目录

1. 大学应更注重未来工作能力还是学术能力	1
2. 读研好还是工作好	1
3. AI 的好坏	2
4. 家长要不要给孩子犯错的自由	2
5. 健康预防和治疗哪个更重要	3
6. 政府送孩子上学 vs 家长职责	3
7. 当代人要孩子越来越晚	4
8. 东北烧烤减少碳排放、煤炭使用	4
9. 道路安全：司机每年考试	5
10. 学文化最好方式是学它的语言	5
11. 学历过高/学历贬值对就业市场的危害	6
12. 文科就业率低于理工科（结合自身经历）	6
13. 越来越多人出国旅游	7
14. 毕业生找不到对口工作	7
15. 是否只保护对人类有用的动物	8
16. 是否让渡舒适以保证后代环境	8
17. STEM 是否总比人文更容易就业	9
18. 音乐是人类通用语言	9
19. 定期体检 vs 感觉良好就不用	10
20. 超市卖假货怎么保护消费者	10
21. 教师薪水与学生学习水平挂钩	11
22. 塑料污染的危害与措施	11
23. 毕业生跳槽	12
24. 间隔年（gap year）	12
25. 在家学习，学校还有必要吗	12
26. 无人驾驶汽车	13
27. 帮助发展中国家：财政帮扶 vs 实用援助与建议	13
28. 为什么人们会吃不健康的食物	14
29. 刚毕业的学生不会理财	14
30. 快餐取代传统食物对社会和家庭的影响	15
英语作文万能行文范式（考场以不变应万变）	16

请注意：考试时题目只有英文，所以读懂题是第一步也是关键，审题错误功亏一篑!!! 写作词数不少于150词

1. 大学应更注重未来工作能力还是学术能力

英文原题：

Some people believe that university education should focus on the skills of employment for the future. Others think they should focus on academic study only. Discuss both views and give your own opinion.

中文翻译：一些人认为大学教育应注重培养面向未来的就业技能，另一些人则认为大学只应专注于学术学习。请讨论这两种观点并给出你的看法。

【参考范文】

There is much debate about whether universities should focus more on employment skills or academic study. In my opinion, a balanced combination of the two is the best approach.

On the one hand, those who favour employment skills argue that most students attend university in order to secure a good job. In today's highly competitive job market, graduates with practical abilities such as communication, teamwork and computer literacy are highly valued by employers. If universities only teach abstract theories, students may find it difficult to enter the workforce after graduation.

On the other hand, supporters of academic study believe that universities are places for acquiring knowledge and developing critical thinking. Academic subjects teach students how to think independently, analyse problems and pursue truth. These abilities are indispensable not only for careers but also for lifelong personal growth.

In my view, the two goals are not contradictory. Universities should combine academic teaching with practical training so that students can gain both solid knowledge and employable skills.

In conclusion, universities should strike a balance between future employability and academic excellence, since both are essential for students' long-term development.

2. 读研好还是工作好

英文原题：

Suppose you have two options upon graduation: one is to take a job in a company and the other to go to a graduate school. You are to make a choice between the two. Write an essay to explain the reasons for your choice.

中文翻译：假设毕业时你有两个选择：去公司工作，或去读研。你需在两者间做出选择，请写一篇文章说明你选择的原因。

【参考范文】

Suppose I had to choose between taking a job and going to graduate school upon graduation, I would choose to pursue a postgraduate degree, and here are my reasons.

First of all, a master's degree can significantly enhance my career prospects. In an increasingly competitive job market, many well-paid positions now require an advanced degree. With further study, I would be more likely to gain access to better job opportunities and earn a higher salary in the future.

Secondly, graduate school provides a valuable opportunity to deepen my knowledge in my chosen field. During postgraduate study, I can conduct research under the guidance of experienced professors, sharpen my professional skills and develop independent thinking. This academic training would benefit me throughout my career.

Finally, further study also offers more time for me to figure out what I really want to do. Entering the workforce too early might lead me into a job that does not suit my interests and abilities.

Of course, working immediately has its merits, such as earning money and gaining social experience earlier.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中

However, considering the long-term benefits, I firmly believe that going to graduate school is the wiser choice for me.

3. AI 的好坏

英文原题:

Some people believe that the development of artificial intelligence (AI) will bring more benefits than drawbacks.

To what extent do you agree or disagree?

中文翻译: 一些人认为人工智能的发展带来的好处多于坏处。你在多大程度上同意或不同意?

【参考范文】

Some people believe that the development of artificial intelligence will bring more benefits than drawbacks, and I largely agree with this view.

On the positive side, AI has greatly improved efficiency in many areas. In medicine, AI systems can analyse medical images and help doctors detect diseases at an early stage. In manufacturing, robots powered by AI can work around the clock, reduce costs and improve productivity. In our daily life, AI assistants make communication, shopping and travelling far more convenient than ever before.

However, we should not ignore the potential drawbacks. One major concern is that AI may replace many traditional jobs, leading to unemployment. In addition, there are risks related to privacy and safety if AI technology is misused. Without proper regulation, artificial intelligence could cause serious social problems.

In my opinion, whether AI is a blessing or a curse depends on how we use it. If governments introduce reasonable laws and companies use the technology responsibly, the advantages of AI will clearly outweigh the disadvantages.

In conclusion, I believe that artificial intelligence brings more benefits than drawbacks, provided that we manage its risks wisely.

4. 家长要不要给孩子犯错的自由

英文原题:

Some people think children have the freedom to make mistakes, while other people believe that adults should prevent children from making mistakes. Discuss both views and give your own opinion.

中文翻译: 一些人认为孩子应有犯错的自由, 另一些人则认为成年人应阻止孩子犯错。请讨论两种观点并给出你的看法。

【参考范文】

People have different views about whether children should be allowed to make mistakes. In my opinion, giving children a certain freedom to make mistakes is essential for their growth.

