efficiency class A+++).

Industry analysts attribute this shift to multiple converging factors: the continued impact of the government's "dual carbon" goals, increased media coverage of climate-related extreme weather events throughout 2025–2026, and a growing number of brands that have successfully made sustainability a core part of their identity rather than a marketing afterthought. However, experts also caution that "greenwashing"—where companies make misleading claims about environmental benefits—remains a significant challenge, calling for stricter certification standards and consumer education.

Questions 15 to 17 are based on the passage you have just heard.

Question 15: By what percentage did sales of "China Green Product" labeled goods increase in summer 2026

更多学习资源，关注吉井解学公众号

活政策信息(持续更新中)

compared to the previous year?

Question 16: According to the consumer survey, what proportion of young consumers said they would pay extra for sustainable products in 2026?

Question 17: What concern do experts raise about the green consumption trend?

模拟卷三 • 听力录音文本

Section A

Directions: In this part, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A, B, C and D, and decide which is the best answer.

Conversation 1 (天气与出行)

M: The weather app says it's going to hit 39°C this afternoon. I was planning to cycle to the lab, but that's probably not a great idea now.

W: Why don't you take the subway? The new Line 6 extension opened last month — it stops right at the east gate of campus and it's fully air-conditioned.

Question: What does the woman suggest the man do?

Conversation 2 (暴雨预警)

M: Did you get the red alert on your phone? It says heavy rainstorms are expected tonight with accumulated rainfall of up to 150 millimeters. Should we cancel our trip to the mountains tomorrow?

W: Absolutely. The local meteorological bureau just issued a notice that all mountain scenic areas will be closed tomorrow. Landslide risk is rated as "extremely high" for the next 48 hours.

Question: What can be inferred from the conversation?

Conversation 3 (季节性过敏)

M: My eyes are watering and I can't stop sneezing. This happens every April, but this year feels especially brutal.

W: You're not alone. The 2026 pollen count in Beijing is 40% higher than the ten-year average. Doctors are calling it a "pollen super-season" — warmer winters mean trees start releasing pollen earlier and in greater quantities.

Question: What does the woman say about the 2026 allergy season?

Conversation 4 (空调节能)

M: Our electricity bill this month is almost double what it was in June. The air conditioner has been running non-stop.

W: Have you tried setting it to 26°C instead of 22°C? The National Energy Conservation Week campaign recommends that temperature — every degree higher can cut energy consumption by about 6%. Plus it's better for your health.

Question: What energy-saving advice does the woman offer?

Conversation 5 (航班延误)

M: Our flight to Guangzhou has been delayed for three hours. The departure board says "adverse weather conditions" but the sky looks perfectly clear to me.

W: That's because the storm is en route — a massive thunderstorm system is sitting right over our flight path. The 2026 summer has seen 30% more flight disruptions than last year, mostly due to severe convective weather.

Question: Why has the flight been delayed?

Conversation 6 (冬季运动与气候)

M: I used to go ice skating on Houhai Lake every winter when I was a kid, but my son has never had the chance. The lake hasn't frozen thick enough for skating in three years.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中

W: It's the same story across northern China. The average duration of ice cover on urban lakes has shortened by 18 days since the 1990s. Some traditional winter festivals have had to switch to artificial ice rinks.

Question: What are the speakers mainly discussing?

Conversation 7 (碳足迹)

M: I'm trying to calculate my carbon footprint. Apparently a round-trip flight from Beijing to Shanghai generates about 0.25 tons of CO₂ per passenger. That's more than a month of driving.

W: That's why more companies are adopting virtual meeting policies. My firm now requires employees to take the high-speed rail for any domestic trip under 1,000 kilometers. It cuts emissions by nearly 70% compared to flying.

Question: What policy has the woman's company adopted to reduce carbon emissions?

Conversation 8 (垃圾分类)

M: I still get confused about whether this takeout container goes in the recyclables or the "other waste" bin. It has a recycling symbol, but it's covered in oil.