On the one hand, those who oppose this freedom argue that adults should protect children from harm. Since children are immature and lack experience, some mistakes may be dangerous or costly. For example, if a child is allowed to play near a busy road, the consequences could be serious. From this perspective, preventing mistakes is a way of ensuring children's safety.

On the other hand, allowing children to make mistakes can be highly educational. When children fail, they learn to reflect on their actions and find better solutions, which helps them build resilience and problem-solving skills. If parents always step in to prevent mistakes, children may become over-dependent and unable to cope with difficulties in the future.

In my view, a middle way is the best. Parents should protect children from serious dangers, but at the same time allow them to make minor mistakes and learn from the consequences.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

In conclusion, the freedom to make mistakes, when properly guided, is a valuable part of a child's education.

5. 健康预防和治疗哪个更重要

英文原题:

"Prevention is better than cure." Out of a country's health budget, a large proportion should be diverted from treatment to spending on health education and preventative measures. To what extent do you agree or disagree with this statement?

中文翻译: "预防胜于治疗。"在国家的卫生预算中, 应把很大一部分从治疗转向健康教育和预防措施的支出。你在多大程度上同意或不同意这一说法?

【参考范文】

The saying "prevention is better than cure" suggests that a large share of a country's health budget should be spent on health education and preventive measures rather than treatment. I strongly agree with this view.

First of all, prevention is far more cost-effective than treatment. Treating serious diseases such as heart disease or cancer often requires expensive operations, medicines and long-term hospital care. In contrast, preventive measures such as vaccination, health education and regular exercise cost much less but can stop many illnesses from developing in the first place.

Secondly, prevention improves people's overall quality of life. A healthy population is more productive and suffers less physical and mental pain. If governments spend money on teaching people to eat healthily and exercise regularly, the burden on hospitals will be greatly reduced.

However, this does not mean that treatment is unimportant. Even the best prevention cannot eliminate all diseases, so adequate funding for treatment and hospitals is still necessary.

In conclusion, I agree that governments should divert a large proportion of health spending from treatment to prevention, while keeping enough resources for those who do fall ill.

6. 政府送孩子上学 vs 家长职责

英文原题:

Some people think that it is government's responsibility to transport children to school, while others think parents should get their children to school. Discuss both views and give your own opinion.

中文翻译: 一些人认为接送孩子上学是政府的责任, 另一些人则认为应由家长负责。请讨论两种观点并给出你的看法。

【参考范文】

Some people think it is the government's responsibility to transport children to school, while others believe parents should do so. In my opinion, parents should take the main responsibility, though governments can provide helpful support.

On the one hand, those who favour government transport argue that school buses can reduce traffic congestion and improve safety. If the government provides reliable school bus services, children from all families can get to school easily, especially those whose parents are busy with work.

On the other hand, taking children to school is widely seen as part of parental duty. Parents know their children's needs best and can ensure their safety along the way. Moreover, walking or driving children to school offers a valuable chance for parents and children to communicate.

In my view, the primary responsibility should rest with parents, but this does not mean the government has no role. For families living in remote areas or those with special difficulties, the government should provide school buses

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

or subsidies to ensure that every child can attend school.

In conclusion, parents should normally be responsible for getting their children to school, while the government should offer support to those in need.

7. 当代人要孩子越来越晚

英文原题:

Nowadays, more and more people decide to have children later in their life. What are the reasons? Do the advantages of this outweigh the disadvantages?

中文翻译: 如今越来越多的人决定晚些要孩子。原因是什么? 这样做的利是否大于弊?

【参考范文】

Nowadays, more and more people decide to have children later in life. Several reasons can account for this trend, and I believe its advantages outweigh the disadvantages.

There are mainly two reasons. First, many young people now give priority to their education and career. They need several years to complete university study and establish themselves professionally before they feel financially ready to raise children. Second, the rising cost of living and housing means that having a child early would put great financial pressure on a young couple.

Delaying parenthood has clear advantages. Parents who have children later tend to be more mature, more patient and financially stable, so they can provide their children with a better upbringing and education. They also have more life experience to pass on to their children.

Of course, there are some drawbacks. Older parents may face greater health risks during pregnancy, and they may have less energy to care for young children.

In conclusion, although having children later brings some risks, I believe the benefits, such as greater maturity and financial security, make it a reasonable choice for many people today.

8. 东北烧烤减少碳排放、煤炭使用

英文原题:

The barbecue industry in Northeast China relies heavily on coal and produces large amounts of carbon emissions. What measures should be taken to reduce carbon emissions and the use of coal?

中文翻译: 东北的烧烤行业大量依赖煤炭并产生大量碳排放。应采取哪些措施来减少碳排放和煤炭使用?

【参考范文】

The barbecue industry in Northeast China relies heavily on coal and produces large amounts of carbon emissions. Several measures should be taken to reduce carbon emissions and the use of coal.

First of all, the government should encourage barbecue restaurants to replace coal with cleaner energy. For example, electricity and natural gas produce far fewer emissions than coal, so offering subsidies to businesses that switch to these energy sources would be an effective step.

Secondly, stricter environmental regulations should be introduced. Local governments can set emission standards and require restaurants to install smoke-purifying equipment. Those that fail to meet the standards should be fined or ordered to improve their facilities.

Thirdly, raising public awareness is also important. Through publicity campaigns, consumers can be encouraged to choose restaurants that use clean energy, which would push more businesses to make the change.

Finally, research into new clean-burning technology should be supported, so that traditional barbecue flavour

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习资源
持续更新中(持续更新中)

can be preserved while emissions are reduced.

In conclusion, by combining government subsidies, strict regulations, public education and technological innovation, the barbecue industry in Northeast China can significantly cut its carbon emissions and dependence on coal.

9. 道路安全：司机每年考试

英文原题：

Some people think that the best way to improve road safety is to make vehicle drivers take a driving test each year. To what extent do you agree or disagree?