W: If it's contaminated with food residue, it goes in "other waste." The 2026 updated municipal guidelines clarify that only clean, dry packaging is accepted for recycling. Contaminated materials can ruin an entire batch at the sorting facility.

Question: According to the woman, what determines whether the takeout container is recyclable?

Section B

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage 1: 2026年全球极端天气事件

The year 2026 has delivered an extraordinary series of extreme weather events that scientists say bear the unmistakable fingerprint of a warming climate. In the United Kingdom, the village of Coningsby in Lincolnshire recorded a stunning 35.1°C on May 19 — the highest May temperature ever observed in British history, shattering the previous record of 32.8°C set in 1922. The Met Office issued its first-ever "extreme heat" warning for the month of May, and the National Health Service reported a 42% spike in heat-related emergency admissions compared to the May average. Public cooling centers were opened across London, Birmingham, and Manchester, a measure usually reserved for mid-summer.

Meanwhile, in South Asia, the situation was far more dire. The Indian Meteorological Department confirmed that the town of Phalodi in Rajasthan reached 48.2°C on June 3, while the national capital region of Delhi experienced 16 consecutive days above 44°C — the longest such stretch on record. The heatwave claimed over 1,400 lives across India and Pakistan, with outdoor workers, the elderly, and residents of informal settlements bearing the heaviest toll. Hospitals in affected regions reported being overwhelmed by cases of heatstroke and severe dehydration.

On the other side of the globe, the United States was not spared. A "heat dome" settled over the Southwest in July, pushing temperatures in Phoenix, Arizona to 47.8°C for five straight days. Simultaneously, the Mississippi River basin experienced what meteorologists called a "flash drought" — rainfall deficits of over 60% in some areas over just six weeks — disrupting barge traffic and threatening the autumn harvest.

Questions 9 to 11 are based on the passage you have just heard.

Question 9: What record did the UK break in May 2026?

Question 10: How many consecutive days above 44°C did Delhi experience in 2026?

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

Question 11: What weather phenomenon affected the Mississippi River basin in July 2026?

Passage 2: 厄尔尼诺现象2026年进入活跃状态

In August 2026, the World Meteorological Organization officially declared that El Niño conditions had become established in the tropical Pacific Ocean, marking the beginning of what climate models suggest could be one of the strongest El Niño events since the "super El Niño" of 2015–2016.

El Niño, a naturally occurring climate pattern characterized by the unusual warming of surface waters in the eastern equatorial Pacific, occurs every two to seven years and typically lasts nine to twelve months. However, its impacts are anything but local. By altering atmospheric circulation patterns on a global scale, El Niño tends to raise worldwide average temperatures, redistribute rainfall, and increase the frequency and intensity of extreme weather events.

The WMO's August 2026 assessment projected an 85% probability that the current El Niño would persist through at least March 2027. Sea surface temperature anomalies in the Niño-3.4 monitoring region had reached 1.9°C above the long-term average by late July, a level not observed this early in the development cycle since 1997.

Scientists are particularly concerned about the compounding effect of El Niño on top of the long-term global warming trend. Global average temperatures in 2025 were already approximately 1.45°C above pre-industrial levels. The added warming from El Niño could temporarily push global temperatures beyond the symbolic 1.5°C threshold established in the Paris Agreement — not as a permanent breach, but as a foreboding preview of what a 1.5°C world feels like.

The agricultural implications are especially worrying. El Niño typically brings drought conditions to Southeast Asia, Australia, and parts of India, while causing excessive rainfall and flooding in the Horn of Africa and southern United States. Global grain markets have already responded, with wheat futures rising 18% since June on expectations of reduced harvests in Australia and Argentina.

Questions 12 to 14 are based on the passage you have just heard.

Question 12: According to the passage, what is El Niño?

Question 13: What was the sea surface temperature anomaly in the Niño-3.4 region by late July 2026?

Question 14: What particular concern is raised about the combination of El Niño and long-term global warming?