中文翻译：一些人认为提高道路安全的最佳方式是让司机每年参加一次驾驶考试。你在多大程度上同意或不同意？

【参考范文】

Some people think that the best way to improve road safety is to make drivers take a driving test every year. However, I disagree with this view because it is neither the most effective nor the most practical solution.

On the one hand, annual driving tests could encourage drivers to maintain good skills and knowledge of traffic rules. Drivers who have not driven for a long time might forget important rules, and regular tests could remind them of safe driving habits.

On the other hand, this approach has serious drawbacks. First, it would be extremely costly and time-consuming. Organizing tests for millions of drivers every year would place a huge burden on both the government and drivers themselves. Second, passing a test does not guarantee safe driving on the road. Many accidents are caused by careless or aggressive driving rather than a lack of knowledge.

In my view, road safety can be improved more effectively through other measures, such as stricter enforcement of traffic laws, better road design and public education campaigns.

In conclusion, while annual tests have some merit, I believe they are not the best way to improve road safety, and more practical alternatives should be adopted.

10. 学文化最好方式是学它的语言

英文原题：

The best way to learn a culture is to learn its language. To what extent do you agree or disagree?

中文翻译：了解一种文化最好的方式就是学习它的语言。你在多大程度上同意或不同意？

【参考范文】

Some people argue that the best way to learn a culture is to learn its language. I largely agree with this view, though I believe there are other valuable ways as well.

Language is the most direct window into a culture. Through language, we can read a country's literature, understand its history and appreciate its traditions. Many cultural concepts, such as humour, politeness and values, are deeply embedded in words and expressions that cannot be fully understood through translation. For example, idioms and proverbs often reveal how a nation thinks and what it values.

Moreover, learning a language enables us to communicate with local people, which is the most authentic way to experience a culture. By talking with native speakers, we can understand their daily life, customs and ways of thinking far better than by merely reading books.

However, language is not the only path to culture. One can also learn a culture through its food, music, festivals and art, or by living in the country for a period of time.

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

In conclusion, while learning the language is indeed one of the best and most effective ways to understand a culture, it should be combined with other experiences for a fuller picture.

11. 学历过高/学历贬值对就业市场的危害

英文原题:

Overqualification and the devaluation of academic degrees are having a negative impact on the job market. What are the causes of this phenomenon, and what measures can be taken to solve it?

中文翻译: 学历过高与学历贬值正对就业市场产生负面影响。这一现象的成因是什么? 可以采取哪些措施解决?

【参考范文】

Overqualification and the devaluation of academic degrees are having a negative impact on the job market. There are several causes behind this phenomenon, and a number of measures can be taken to solve it.

One major cause is the rapid expansion of higher education. As universities admit more and more students, the number of graduates has grown far faster than the number of skilled jobs available. As a result, a degree is no longer a guarantee of employment, and many graduates are forced to accept jobs that do not require their qualifications.

Another cause is the mismatch between education and market demand. Many universities focus on theory rather than practical skills, so graduates often lack the abilities that employers actually need.

To address this problem, several measures should be taken. First, universities should adjust their courses to meet the real needs of the job market, offering more practical training and internship opportunities. Second, governments should encourage the development of vocational education, which can provide students with useful skills. Finally, graduates themselves should lower unreasonable expectations and be willing to start from junior positions.

In conclusion, overqualification is a serious issue, but it can be eased through reforms in education and a more realistic attitude among graduates.

12. 文科就业率低于理工科(结合自身经历)

英文原题:

Why are the employment rates of liberal arts majors lower than those of technical majors? Please analyze the possible reasons and illustrate your points with your own experience.

中文翻译: 为什么文科专业就业率低于理工科专业? 请分析可能的原因, 并结合自身经历加以说明。

【参考范文】

Why are the employment rates of liberal arts majors lower than those of technical majors? There are several reasons, and I can also draw on my own experience to illustrate them.

First, technical majors usually teach specific, practical skills that match the direct needs of the job market. Engineers, programmers and medical professionals are in high demand because their abilities are easy to measure and apply. In contrast, the knowledge gained from liberal arts subjects is often more general and harder to link to a particular job.

Second, the economy increasingly favours technology-driven industries, so companies create far more positions for technical graduates. My own experience confirms this point. When I searched for internships last summer, almost all the well-paid positions advertised were in engineering and information technology, while vacancies suitable for humanities students were few and mostly poorly paid.

Third, some employers hold a biased view that liberal arts graduates lack practical skills, which further reduces their job opportunities.

更多学习资源，关注吉井解学公众号

吉大各学院电子教材与学习资源
持续更新中

However, I believe this does not mean liberal arts are worthless. Humanities graduates often have strong communication and critical-thinking abilities, which are valuable in the long run. The key is for them to combine these abilities with practical skills.

13. 越来越多人出国旅游

英文原题:

Many people today are choosing to travel to other countries. Why is this happening? Is this a positive or negative development?

中文翻译: 如今很多人选择去其他国家旅游。为什么会这样? 这是积极还是消极的发展?

【参考范文】

Nowadays, more and more people are choosing to travel abroad. There are several reasons for this trend, and I believe it is a positive development overall.

One main reason is that international travel has become much more affordable. With the growth of low-cost airlines and online booking platforms, ordinary people can now visit foreign countries at a reasonable price. Another reason is rising incomes, which give more families the financial ability to travel overseas. In addition, many people are curious about different cultures and want to broaden their horizons.

This trend brings clear benefits. For travellers, visiting other countries broadens their minds, exposes them to different customs and helps them relax and recharge. For the destination countries, tourism creates jobs and generates income, improving the local economy and living standards.

Of course, mass tourism also has some negative effects, such as environmental damage and the loss of local traditions. Excessive construction of hotels and roads may spoil the natural landscape.

In conclusion, although we should manage its drawbacks carefully, the growing popularity of international travel is, on the whole, a positive development for both individuals and society.