Passage 3: 中国碳达峰碳中和进展与全国节能宣传周

China's pursuit of its "dual carbon" goals — peaking carbon dioxide emissions before 2030 and achieving carbon neutrality by 2060 — reached several significant milestones in 2026, reflecting both policy momentum and structural economic transformation.

According to data released by the National Bureau of Statistics in July 2026, China's carbon intensity — the amount of CO₂ emitted per unit of GDP — declined by 5.2% in the first half of 2026 compared to the same period in 2025, the largest half-year reduction since the dual carbon targets were announced in 2020. This acceleration was driven primarily by the rapid expansion of renewable energy capacity: in the first six months of 2026, China installed 98 gigawatts of new solar and wind capacity, accounting for 67% of all new electricity generation capacity added during the period. Total installed renewable capacity surpassed 1,800 gigawatts in June, placing China firmly on track to meet its 2030 target of 1,200 gigawatts of wind and solar capacity — six years ahead of schedule.

The annual National Energy Conservation Week, held from June 13 to 19, 2026, took on particular significance against this backdrop. Organized under the theme "Green Transition, Shared Future," the campaign featured nationwide initiatives including energy-saving technology exhibitions in 36 major cities, a "Low-Carbon Campus"

活政策信息(持续更新中)

program involving over 500 universities, and the launch of the "Carbon Inclusion" platform — a digital system that allows individual citizens to earn points for low-carbon behaviors such as using public transportation, recycling, and reducing plastic consumption. These points can be redeemed for public service discounts, creating what policymakers describe as a "positive incentive loop" for individual climate action.

Speaking at the opening ceremony, the Minister of Ecology and Environment noted that China's carbon market — the world's largest by covered emissions — had expanded in 2026 to include the building materials and non-ferrous metals sectors, bringing the total share of national emissions covered by carbon pricing to over 70%. Carbon allowance prices on the national Emissions Trading System reached 105 yuan per ton in August 2026, up from 56 yuan at the start of 2024, signaling growing market confidence in the durability of China's climate policy framework.

Questions 15 to 17 are based on the passage you have just heard.

Question 15: By how much did China's carbon intensity decline in the first half of 2026 compared to the same period in 2025?

Question 16: What was the theme of the 2026 National Energy Conservation Week?

Question 17: According to the passage, what new development occurred in China's carbon market in 2026?

模拟卷四 • 听力录音文本

Section A

Directions: In this part, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A, B, C and D, and decide which is the best answer.

Conversation 1 (医院挂号)

M: I've been trying to book an appointment with Dr. Wang in the cardiology department, but the hospital app keeps saying all slots are taken. I've been refreshing the page for two days straight.

W: The hospital upgraded its booking system in February 2026 — now they release new appointment slots every morning at 7:00 sharp. If you log in exactly at that time, your chances are much better. Also, the community health center offers the same ECG and blood tests with basically no waiting.

Question: What does the woman suggest the man do?

Conversation 2 (健康体检)

M: I just got my annual health checkup results back. My blood pressure is 138 over 88, and the report says "pre-hypertension." Should I be worried? I'm only 29.

W: It's a warning sign, not a crisis. The 2026 National Health Commission guidelines classify that as "elevated blood pressure" and recommend lifestyle changes — cutting sodium intake below 5 grams a day, doing 150 minutes of moderate exercise a week, and monitoring at home for three months before even considering medication.

Question: What does the woman recommend the man do about his blood pressure?

Conversation 3 (运动健身)

M: The gym near campus just launched a "mental wellness" membership package that bundles access to yoga, meditation classes, and a sauna for 299 yuan a month. Is it worth it, or is it just marketing?

W: Actually, it aligns with a real trend. Since the 2026 National Fitness and Mental Health Integration Initiative, over 6,000 fitness centers nationwide have added stress-reduction programs. The yoga-and-meditation combination has decent evidence behind it — a Shanghai Jiao Tong University study found an 8-week program reduced anxiety scores by 31%. Whether it's worth 299 yuan depends on how often you'd go.

Question: What does the woman say about the gym's mental wellness package?

Conversation 4 (健康饮食)

M: My roommate has gone full keto — bacon, butter, the works. He says it gives him more energy and mental clarity. I'm tempted to try it, but something about eating that much saturated fat doesn't sit right with me.

W: Trust your instincts. A comprehensive 2026 review in The BMJ analyzed 47 dietary patterns across 1.8 million participants and found that while keto can produce short-term weight loss, the Mediterranean diet and traditional Chinese dietary pattern — think vegetables, whole grains, moderate fish — are the only ones consistently associated with both physical and mental health benefits over the long term.

Question: What does the woman say about the keto diet?

Conversation 5 (睡眠障碍)

M: I lie in bed for hours scrolling through short videos before I fall asleep. I know it's bad, but I can't seem to stop. Now I'm waking up exhausted every morning.

吉大各专业课教材与学习资源
持续更新中

W: You're describing a textbook case of what sleep researchers call "bedtime revenge procrastination" — and the blue light from your phone suppresses melatonin production by up to 55%. The 2026 Chinese Sleep Research Society report found that 38% of adults aged 18–35 exhibit this pattern. Try putting your phone in another room and reading a physical book for 30 minutes before bed — it sounds old-fashioned, but it works.

Question: What is the woman's advice for improving the man's sleep?

Conversation 6 (疫苗接种)

M: My daughter just turned 18, and I'm wondering about the HPV vaccine. I keep hearing about it on the news, but I'm not sure what the current policy is.

W: The 2026 expanded national immunization program now offers free HPV vaccination to all girls and women aged 9 to 26. In 15 pilot cities — including Hangzhou, Chengdu, and Shenzhen — free vaccination has also been extended to boys and young men in the same age range. The program has already delivered over 18 million doses nationwide, and early data shows HPV prevalence among vaccinated groups has dropped by 67%.

Question: What does the woman say about the current HPV vaccination program?

Conversation 7 (心理热线)

M: I've been feeling really down the past few weeks — I can't concentrate on my research, and nothing seems enjoyable anymore. There's a psychological counseling center on campus, but I feel like going there means I'm crazy or weak.

W: That's precisely the stigma we need to break. The 2026 National Mental Health Literacy Survey showed that 67% of people who eventually sought professional help said their biggest regret was not going sooner. The campus center offers completely confidential services — your academic records, your supervisor, nobody will know unless you choose to tell them. Why not just go for one session and see how it feels?

Question: What does the woman encourage the man to do?

Conversation 8 (体重管理)

M: The scale at the campus health center says my BMI is 27.5, and the nurse mentioned something about the "Healthy Weight Management Initiative." Is this some new government campaign?

W: Yes — it's one of the 2026 "Ten Practical Health Services for the People" launched by the National Health Commission. BMI between 24 and 28 is classified as overweight in the Chinese standard, so you're right on the edge. The initiative offers free nutrition counseling and group exercise programs at community health centers. It's not about body shaming — it's about preventing the chronic diseases linked to excess weight, including diabetes and hypertension.

Question: What does the woman say about the Healthy Weight Management Initiative?

Section B

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage 1: AI赋能心理健康——第三届全国社会心理服务创新发展大会

The Third National Social Psychological Service Innovation and Development Conference, held in Beijing from March 28 to 30, 2026, brought together over 2,000 psychologists, AI researchers, and health policymakers to address one of China's most pressing public health challenges. The conference theme — "AI + Internet + Psychological Services" — directly echoed the National Health Commission's 2026 directive calling for the integration of digital

吉大各专业课教材与学习资源
持续更新中(持续更新中)

technologies into the mental health care system.

The statistics that framed the discussions were sobering. According to the China Mental Health Survey, approximately 18.5% of Chinese adults — roughly 200 million people — experienced a diagnosable mental health condition in the preceding year. Yet the country has only about 40,000 licensed clinical psychologists, yielding a ratio of one per 35,000 citizens, far below the WHO-recommended minimum of one per 10,000. In rural areas, the situation is even more dire, with some counties having no mental health professional at all.