14. 毕业生找不到对口工作

英文原题:

Many university graduates cannot find a job in their chosen profession. What factors may have caused this situation and what, in your opinion, should be done about it?

中文翻译: 许多大学毕业生找不到与本专业对口的工作。是什么因素导致了这一状况? 依你之见应如何解决?

【参考范文】

Many university graduates cannot find a job in their chosen profession. This situation is caused by several factors, and effective measures should be taken to address it.

One key factor is the mismatch between what universities teach and what the job market needs. Many courses focus heavily on theory and offer little practical training, so graduates often lack the skills that employers require. Another factor is the oversupply of graduates in certain fields. In many countries, far more students study popular subjects such as business or literature than the market can absorb.

To solve this problem, several steps can be taken. First, universities should strengthen career guidance and offer more internships, so that students understand the real requirements of their profession before they graduate. Second, curricula should be updated regularly to keep pace with changes in the job market. Finally, graduates should be more flexible, willing to accept related jobs or further training when their ideal positions are unavailable.

In conclusion, although the difficulty of finding a job in one's own profession is a serious problem, it can be

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

relieved through closer cooperation between universities and employers and a more adaptable attitude among graduates.

15. 是否只保护对人类有用的动物

英文原题:

Many animals are in danger of extinction. Some people say only animals that are useful to humans should be protected. To what extent do you agree or disagree?

中文翻译: 许多动物濒临灭绝。有些人认为只应保护对人类有用的动物。你在多大程度上同意或不同意?

【参考范文】

Some people argue that we should only protect animals that are useful to humans. However, I completely disagree with this view.

First of all, every species plays a role in the ecosystem, and the loss of any animal can upset the natural balance. Even animals that seem useless to humans may be essential food for other creatures or help maintain a healthy environment. If we only protect useful animals, many species would become extinct, and the whole ecosystem would suffer.

Secondly, judging animals only by their usefulness to humans is short-sighted and selfish. Many animals may prove valuable in the future, for example in medicine or scientific research, even if their value is not obvious today.

Thirdly, human beings have a moral responsibility to protect wildlife. Animals have the right to exist, regardless of whether they benefit us. By protecting them, we maintain the natural balance of all life on Earth.

In conclusion, we should not protect animals merely because they are useful to us. Instead, we should make every effort to protect all endangered species, since they are all part of our shared planet.

16. 是否让渡舒适以保证后代环境

英文原题:

The key to solving environmental problems is for the present generation to sacrifice their convenient way of life for the sake of future generations. To what extent do you agree or disagree?

中文翻译: 解决环境问题的关键在于, 当代人要为子孙后代牺牲自己便利(舒适)的生活方式。你在多大程度上同意或不同意?

【参考范文】

Some people believe that the key to solving environmental problems is for the present generation to sacrifice their comfortable way of life for the sake of future generations. I strongly agree with this view.

Our current lifestyle is causing serious damage to the environment. The overuse of cars, the excessive consumption of goods and the heavy reliance on fossil fuels all lead to pollution and climate change. If we continue to enjoy this convenient way of life without restraint, our children and grandchildren will inherit a damaged planet.

Sacrificing some comfort today is necessary to protect the future. For example, we can use public transport instead of private cars, reduce unnecessary consumption and recycle more. These changes may cause some inconvenience, but they are essential if we want to leave a clean and healthy environment for future generations.

Moreover, this sacrifice is not only an environmental issue but also a moral one. We have a responsibility to ensure that future generations can enjoy clean air, water and natural resources just as we do.

In conclusion, I agree that the present generation should accept certain sacrifices in comfort so that we can protect the natural environment for the benefit of those who come after us.

吉大各专业课教材与学习生
活政策信息(持续更新中)

17. STEM 是否总比人文更容易就业

英文原题:

Will students who major in STEM subjects always find it easier to get a job than those who major in the humanities? To what extent do you agree or disagree?

中文翻译: 主修理工科(STEM)的学生是否总会比主修人文科学的学生更容易找到工作? 你在多大程度上同意或不同意?

【参考范文】

Some people claim that students who major in STEM subjects will always find it easier to get a job than those who major in the humanities. While STEM graduates do enjoy strong employment prospects, I do not believe this advantage is permanent or absolute.

It is true that in today's technology-driven economy, STEM skills are in high demand. Engineers, programmers and data scientists are highly sought after, and these fields tend to offer higher starting salaries and more vacancies. This explains why technical majors generally have higher employment rates.

However, it would be wrong to say that STEM majors will always be easier to employ. First, the job market changes over time. As technology develops, some technical jobs may be automated or outsourced. Second, humanities graduates possess valuable abilities such as communication, creativity and critical thinking, which are increasingly important in a world where many routine tasks are done by machines.

In conclusion, although STEM majors currently have an advantage in the job market, I disagree that this will always be the case. Ultimately, employability depends not only on one's major but also on one's skills, attitude and ability to adapt.

18. 音乐是人类通用语言

英文原题:

Music has been and will continue to be the universal language of mankind. To what extent do you agree or disagree?

中文翻译: 音乐一直是、并将继续是人类的通用语言。你在多大程度上同意或不同意?

【参考范文】

Music has been and will continue to be the universal language of mankind, and I strongly agree with this statement.

First of all, music can cross all barriers of language and culture. A beautiful melody can touch people's hearts regardless of whether they understand the lyrics. For example, classical music composed hundreds of years ago is still enjoyed by people all over the world today, and a song in a foreign language can still move us deeply. This shows that music speaks directly to human emotions.

Secondly, music brings people together. At concerts and festivals, people from different backgrounds can share the same joy and excitement. Music is often used to celebrate important events in almost every culture, which proves its universal appeal.

Finally, music has a powerful ability to express feelings that words cannot fully convey. Joy, sadness, love and hope can all be communicated through music, making it a truly global form of expression.