The most widely discussed solution was the deployment of large language model-based AI counseling assistants. A system developed at Tsinghua University, already operating in 12 provinces, had processed over 2.3 million screening consultations by March 2026. Using natural language processing to detect markers of depression, anxiety, and suicidal ideation, it achieved an 87% accuracy rate in identifying cases requiring professional intervention. Crucially, the system is not designed to replace therapists: it conducts initial screening, provides psychoeducation and self-help resources for mild cases, and triages high-risk individuals to human professionals. Conference chair Dr. Li Xiaoming described this as a "collaborative intelligence" model — one in which AI handles the volume problem while humans provide the empathy and clinical judgment that no algorithm can replicate.

By the conference's close, 14 provinces had announced plans to integrate AI mental health screening into their primary care systems by 2027, and a new national accreditation framework for AI-based mental health tools had been drafted. Whether these technologies can fulfill their promise without compromising privacy and therapeutic quality remains a subject of intense debate — but the direction of travel is unmistakable.

Questions 9 to 11 are based on the passage you have just heard.

Question 9: According to the passage, what is the current ratio of licensed clinical psychologists to the population in China?

Question 10: What accuracy rate did the Tsinghua University AI system achieve in identifying cases requiring professional intervention?

Question 11: What term does Dr. Li Xiaoming use to describe the intended relationship between AI and human therapists?

Passage 2: 非药物干预新突破——国产眼动追踪眼镜与精神疾病筛查

In June 2026, Science and Technology Daily published a landmark report on a domestically developed eye-tracking system that promises to transform how mental illnesses are detected in China. Unlike traditional psychiatric assessment — which relies heavily on subjective self-report questionnaires and time-intensive clinical interviews — this new technology analyzes objective physiological markers of attention and emotional processing.

The device, developed by a collaborative team from the Chinese Academy of Sciences' Institute of Psychology and a Hangzhou-based medical technology company, takes the form of lightweight glasses equipped with infrared cameras that track the wearer's eye movements in real time. The system measures three key parameters: fixation duration (how long the eyes linger on emotionally salient images), saccade velocity (the speed of eye movements between points of focus), and pupil dilation in response to affective stimuli. Machine learning algorithms then compare these patterns against a database of over 8,000 clinically diagnosed cases to generate a risk assessment.

What makes this development particularly significant is its cost. While earlier eye-tracking systems used in research settings cost upwards of 200,000 yuan per unit, the domestically produced glasses have brought the price down to approximately 4,800 yuan — less than the cost of a mid-range smartphone. In clinical trials involving 1,200 participants across five hospitals, the system demonstrated a screening accuracy rate of approximately 80% for major

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
海量信息(持续更新中)

depressive disorder and 78% for generalized anxiety disorder. These figures are not high enough to replace formal diagnosis by a psychiatrist, but they are sufficient for large-scale population screening — the equivalent of a "blood pressure cuff for mental health," as the lead researcher described it.

The technology has already been deployed in 200 community health centers across Zhejiang and Jiangsu provinces as part of a pilot program, and the National Medical Products Administration granted it Class II medical device registration in April 2026. Researchers are now exploring its potential for tracking treatment response over time — allowing clinicians to objectively measure whether a given therapy is working, rather than relying solely on the patient's subjective report. Experts caution, however, that the technology must be used as a screening adjunct, not a standalone diagnostic tool, given that its accuracy, while promising, still leaves room for both false positives and false negatives.

Questions 12 to 14 are based on the passage you have just heard.

Question 12: What is the approximate cost of the domestically produced eye-tracking glasses mentioned in the passage?

Question 13: What screening accuracy rate did the eye-tracking system achieve for major depressive disorder in clinical trials?

Question 14: How does the lead researcher characterize the role of the eye-tracking device in mental health care?

Passage 3: 2026年卫生健康系统为民服务十件实事——从心理门诊到预防保健

In January 2026, the National Health Commission unveiled its annual "Ten Practical Health Services for the People," a comprehensive package backed by 47 billion yuan in central government funding. The initiative represents one of the most ambitious expansions of public health services in China's recent history, with mental health access, preventive care, and women's health as its three flagship priorities.

The mental health component is arguably the most transformative. By the end of 2026, every county-level hospital in China is required to establish a dedicated psychological counseling outpatient clinic staffed by at least one full-time licensed professional. In urban areas, the target is one community mental health station for every 50,000 residents. To overcome the severe shortage of qualified personnel — China currently graduates only about 5,000 clinical psychology students per year — the government launched an accelerated training program aiming to produce 30,000 additional mental health workers over a three-year period through university expansion, online certification, and retraining of existing medical staff.

Weight management constitutes the second major pillar. Recognizing that obesity and overweight now affect more than 50% of Chinese adults — a figure that has nearly doubled since 2000 — the initiative mandates free nutrition counseling, physical activity prescriptions, and BMI screening at all community health centers. A notable feature is the integration of weight management with mental health services, reflecting growing evidence that obesity and depression are bidirectional risk factors: each increases the likelihood of the other, and treating one without addressing the other often yields poor results.

Women's health received particular attention. The HPV vaccination program, previously limited to girls aged 13–15 in select cities, was expanded nationwide to cover all girls and young women aged 9–26, with free doses provided. Additionally, 15 pilot cities began offering free HPV vaccination to boys and young men in the same age range, acknowledging the role of gender-neutral vaccination in achieving herd immunity against cervical cancer and other HPV-related diseases. By June 2026, over 18 million doses had been administered under the expanded program.

Cancer screening was also significantly expanded. Building on successful pilot programs, free screening for

更多学习资源，关注吉井解学公众号

cervical, breast, colorectal, and lung cancer will be made available to all citizens aged 40–74 by 2028, with the first phase — covering 120 million people — launched in 2026. Early data from the pilots showed a 35% reduction in late-stage cancer diagnoses among screened populations. Speaking at the program's mid-year review in July 2026, the NHCommissioner summarized the philosophy behind the package: "Health is not merely the absence of disease — it encompasses mental well-being, preventive care, and equitable access for all."

Questions 15 to 17 are based on the passage you have just heard.

Question 15: Under the 2026 health initiatives, what is the target for community mental health stations in urban areas?

Question 16: How many additional mental health workers does the government aim to train over the three-year accelerated program?

Question 17: According to the passage, what percentage of Chinese adults are now affected by obesity or overweight?

Section A

Directions: In this part, you will hear 8 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question, there will be a pause. During the pause, read the four choices marked A, B, C and D, and decide which is the best answer.

Conversation 1 (旅行订票)

M: I've been trying to book flights to Mexico City for the World Cup opening ceremony, but every website shows tickets either sold out or priced at five times the normal rate. It's insane.

W: That's June for you — peak season plus the World Cup. Have you considered flying into a nearby city like Guadalajara and taking a domestic connection? It could save you hundreds of dollars.

Question: What does the woman suggest the man do?

Conversation 2 (体育观赛)

M: Did you watch the Champions League final last night? That bicycle kick goal in the 89th minute was absolutely unreal. I've rewatched it five times this morning.

W: I missed it live, unfortunately — I was stuck in a lab meeting until 10 p.m. But I've seen the highlights all over social media. The goalkeeper didn't even move; he just watched it sail into the top corner.

Question: What are the speakers mainly talking about?

Conversation 3 (冬奥会回顾)

M: I still can't get over the women's figure skating final at Milano-Cortina. The way the Japanese skater landed that triple axel — and then the Italian skater responded with a personal best in the free skate. That competition will be talked about for decades.

W: What struck me most was the sportsmanship. The Italian skater was the first to embrace the Japanese competitor after her score was announced. Moments like that transcend medals.

Question: What does the woman find most memorable about the figure skating final?

Conversation 4 (电影讨论)

M: I saw "A Love Letter to Grandma" over the weekend. I'll admit, I wasn't expecting much from a film with such a simple title, but by the end I was in tears — and so was everyone else in the theater.