In conclusion, because music transcends language and culture and unites people emotionally, I firmly believe that it has been and will always be a universal language of mankind.

19. 定期体检 vs 感觉良好就不用

英文原题:

Some people think that everyone should have regular physical check-ups, while others believe that check-ups are unnecessary if a person feels healthy. Discuss both views and give your own opinion.

中文翻译: 有人认为每个人都应定期体检, 另一些人则认为只要感觉健康就没必要体检。请讨论双方观点并给出你的看法。

【参考范文】

Some people think everyone should have regular physical check-ups, while others believe check-ups are unnecessary if a person feels healthy. In my opinion, regular check-ups are highly important.

On the one hand, those who oppose regular check-ups argue that if people feel fine, there is no need to spend time and money on medical examinations. They believe that as long as one has a healthy lifestyle, visiting the doctor regularly is a waste of resources.

On the other hand, regular check-ups can detect serious diseases at an early stage. Many illnesses, such as high blood pressure, diabetes and even some cancers, show no obvious symptoms in the early stages. By the time a person feels unwell, the disease may already be advanced and difficult to treat. Early detection through check-ups can greatly improve the chances of a full recovery and save both money and suffering in the long run.

In my view, the benefits of regular health checks clearly outweigh their costs. Prevention and early detection are always better than cure.

In conclusion, even if we feel healthy, I believe regular physical check-ups are necessary, because they help us discover hidden health problems before it is too late.

20. 超市卖假货怎么保护消费者

英文原题:

Some mainstream supermarkets have been found selling counterfeit/fake goods. What measures can be taken to protect consumers?

中文翻译: 一些大型超市被发现销售假冒伪劣商品。可以采取哪些措施保护消费者?

【参考范文】

Some mainstream supermarkets have been found selling counterfeit or fake goods. This not only harms consumers but also damages public trust. Several measures should be taken to protect consumers.

First of all, the government should strengthen supervision and impose heavy penalties on supermarkets that sell fake products. Regular inspections and stricter quality standards would force businesses to be more careful about the goods they put on their shelves. Severe fines would make selling counterfeits too costly to be worthwhile.

Secondly, supermarkets themselves must take responsibility. They should establish a strict quality-control system and carefully check their suppliers to ensure that all products are genuine. A clear refund and compensation policy should also be put in place, so that customers can easily get their money back if they buy fake goods.

Thirdly, consumers should be educated to protect their own rights. They should learn to check labels, keep receipts and report fake products to the authorities.

In conclusion, protecting consumers from counterfeit goods requires joint efforts by the government, supermarkets and consumers themselves. Only in this way can a fair and trustworthy shopping environment be maintained.

21. 教师薪水与学生学习水平挂钩

英文原题:

Do you agree or disagree with the following statement? Teachers should be paid according to how much their students learn.

中文翻译: 你是否同意以下说法: 教师应根据其学生学习到多少来获得薪酬?

【参考范文】

Some people suggest that teachers should be paid according to how much their students learn. However, I disagree with this idea because it is unfair and difficult to put into practice.

First of all, students' learning outcomes are influenced by many factors beyond a teacher's control. A student's family background, personal effort and natural ability all play an important role in how well they learn. If teachers are paid based on students' results, those teaching disadvantaged or less motivated students would be unfairly punished.

Secondly, this approach could harm the quality of education. If teachers' salaries depend on test scores, they may be tempted to "teach to the test" rather than encourage creativity and independent thinking. Valuable goals such as moral education and character building would be neglected.

Thirdly, measuring a teacher's contribution accurately is extremely difficult. Standardized tests cannot capture everything a student gains from a good teacher.

In conclusion, I believe that linking teachers' salaries directly to students' learning is not a wise policy. A fairer approach would be to evaluate teachers based on their overall professional performance and provide them with decent pay and respect.

22. 塑料污染的危害与措施

英文原题:

Plastic bags, plastic bottles and plastic packaging are bad for the environment. What damage does plastic do to the environment? What can be done by governments and individuals to solve this problem?

中文翻译: 塑料袋、塑料瓶和塑料包装对环境有害。塑料对环境造成哪些危害? 政府和个人可采取什么措施解决?

【参考范文】

Plastic bags, plastic bottles and plastic packaging are bad for the environment. They cause serious harm, and both governments and individuals must take action to solve this problem.

Plastic pollution damages the environment in several ways. First, plastic waste is extremely difficult to break down, so it remains in the soil and water for hundreds of years, contaminating the earth and polluting rivers and oceans. Second, plastic waste kills wildlife. Many sea animals and birds mistake plastic for food and die from eating it or becoming trapped in it. Third, the production of plastic consumes large amounts of oil and releases harmful gases.

Several measures can be taken. Governments should introduce laws to limit the production and use of single-use plastics, and impose "green taxes" on plastic manufacturers. They should also invest in recycling facilities. Individuals should also take responsibility by using reusable bags, choosing products with less packaging and recycling as much as possible.

In conclusion, plastic pollution is a serious threat, but it can be reduced if governments, businesses and individuals all play their part.

23. 毕业生跳槽

英文原题:

Many young people change their jobs and careers. What are the reasons for this? Do the advantages outweigh the disadvantages?

中文翻译: 许多年轻人频繁更换工作和职业。原因是什么? 这样做利大于弊吗?

【参考范文】

Nowadays, many young people change their jobs and careers frequently. There are several reasons behind this trend, and I believe its advantages outweigh the disadvantages.

One main reason is that young people today value personal development more than job security. They are eager to learn new skills and seek better opportunities, so they are willing to move to a new job when their current one no longer meets their needs. Another reason is the desire for higher pay and better working conditions.

Job-hopping has clear benefits. It allows young people to gain diverse experience, broaden their horizons and find a career that truly suits their interests and abilities. Changing jobs often also leads to faster salary growth.