W: It's the sincerity that gets you. The director didn't rely on melodrama or special effects; it's just a beautifully told story about the relationship between a grandmother and her grandson. No wonder it's crossed 1.5 billion yuan at the box office.

Question: What does the woman attribute the film's success to?

Conversation 5 (旅行计划)

M: I'm planning a trip to Italy this summer. I want to visit some of the Winter Olympic venues — Cortina, the sliding center, maybe even try the bobsled track if they offer tourist rides.

W: They do, actually. The Cortina Sliding Centre is open to the public from May through October with a guided experience. But you'll need to book at least two months in advance — post-Olympic tourism has been booming there since February.

Question: What does the woman tell the man about the Olympic venue?

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

Conversation 6 (世界杯抽签)

M: Did you hear about the World Cup ticket lottery results? Over 20 million applications were submitted for the first phase, but only about 2 million tickets were allocated. My cousin in Toronto applied for all three of Canada's group-stage matches and got nothing.

W: With 48 teams and 104 matches, demand was always going to outstrip supply. Your best bet now is the resale platform, but FIFA has capped resale prices at 110% of face value to prevent scalping.

Question: What do we learn about World Cup tickets from the conversation?

Conversation 7 (演唱会与文化)

M: I heard that a K-pop group is performing at the World Cup fan festival in New York during the tournament. Is that actually happening?

W: Yes — FIFA has organized cultural performances at all 16 host cities throughout the tournament. The opening ceremony at Estadio Azteca will feature artists from all three host nations. It's not just about football; it's a global cultural celebration.

Question: What does the woman say about the World Cup cultural events?

Conversation 8 (文旅打卡)

M: I saw photos of that village from "A Love Letter to Grandma" — the one with the ancient banyan tree and the stone-paved alleys. It's apparently been flooded with tourists since the movie came out. Is it worth visiting?

W: Honestly, the village is beautiful, but go on a weekday and arrive before 8 a.m. The local government told me that daily visitor numbers jumped from around 300 to over 8,000 after the film's release. The infrastructure wasn't designed for that volume.

Question: What concern does the woman raise about visiting the filming location?

Section B

Directions: In this section, you will hear three short passages. Each passage will be read only once. At the end of each passage, you will hear three questions. After each question, you will have a short pause to read the four choices and decide which is the best answer.

Passage 1: 2026年FIFA世界杯——三国联合举办书写新历史

The 2026 FIFA World Cup, scheduled from June 11 to July 19, will mark a historic first: for the first time in the tournament's 96-year history, the event will be hosted by three nations — the United States, Canada, and Mexico — spanning an entire continent.

The tournament will also be the first to feature 48 teams, expanding from the traditional 32-team format that had been in place since 1998. This expansion increases the total number of matches from 64 to 104, with the group stage consisting of 16 groups of three teams each. The top two teams from each group will advance to a new round of 32, followed by a knockout format familiar to fans worldwide.

Sixteen host cities have been selected: 11 in the United States (including New York/New Jersey, Los Angeles, Dallas, and Atlanta), 3 in Mexico (Mexico City, Monterrey, and Guadalajara), and 2 in Canada (Toronto and Vancouver). The opening match will be held at Mexico City's iconic Estadio Azteca, which will become the first stadium to host World Cup matches in three different tournaments (1970, 1986, and 2026). The final is scheduled for MetLife Stadium in East Rutherford, New Jersey.

Organizers estimate that over 5.5 million tickets will be sold, shattering previous records. The economic impact across the three host nations is projected to exceed \$11 billion, with the creation of approximately 140,000 jobs. FIFA

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

has also emphasized sustainability, pledging to offset all carbon emissions associated with the tournament and requiring all stadiums to meet stringent environmental standards.

Questions 9 to 11 are based on the passage you have just heard.

Question 9: How many teams will participate in the 2026 FIFA World Cup?

Question 10: Which stadium will host the opening match of the tournament?

Question 11: According to the passage, what is special about Estadio Azteca?