However, there are some drawbacks. Frequent job changes may make it harder to build deep expertise or long-term relationships, and some employers may view job-hoppers as lacking loyalty and stability.

In conclusion, although job-hopping carries some risks, I believe that, on balance, changing jobs is beneficial for young people as it helps them grow professionally and find a more satisfying career.

24. 间隔年 (gap year)

英文原题:

In some countries, young people are encouraged to work or travel for a year between finishing high school and starting university studies. Discuss the advantages and disadvantages for young people who decide to do this.

中文翻译: 在一些国家, 年轻人被鼓励在高中毕业与开始大学学业之间花一年时间工作或旅行。请讨论选择这样做的年轻人的利弊。

【参考范文】

In some countries, young people are encouraged to work or travel for a year between finishing high school and starting university. Taking a gap year has both advantages and disadvantages.

On the positive side, a gap year allows students to gain valuable life experience. By travelling, they can broaden their horizons and learn about different cultures. By working, they can develop practical skills, become more independent and earn some money for their future studies. This experience often makes them more mature and better prepared for university life.

On the negative side, taking a year off may cause some problems. Students may lose the habit of studying and find it difficult to return to academic life. Some may waste the year doing nothing meaningful, or spend a large amount of money. There is also the concern that a gap year could delay their career.

In my opinion, whether a gap year is beneficial depends on how it is used. If students plan it carefully and use the time to learn and grow, the advantages will outweigh the disadvantages.

25. 在家学习, 学校还有必要吗

英文原题:

Schools are no longer necessary because children can get so much information available through the internet, and they can study just as well at home. To what extent do you agree or disagree?

中文翻译: 有人认为学校已无必要, 因为孩子可通过互联网获取大量信息, 在家学习也一样好。你在

持续更新中(持续更新中)

多大程度上同意或不同意？

【参考范文】

Some people argue that schools are no longer necessary because children can learn everything from the internet at home. However, I strongly disagree with this view.

First of all, schools provide much more than academic knowledge. They teach children how to cooperate with others, follow rules and develop social skills. At school, children learn to make friends, share ideas and work in teams, which are abilities that cannot be gained by studying alone at home.

Secondly, teachers play an essential role that the internet cannot replace. A good teacher can explain difficult concepts, give timely feedback and motivate students to work hard. Without proper guidance, many children would easily lose interest or be distracted by online entertainment.

Thirdly, schools offer a structured and disciplined environment. For most children, self-study at home is not effective, because they lack the self-control needed to manage their own learning.

In conclusion, although the internet is a useful tool for learning, I believe schools will remain necessary, because they provide social development, professional guidance and a disciplined environment that home study cannot offer.

26. 无人驾驶汽车

英文原题：

In the future all cars, buses and trucks will be driverless. The only people travelling inside these vehicles will be passengers. Do you think the advantages of driverless vehicles outweigh the disadvantages?

中文翻译：将来所有小汽车、公交车和卡车都将无人驾驶，车内的人只是乘客。你认为无人驾驶的利是否大于弊？

【参考范文】

It is predicted that in the future all cars, buses and trucks will be driverless, with only passengers travelling inside. In my opinion, the advantages of driverless vehicles outweigh the disadvantages.

On the positive side, driverless cars would greatly improve road safety. Most traffic accidents are caused by human error, such as careless or drunk driving. If vehicles are controlled by computers, these mistakes can be avoided, saving countless lives. In addition, driverless vehicles could reduce traffic congestion and allow passengers to rest, work or read during the journey, making travel more efficient and comfortable.

However, there are some drawbacks. One concern is that driverless technology may not yet be completely reliable, and a system failure could be dangerous. Another problem is unemployment, as millions of professional drivers could lose their jobs.

In conclusion, although there are challenges such as technological reliability and job losses, I believe that the benefits of driverless vehicles, especially in terms of safety and convenience, outweigh the disadvantages.

27. 帮助发展中国家：财政帮扶 vs 实用援助与建议

英文原题：

Many developing countries require aid from international organizations to grow. Many people think that this aid should be financial, while others believe practical aid and advice are more useful. Discuss both views and give your own opinion.

中文翻译：许多发展中国家需要国际组织的援助来发展。很多人认为这种援助应是资金援助，另一些人则认为实用援助和建议更有用。请讨论双方观点并给出你的看法。

活政策信息(持续更新中)

Many developing countries need aid from international organizations. Some people think this aid should be financial, while others believe practical aid and advice are more useful. In my opinion, practical aid and advice are generally more effective.

On the one hand, financial aid can provide immediate relief. Money can be used to build infrastructure, buy food and medicine, and support urgent needs. For countries facing disasters or economic crises, direct funding is often the quickest way to help.

On the other hand, practical aid and advice bring more lasting benefits. Simply giving money does not guarantee that it will be used wisely, and corruption may waste the funds. In contrast, practical aid such as technology, equipment and training helps countries build their own capacity. Expert advice on agriculture, education and governance can teach people how to develop sustainably on their own.

In my view, the best approach is to combine both. Financial support can address urgent problems, while practical aid and advice ensure long-term development. However, if I had to choose one, I would favour practical aid, because it empowers developing countries to grow independently rather than depend on outside money forever.

In conclusion, while both forms of aid are valuable, practical assistance and advice are more useful for achieving sustainable development.

28. 为什么人们会吃不健康的食物

英文原题:

Nowadays, people's eating habits are changing, causing many health problems including obesity. Why do people tend to eat so badly? What can be done to improve their eating habits?

中文翻译: 如今, 人们的饮食习惯正在改变, 导致了包括肥胖在内的许多健康问题。为什么人们倾向于吃得不健康? 可以采取什么措施来改善他们的饮食习惯?

【参考范文】

Nowadays, people's eating habits are changing, causing many health problems including obesity. There are several reasons why people tend to eat so badly, and some measures can be taken to improve the situation.

The main reason is that fast food is highly convenient and affordable. Many people lead busy lives and have little time to cook, so they turn to cheap fast food and processed snacks. Another factor is advertising, which constantly promotes unhealthy products, especially to young people. In addition, processed food often tastes better and is more addictive than fresh food.

Several measures can be taken to solve this problem. First, governments should introduce laws to limit the advertising of junk food and impose taxes on sugary products. Second, schools should teach children about healthy eating from an early age. Finally, individuals should develop the habit of cooking at home and choosing fresh, natural food.

In conclusion, although unhealthy eating habits have many causes, they can be improved through the combined efforts of governments, schools and individuals.

29. 刚毕业的学生不会理财

英文原题:

In many countries, students who leave high school have no understanding of how to manage their money. What do you think are the reasons? What can be done to solve the problem?

中文翻译: 在许多国家, 离开学校的学生对如何管理自己的金钱毫无概念。你认为原因是什么? 可以采取什么措施来解决这个问题?

【参考范文】

In many countries, students who leave high school have no understanding of how to manage their money. There are several reasons for this, and effective measures should be taken to solve it.

One major reason is that financial education is largely absent from the school curriculum. Students spend years learning academic subjects such as maths and history, but they are rarely taught how to budget, save or avoid debt. Another factor is that many young people grow up relying on their parents for money, so they never develop the habit of managing finances on their own.

To solve this problem, several steps can be taken. First, schools should introduce courses on personal finance, teaching students practical skills such as budgeting and saving. Second, parents should give their children some financial responsibility, for example by giving them a monthly allowance and encouraging them to plan their spending. Finally, governments and banks could provide free financial education programmes for young people.

In conclusion, the lack of financial skills among school leavers is a serious issue, but it can be addressed through better education and more responsibility at home.

30. 快餐取代传统食物对社会和家庭的影响

英文原题:

In many countries, traditional foods are being replaced by international fast food. This is having a negative effect on both families and societies. To what extent do you agree or disagree?

中文翻译: 在许多国家, 传统食物正被国际快餐所取代, 这对家庭和社会都产生了负面影响。你在多大程度上同意或不同意?

【参考范文】

In many countries, traditional foods are being replaced by international fast food, and this is having a negative effect on both families and societies. I strongly agree with this view.

First of all, the spread of fast food weakens family bonds. In the past, families often gathered around a table to share home-cooked meals, which was an important time for communication. Today, however, many families eat fast food separately or in a hurry, so they spend less quality time together.

Secondly, fast food harms public health. Traditional diets are usually balanced and nutritious, while fast food is often high in fat, sugar and salt. As a result, the growing popularity of fast food has led to a rise in obesity and related diseases, which places a heavy burden on society.

Finally, the loss of traditional food means the loss of cultural identity. Local dishes are an important part of a country's heritage, and if they disappear, part of its culture is lost.

In conclusion, I believe that the replacement of traditional food by fast food has clear negative effects on family life, public health and cultural identity.

英语作文万能行文范式（考场以不变应万变）

＞ 核心逻辑：题目千变万化，题型只有五类；题型定了，骨架和句式就定了，只需从“万能理由库”填血肉。

〇、总心法：60 秒内只做三件事

1. 辨题型—— 看问法关键词，归入下面五大类之一；
2. 定骨架—— 按题型套对应结构（开头 + 主体 + 结尾）；
3. 填血肉—— 从「万能理由库」取观点、从「句式库」取句型、从「连接词」取衔接。

＞ 记住一句：结构固定、句式替换、理由万能。同样 150 词，套骨架永远不跑题。

一、五大题型 → 万能骨架

通用四段式（所有议论文的底层骨架）

段落	功能	固定动作
开头段	引入 + 改写 + 立场	3~4 句
主体段 1	论点一	主题句 + 理由 + 例证
主体段 2	论点二 / 对立面	同上（或让步）
结尾段	总结 + 建议 / 展望	2~3 句

题型① 观点类（Agree / Disagree, To what extent…）

关键词：agree / disagree / to what extent

骨架：开头改写题目 + 明确立场 → 主体 1 支持理由一（Firstly）→ 主体 2 支持理由二（Secondly）+ 让步一句（Admittedly / However）→ 结尾重申立场。

题型② 双边讨论类（Discuss both views and give your opinion）

关键词：discuss both views / some... others...

骨架：开头改写两方观点 → 主体 1 观点 A（On the one hand）→ 主体 2 观点 B（On the other hand）→ 结尾我的立场（In my view）。

题型③ 利弊类（advantages / disadvantages, outweigh）

关键词：advantages / disadvantages / outweigh / positive or negative

骨架：开头改写现象 → 主体 1 好处（Firstly / Secondly）→ 主体 2 坏处（However）→ 结尾判断（On balance...）。

题型④ 原因类（What are the reasons? / Why?）

关键词：reasons / why / what causes

骨架：开头改写现象 + 预告分析 → 主体 1 原因一 → 主体 2 原因二 → （可选）主体 3 影响（As a result）→ 结尾总结。

题型⑤ 问题解决类（What can be done? / measures / solutions）

更多学习资源，关注吉井解学公众号

吉大各专业课教材与学习生
活政策信息(持续更新中)

关键词: measures / solutions / what can be done

骨架: 开头点明问题 → 主体 1 原因 / 危害 → 主体 2 措施一 (Firstly, governments should...) → 主体 3 措施二、三 (Secondly... Finally...) → 结尾号召 (It is high time that...).

二、五类题型的英文填空模板 (可直接套用)

模板① 观点类

It is widely believed that _____. Personally, I completely agree / disagree with this view.

First of all, _____. This is because _____. For example, _____. As a result, _____.

Secondly, _____. There is no denying that _____.

Admittedly, some people may argue that _____. However, I believe _____.

In conclusion, while _____, I firmly believe that _____.

模板② 双边讨论类

There is a heated debate over whether _____. Some people believe _____, while others argue _____.