Passage 2: 2026年米兰-科尔蒂纳冬奥会——可持续性与传统的交融

The 2026 Winter Olympics, officially known as Milano-Cortina 2026, took place from February 6 to 22, bringing the Winter Games back to Italy for the first time since Torino hosted them in 2006. The event was distinctive not only for its stunning Alpine scenery but also for its innovative approach to sustainability and territorial organization.

Unlike traditional Olympics concentrated in a single city, Milano-Cortina 2026 was spread across multiple clusters spanning northern Italy. Milan hosted ice sports — figure skating, speed skating, ice hockey, and curling — in state-of-the-art venues such as the PalaItalia Santa Giulia. Cortina d'Ampezzo, the glamorous resort town in the Dolomites, staged alpine skiing events, while Val di Fiemme hosted Nordic skiing, ski jumping, and the new Olympic discipline of ski mountaineering. Biathlon competitions took place in Anterselva, and the sliding sports — bobsled, luge, and skeleton — were held at the rebuilt Cortina Sliding Centre.

Approximately 2,900 athletes from 93 countries participated, competing across 116 medal events. An important milestone was achieved in gender equality: for the first time in Winter Olympic history, female athletes accounted for 47% of all participants — the highest proportion ever recorded.

The organizing committee placed sustainability at the core of its operations. An impressive 93% of competition venues were either existing or temporary structures, dramatically reducing the construction costs and environmental footprint that have plagued previous Games. The Olympic Village in Milan was designed to be converted into affordable student housing after the Games, while the athletes' accommodations in Cortina were integrated into existing hotel infrastructure.

Questions 12 to 14 are based on the passage you have just heard.

Question 12: What was a distinctive organizational feature of Milano-Cortina 2026?

Question 13: According to the passage, what was achieved in terms of gender equality at these Games?

Question 14: How did the organizers address sustainability concerns?

Passage 3: 《给阿嬷的情书》——一部电影如何点燃文旅经济

In the summer of 2026, a modestly budgeted Chinese film titled "A Love Letter to Grandma" (《给阿嬷的情书》) became an unexpected cultural phenomenon, grossing over 1.5 billion yuan at the domestic box office and igniting a wave of cultural tourism that has drawn the attention of economists and cultural policymakers alike.

The film, directed by first-time feature filmmaker Chen Yuning, tells the story of a young urban professional who returns to his rural hometown after his grandmother falls ill. Through a series of flashbacks triggered by old letters, photographs, and family recipes, the protagonist rediscovers the quiet wisdom and unconditional love his grandmother embodied — a love he had taken for granted in his pursuit of career success in the city. Critics praised the film's understated performances, its lush cinematography of the Fujian countryside, and its refusal to resort to sentimental manipulation.

However, the film's most surprising impact occurred off-screen. The village where it was filmed — a 600-year-

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

old settlement in Fujian Province known for its well-preserved Ming-dynasty architecture and a centuries-old banyan tree — saw its daily visitor numbers surge from approximately 300 to over 8,000 within two months of the film's release. Local homestays reported occupancy rates of 98% during the summer season, and the county's tourism revenue for June–August 2026 tripled compared to the same period in 2025.

This phenomenon has been hailed as a textbook example of the "film + cultural tourism" consumption model that China's cultural authorities have been actively promoting. Unlike fleeting social media-driven tourism fads, the film created a deep emotional connection between audiences and the location, transforming the village from a mere backdrop into a character in its own right. The local government responded by developing heritage walking routes, establishing a film museum, and launching a "grandmother's kitchen" culinary experience — all designed to sustain interest beyond the initial wave. By September 2026, over 30 similar film-tourism partnerships had been announced across China, suggesting that "A Love Letter to Grandma" may have launched not just a box office success but an enduring economic model.

Questions 15 to 17 are based on the passage you have just heard.

Question 15: What is the film "A Love Letter to Grandma" about?

Question 16: How did the film affect tourism at its filming location?

Question 17: According to the passage, what distinguishes this "film + cultural tourism" model from short-lived social media tourism trends?