On the one hand, those who support the first view claim that _____. In their opinion, _____.

On the other hand, others take a different attitude. They argue that _____.

As far as I am concerned, _____. Although both views have some truth, I tend to believe that _____.

模板③ 利弊类

Nowadays, _____ has become increasingly common. This trend has both advantages and disadvantages.

On the positive side, _____. For one thing, _____. For another, _____.

However, there are also drawbacks. _____. In addition, _____.

On balance, I believe the advantages outweigh the disadvantages, provided that _____.

模板④ 原因类

In recent years, more and more people _____. Several reasons can account for this phenomenon.

First of all, _____. The reason why _____ is that _____.

Another important factor is _____. In addition, _____.

In conclusion, _____ is caused by _____, and this trend is likely to continue in the future.

模板⑤ 问题解决类

Nowadays, there is a growing concern over _____. This problem has caused serious consequences.

Several measures should be taken to solve it. Firstly, the government should _____.

Secondly, individuals should _____. Finally, _____.

In conclusion, only by combining the efforts of _____ can we _____.

三、各段万能句式库

A. 开头段 —— 6 种开头法（任选其一）

开头法	句式（英文原文）	中文
对立法	When it comes to..., some people believe that... Others argue the opposite is true. There is probably some truth in both, but I tend to the latter.	谈到...有人...另一些人相反, 两者都有理, 但我倾向后者
现象法	Recently, the phenomenon of... has aroused public / widespread concern.	近来...现象引起广泛关注
观点法	There is a growing awareness of the importance of...	人们越来越意识到...的重要性
引用法	"..." Such is the remark made by... This remark has been shared by more and more people.	名言引出
比较法	People used to think that... But people now take a fresh look.	过去...现在看法变了
问题法	Should...? Opinions vary greatly; some..., others... But in my opinion...	设问引出

B. 主体段 —— 万能论证句式

提论点:

- There is no denying that... (不可否认)
- It is universally acknowledged that... (众所周知)
- An advantage of... is that... (...的一个好处是)
- The reason why... is that... (...的原因是)

列原因:

- Why...? For one thing... For another... (为什么? 一方面...另一方面...)
- The answer involves many factors. First of all... In addition... Finally...

更多学习资源，关注吉井解学公众号

- Another important factor is...

举例：

- For example, ... / Take... as a typical example.
- A case in point is...

对比 / 让步：

- On the one hand... On the other hand...
- Admittedly, ... However, ...
- ... carries much weight when compared with...

说影响：

- It will produce a profound / far-reaching effect on...
- ... poses a great threat to...
- ... has a great influence on...

C. 结尾段 —— 6 种结尾法（任选其一）

结尾法	句式	中文
结论性	From what has been discussed above, we may safely draw the conclusion that...	由上可得出结论
建议性	Effective measures should be taken to...	应采取有效措施
号召性	It is high time that we urged an immediate end to...	是时候停止...了
后果性	If we ignore the problem, there is every chance that... will be put in danger.	若忽视，必将...
意义性	It will not only benefit... but also benefit...	不仅利...也利...
方向性	There is no quick solution to..., but... might be helpful.	无捷径，但...有帮助

四、万能理由库（10 维度，观点想不出就查这里）

维度	核心英文表达	适用题目
----	--------	------

更多学习资源，关注吉井解学公众号

吉大各专专业电子教材与学习生
活政策信息(持续更新中)

方便	convenient, save time energy	/科技、无人驾驶、在线学习
效率	efficient, improve productivity	AI、科技、工作
金钱	save money, reduce cost, financial pressure	读研、晚育、旅游
心理健康	confident, independent, creative, relieve stress	犯错、gap year、间隔年
身体健康	health, energetic, disease	预防、体检、运动
娱乐	relax, pleasure, recharge	旅游、音乐、兴趣爱好
环境	pollution, climate change, renewable energy	塑料、减碳、环保
安全	safe, danger, risk	无人驾驶、道路安全
经验	broaden horizons, gain experience	出国、gap year、跳槽
人际 / 社会	fair, help, social skills, cooperation	教育、学校、援外

五、高分句式精华（26 句中最通用 12 句）

1. There is no denying that...（不可否认）
2. It is universally acknowledged that...（众所周知）
3. There is no doubt that...（毫无疑问）
4. Nothing is more important than to...（没有比...更重要）
5. We cannot emphasize the importance of... too much.（再怎么强调...也不为过）
6. An advantage of... is that...（...的好处是）
7. The reason why... is that...（原因是）
8. The more..., the more...（越...越...）
9. By + doing, we can...（通过...我们能...）
10. It is time that the authorities concerned took proper steps to...（是时候当局采取措施了）
11. ... poses a great threat to...（...对...构成威胁）
12. We should do our utmost to...（我们应尽力...）

六、衔接词清单（决定连贯性得分）

更多学习资源，关注吉井解学公众号

吉大各专业电子教材与学习生
活政策信息(持续更新中)

- 列举: Firstly / Secondly / Finally / To begin with / What's more / Moreover
- 转折: However / Nevertheless / On the other hand / By contrast
- 让步: Although / Even though / Admittedly
- 因果: Therefore / As a result / Consequently / Thus / This means that
- 举例: For example / For instance / A case in point
- 结论: In conclusion / In summary / To sum up / On balance / In a word

七、考场 60 秒操作口诀

>一看问法定题型，二套骨架定段落，三从理由填观点，四选句式凑成篇。

- 看到 **agree / disagree** → 观点类: 立场 + 理由 + 让步 + 重申
- 看到 **discuss both views** → 双边类: A 方 + B 方 + 我的立场
- 看到 **advantages / disadvantages** → 利弊类: 好处 + 坏处 + 判断
- 看到 **reasons / why** → 原因类: 原因一二三
- 看到 **measures / what can be done** → 解决类: 问题 + 措施一二三
